Their names. 3. The number of vessels employed in the work of the Canadian Naval Service rented or chartered during the period of the war. 4. Their names. Presented April 15, 1920. Mr. Deslauriers. *Not printed.*
118. Return to an Order of the House of the 24th March, 1919, for a Return showing the number of commutation of sentence accorded by the Department of Justice to prisoners condemned to be hanged, where the crimes were committed, and the sentence imposed after commutation, within the list four years. Presented April 15, 1920. Mr. Casgrain. *Not printed.*
119. Return to an Order of the House of the 19th March, 1920, for a Return showing:—1. Number of persons discharged from the Government Printing Bureau and Department of Public Printing and Stationery from 1st January, 1919, to 1st March, 1920. 2. Upon whose recommendation and report dismissals were made. 3. Whether the King's Printer or Assistant King's Printer recommended the persons to be dismissed. 4. Whether the report of dismissal was in writing. 5. What qualifications the person or persons had who investigated the respective cases for dismissal, what investigation was made by them and whether their conclusions are reduced to writing. Presented April 15, 1920. Mr. Frappé. *Not printed.*
120. Return to an Order of the House of the 24th March, 1920, for a copy of all letters, telegrams, correspondence, and other papers in the possession of the Government, in connection with the transfer of mail bags from the C. P. R. mail car to the mail car of the Quebec, Montreal and Southern Railway Company, and from the latter to the former, at Itherville Junction, during the period extending from the month of November, 1917, to the month of April, 1918. Presented April 16, 1920. Mr. Deners. *Not printed.*
121. Return to an Order of the House of the 31st March, 1920, for a copy of all telegrams, papers, letters and correspondence with reference to the application for naturalization of Professor F. V. Rietdorf, alias Frederick Edwards, 205 Scott Block, Winnipeg, also for copies of all correspondence to date with reference to the resignation of the said F. V. Rietdorf, alias Frederick Edwards, from the employ of the Department of State and in particular correspondence with the President of the Privy Council, Controller McLean and Mr. A. Brophy of the said Department. Presented April 16, 1920. Mr. Power. *Not printed.*
122. Return to an Order of the House of the 22nd March, 1920, for a Return showing:—1. Number of chartered banks in Canada in 1880. 2. Number of chartered banks in Canada at the present time. 3. What profits, as shown by their annual statements, were made by each of the chartered banks in the years 1911, 1912, 1913, 1914, 1915, 1916, 1917, 1918 and 1919. 4. What taxes each paid to the Federal Treasury in each of the above years. 5. What amount, not being interest on money borrowed, the Federal Government paid to each chartered bank in each of the years 1914, 1915, 1916, 1917, 1918 and 1919 for service rendered. 6. The paid up capital of each bank, and its reserve. Presented April 16, 1920. Mr. Ross. *Not printed.*
123. Copy of all correspondence, papers, documents and telegrams, concerning the amelioration of conditions among the Indians and Eskimos inhabiting the east coast of James and Hudson Bays, from East Main River in the south to Hudson Straits in the north, showing what has been and is being done to provide emergency relief, medical attention, administration of Justice, industrial training, introduction of reindeer treaty rights, securing of adequate prices for their furs, and any other matter in the interests of these people. The Senate. *Not printed.*
124. Return to an Order of the House of the 15th April, 1920, for a Return showing:—1. What the value in Canadian currency of the British pound sterling was on the first of the months of November and December, 1914, on the first of all the months of the years 1915, 1916, 1917, 1918, and on the first of January and February, 1919. 2. During the years 1914, 1915, 1916, 1917 and 1918, whether the officers and men of the Canadian Expeditionary Force were paid in accordance with the rates of exchange prevailing at the various times at which payments were made to them, and if not, at what rate or rates. 3. What was done in this respect with payments made to interned Canadian soldiers, and at what rate or rates their pay was converted into the currencies of the countries in which they were interned. Presented April 19, 1920. Mr. McMaster. *Not printed.*
125. Return to an Order of the House of the 12th April, 1920, for a Return showing:—1. How much, if any, of the Federal Emergency Fund for the re-establishment of the returned soldier was overpaid or inadvertently paid to those not entitled to it under the regulations. 2. How much of this amount has been recovered. 3. How many prosecutions have been instituted for this recovery. 4. What the decision has been in each case. 5. Whether it is the intention of the Government to undertake any further action in cases of this nature. Presented April 19, 1920. Mr. Chisholm. *Not printed.*
126. Return to an Order of the House of the 12th May, 1919, for a Return showing:—1. Whether prosecutions were authorized by the Government against parties in the Province of Nova Scotia for neglecting to place War Revenue Stamps upon packages of Proprietary or Patent Medicine before the sale thereof, as required by the War Revenue Act, 1915. 2. Person or persons appointed to institute these prosecutions. 3. Number of prosecutions, if any brought. 4. Names of solicitors designated by the Government to conduct them. 5. Terms of said solicitors' appointment. 6. Gross amount of fines imposed. 7. In what counties in Nova Scotia such prosecutions were brought. 8. Who recommended the appointment of such Prosecutors and Solicitors. Presented April 19, 1920. Mr. Sinclair (Antigonish). *Not printed.*
127. Copy of Order in Council P.C. 385, dated 14th February, 1920, in respect to the organization of an Air Force in Canada. Presented by Hon. Mr. Sifton, April 19, 1920. *Not printed.*
128. Return showing:—1. For what purposes the special Trade Commission of the overseas branch of the Department of Trade and Commerce has been created, and how the purposes are to be accomplished. 2. Who is in charge thereof, and his salary. 3. If publicity for Canadian production is sought, who has received the appointment

CONTENTS OF VOLUME 10—*Continued.*

- of publicity expert, and what the proposed remuneration is for such. 4. What sums, annually or otherwise, are paid by Canada to the British newspaper known as *Canada*, and what sums to the *Canada Gazette*? Presented April 19, 1920. Mr. McMaster . . . . . *Not printed.*
129. Return to an Order of the House of the 7th April, 1919, for a copy of the correspondence exchanged between F. X. Gagnon, Port Daniel East, Quebec, and the Department of Justice, regarding the Military Exemption Tribunal which sat at that place. Presented April 20, 1920. Mr. Marcil Bonaventure? . . . . . *Not printed.*
130. Return to an Order of the House of the 29th September, 1919, for a copy of all telegrams, letters, contracts and plans, passed between the Commission of the Transcontinental Railway, or the Government and the City of Quebec, the different transport companies, the Harbour Commission of Quebec or any other persons, corporations or companies from 1910 to date, concerning the construction of a railway station at the Champlain Market in the city of Quebec, also the construction, in the said city, of wharves, docks, elevators to facilitate the transport of grain from the West via the Port of Quebec. Presented April 20, 1920. Mr. Parent . . . . . *Not printed.*
- 130a. Return to an Order of the House of the 5th May, 1920, for a copy of all documents, contracts and correspondence relating to the negotiations between the City of Quebec and the Transcontinental Railway regarding the Champlain market site and the proposed docks and grain elevators situated along the front of the St. Lawrence river, Quebec. Presented May 18, 1920. Mr. Power . . . . . *Not printed.*
131. Return to an Order of the House of the 29th September, 1919, for a copy of all documents, letters, and plans, submitted by the Harbour Commission of Quebec since 1910 to date, concerning the construction of wharves, docks, elevators, cold storage, terminal facilities in the Port of Quebec, for the transport by land and water. Presented April 21, 1920. Mr. Parent . . . . . *Not printed.*
132. Return showing:—1. Minimum and maximum salary being paid to postmasters. 2. By what method the minimum and maximum salary of postmasters is determined. 3. Whether postmasters receive a bonus on account of the high cost of living. 4. If not, why. 5. Minimum and maximum salary being paid to rural mail carriers. 6. Whether the Government has fixed a maximum rate per mile to apply to rural mail routes. 7. How the salary of rural mail carriers is determined. 8. Whether rural mail carriers receive a bonus on account of the high cost of living. 9. If not, why. 10. Minimum and maximum salary being paid to letter carriers. 11. Whether letter carriers receive a bonus. 12. If so, how much. Presented April 21, 1920. Mr. Kennedy (Glengarry) . . . . . *Not printed.*
133. Return showing:—1. Number of persons employed in the province of Quebec in connection with the work of the Soldiers' Settlement Board. 2. Their names and post office addresses. 3. Salary or remuneration each one is drawing. 4. Whether any of these employees are allotted to certain constituencies. 5. If so, what persons are allotted to the various constituencies, and to what constituencies. Presented April 26, 1920. Mr. Tobin . . . . . *Not printed.*
134. Return to an Order of the House of the 31st March, 1920, for a copy of all letters, telegrams and other correspondence that has passed between one George Carvill, of the City of St. John, formerly City Ticket Agent for the Canadian Government Railway (formerly Intercolonial Railway) at the said City of St. John, and any and all others for and on behalf of the said George Carvill and the Minister of Railways and Canals, Deputy Minister or any other Ministers of the Government or any general manager, assistant manager, superintendent or other officials of the Canadian Government Railway in reference to the dismissal of the said George Carvill from said railway on the 30th day of April, A.D. 1917, and the request of the said George Carvill for an investigation under oath before an independent tribunal into the causes for his dismissal and the refusal of the management of the said railway to grant such an investigation. Presented April 27, 1920. Mr. Copp . . . . . *Not printed.*
135. Return to an Order of the House of the 22nd March, 1920, for a copy of all documents, letters, telegrams and other correspondence in the hands of the Government concerning the proposed railway between St. Camille, County of Bellechasse, and Cabano, County of Temiscouata. Presented April 27, 1920. Mr. Fafard . . . . . *Not printed.*
136. Return to an Order of the House of the 22nd March, 1920, for a copy of the Report made by the Board of Railway Commissioners for Canada, on the application of the Canadian Pacific and Grand Trunk Railway Companies, on behalf of themselves and other railways carrying His Majesty's mail in Canada, asking that fair and reasonable rates be fixed by the Board for the carriage of mails pursuant to the reference of the matter to the Board by Order in Council, P.C., 617, dated March 7, 1917, for the determination as to the accuracy or inaccuracy of the claim made by the railway companies, that these rates are inadequate, and, if it is found that the present rates are inadequate to determine as the result of evidence to be submitted by the Post Office Department and the railway companies interested what would be a fair rate of payment for the service. Also a copy of all correspondence between members of the Government or any officials thereof and the Board of Railway Commissioners or any officials thereof in reference to the report mentioned above. Presented April 27, 1920. Mr. Bureau . . . . . *Not printed.*
- 136a. Return to an Order of the Senate dated April 28, 1920, for a Return of the evidence and other proceedings submitted before the Dominion Railway Commission at the sessions at Ottawa on October 3, 1911, November 7, 1911, and March 18, 1919, relating to freight rates and all matters before said Board on said dates. 2. A copy of the report made by said Board to the Government as the result of said investigations. 3. A copy of the postal rate agreement or agreements existing between the Government and the railway companies for parcel post service, including a statement or copy of the rates charged by the Government railways. 4. A copy of the report made by the Dominion Railway Board to the Government on the contracts between the Government and the railway companies as to the rates charged for the postal services. 5. Does the said report show (or is the Government aware) that the rates fixed and paid are less than it cost the railway companies to perform the services. 6. What quantity of mail is carried annually by parcel post. 7. How much of it is carried for mail order houses—distinguishing quantities by provinces. 8. What are the postal rates charged for parcel post packages: (a) to the public (b) to mail order houses. 9. Do these rates pay the full cost of transportation. If not, what is the loss. 10. If there is a loss how is it provided for? 11. Does the Government intend to make a change in the parcel post rates. If so, what. The Senate . . . . . *Not printed.*
137. Return to an Order of the House of the 12th April, 1920, for a Return showing at the end of the fiscal year 1910, and each subsequent year, the total assets of Canada, the amount received in each year as interest or other income from such assets, and the average rate of interest or other income so received in each year. Presented April 28, 1920. Mr. Fielding . . . . . *Not printed.*

## CONTENTS OF VOLUME 10—Continued.

138. Return to an Order of the House of the 10th March, 1920, for a Return showing:—1. The total amount of commission charges paid to brokers and agents in connection with the last Victory Loan. 2. What amounts have been paid to each of the said brokers and agents. 3. Whether any of the said commission charges have not yet been paid. 4. If so, whose accounts they are, and for what reason they have not been paid. Presented April 28, 1920. Mr. Archambault. *Not printed.*
139. Return showing:—1. Names of the so-called experts employed by the Arthur Young Company to classify the employees of the various departments, and which department or departments did each such expert classify. 2. The ages, nationality educational, and practical qualification, including positions previously held, with special reference to classification work, of each such expert. 3. (a) Cost to the Government for the services of each such expert; (b) what is the cost to the Arthur Young Company of the services of each expert. Have they been paid in Canadian or American money. 4. How many Deputy Ministers have approved the classification of their departments. 5. Whether the Arthur Young Company pay an income or business tax in Canada. 6. In case of difference of opinion respecting classification between the so-called experts and the Civil Service Commission whose opinion prevails. Presented April 28, 1920. M. Gauvreau. *Not printed.*
140. Return to an Order of the House of the 14th April, 1920, for a copy of all reports, letters, petitions or documents referring to claims for damages on behalf of innocent victims who, during the so-called Quebec riots of 1918, have either been killed or wounded by the soldiers of His Majesty. Presented April 29, 1920. Mr. Parent. *Not printed.*
141. Return to an Order of the Senate dated April 18, 1918, for a Return showing:—The amount paid in each year since 1900 inclusive, for (a) reporting, (b) translating, (c) typewriting, and (d) printing proceedings before Commission of Inquiry and all other investigations for or on behalf of the Government or any Department thereof, in English and in French respectively, the names of the persons under (a), (b) and (c) to whom such payments were made, the amount paid to each as salary or other compensation, and the amount paid on account of each such person for travelling and living expenses. The Senate. *Not printed.*
142. Return to an Order of the Senate, dated April 16, 1918, for a Return referring to Return of the Senate (No. 7, August 23, 1917, re officers 78th Regiment, Highlanders of Pictou County, Nova Scotia):—1. (a) Giving the names of the officers mentioned in the said Return who served with the overseas forces at the fighting front since said Return was compiled. (b) The unit and date each one so served. (c) The number who became casualties, and when. 2. The location, connection and rank of each of the officers mentioned in said Return in the overseas forces at the present time. The Senate. *Not printed.*
- 142a. Supplementary Return to an Order of the Senate dated April 16, 1918, for a Return referring to the Senate (No. 7, August 23, 1917, re officers 78th Regiment, Highlanders of Pictou County, Nova Scotia):—1. (a) Giving the names of the officers mentioned in the said Return who served with the overseas forces at the fighting front since said Return was compiled. (b) The unit and date each one so served. (c) The number who became casualties, and when. 2. The location, connection and rank of each of the officers mentioned in said Return in the overseas forces at the present time. The Senate. *Not printed.*
143. Copy Declaration by the Supreme Council of the Peace Conference on the Economic Conditions of the World. The Senate. *Not printed.*
144. Return showing:—1. Whether the Government pays the expenses of an office in Toronto for A. V. White, consulting engineer of the Conservation Commission. 2. If so, what expenses for said office it paid in the fiscal year 1919-20, including rent, salaries of assistants, travelling expenses, etc. 3. What relation, if any, the said A. V. White is to James White, Deputy Head of the Conservation Commission. 4. If any other relatives of its Deputy Head were employed by the Conservation Commission in the past fiscal year, their names, what positions they fill and what salaries were paid them. 5. Whether it is the practice of the Government to maintain offices for all its consulting engineers. 6. Whether it is the intention of the Government to continue to defray the expenses of the Toronto office of the said A. V. White. 7. If the said A. V. White was employed by the Department of Public Works, what was the last year he was so employed and what remuneration he was paid. 8. At what annual salary rate he is being paid by the Conservation Commission for 1920-21. 9. What reports, if any, by A. V. White, other than reports on water-powers and hydro-electric conditions, the Conservation Commission has published. 10. Whether A. V. White holds the degree of Electrical Engineer from a recognized university. 11. Name of the Hydro-Electric Engineer of the Conservation Commission. 12. What degrees he holds and what practical experience he has had. 13. What annual salary he is paid. Presented May 3, 1920. Mr. Cusgrain. *Not printed.*
145. Return showing:—1. How many farms in each constituency in the province of Quebec were purchased by returned soldiers under the provisions of the Soldiers' Settlement Act. 2. The names of the buyers and sellers of each of the said farms. 3. The price paid for each of these farms. 4. Who visited each of the said farms on behalf of the Government. 5. What assistance was given by the Government in connection with each purchase. Presented May 3, 1920. Mr. Tobin. *Not printed.*
146. Return to an Order of the House of the 19th April, 1920, for a Return showing:—1. Whether there was any printing done for the Government outside of the Printing Bureau during the years 1918-1919. 2. If so, by whom. 3. Addresses of persons or firms to whom such printing was given. 4. Amount paid for this outside printing, in each case, in 1918-19. Presented May 4, 1920. Mr. Dechesne. *Not printed.*
147. Return to an Order of the House of the 19th April, 1920, for a Return showing:—1. Amounts loaned or credits given by the Government of Canada: (a) to Greece; (b) to Rumania. 2. The dates these loans were granted or credits given: (a) to Greece; (b) to Rumania. 3. The nature of merchandises purchased by the Government of Canada and charged in each case: (a) to Greece; (b) to Rumania. 4. The names of commercial firms or persons from whom said goods were so purchased, specifying: (a) the nature of goods in each case; (b) the amounts paid by the Government to these firms or persons in each case and also the date of these payments. Presented May 5, 1920. Mr. Archambault. *Not printed.*
148. Return to an Order of the House of the 10th March, 1920, for a copy of all telegrams, petitions, letters and documents of all kinds sent to the Post Office Department referring in any way to the mail route and mail service between Mabou, N.S., and Whyocomagah, N.S. Presented May 5, 1920. Mr. Chisholm. *Not printed.*

## CONTENTS OF VOLUME 10—Continued.

149. Return to an Order of the House of the 31st March, 1920, for a copy of all correspondence, reports and other documents in any way referring to a proposed change in the site of Beatonville Post Office, Inverness County, N.S. Presented May 5, 1920. Mr. Chisholm *Not printed.*
150. Return showing:—1. How many persons are employed on the staff of the Civil Service Commission. 2. Their names. 3. The respective salaries of said persons. Presented May 6, 1920. Mr. Hoeken *Not printed.*
151. Return to an Order of the House of the 26th April, 1920, for a return showing the total quantity in gallons, of spirituous liquors imported into Canada during the years 1913, 1914, 1915, 1916, 1917, 1918 and 1919; and also showing the value in money of the said imports during the same years. Presented May 10, 1920. Mr. Archambault *Not printed.*
152. Return to an Order of the House of the 3rd May, 1920, for a copy of all correspondence and reports concerning the dismissal of Mr. Elisée Parent, inspector of Inland Revenue, the 6th of September, 1916 (file No. 111085). Presented March 10, 1920. Mr. Rinfret *Not printed.*
152. Supplementary Return to an Order of the House of the 3rd May, 1920, for a copy of all correspondence and reports concerning the dismissal of Mr. Elisée Parent, inspector of Inland Revenue, the 6th of September, 1916 (file No. 111085). Presented May 17, 1920. Mr. Rinfret *Not printed.*
153. Return to an Order of the House of the 10th March, 1920, for a copy of all correspondence between the Dominion Government or any member thereof and the Dominion Manufacturers' Association or any manufacturer, relating to appeals from the Supreme or other courts in regard to validity of certain Dominion or Provincial Acts and Provincial Licenses whereby the Dominion Government undertook to give financial aid to said manufacturers for said appeals, as shown in the *Financial Times*, Montreal, or the 21st February, 1920. Presented May 10, 1920. Mr. Devlin *Not printed.*
154. Return to an Order of the House of the 19th April, 1920, for a Return showing:—1. Number of translators employed by the Senate, House of Commons and the different departments of the Government, and number employed by each department. 2. Number employed permanently. 3. Number engaged for the session only. 4. Total annual cost of the translation service. 5. Whether any translation was done outside of Ottawa during the fiscal year ending 31st March, 1919. 6. If so, in how many instances, and what rate was paid per page of printed matter. Presented May 10, 1920. Mr. Hoeken *Not printed.*
155. Return to an Order of the House of the 5th May, 1920, for a copy of a letter from the Board of Trade of the City of Quebec to the Minister of Trade and Commerce, dated October 24, 1919, concerning the new policy adopted by the Ocean Mail Steamers of not stopping at Quebec in their outward voyage, and a copy of the answer to said letter. Presented May 10, 1920. Mr. Lapointe *Not printed.*
156. Return to an Order of the House of the 29th April, 1920, for a Return showing:—1. Name of each official and clerk in the Fisheries Branch at Ottawa who will be in receipt of a salary of \$1,800 or over during the fiscal year 1920-21. 2. Salary of each such official and clerk during the fiscal years 1916-17, 1917-18, 1918-19 and 1919-20. 3. Minimum and maximum salary of each such official and clerk as at present fixed by the classifying experts of the Civil Service Commission. 4. What the salary of each such official and clerk will be during the fiscal year 1920-21. 5. What practical experience or direct connection, if any, each such official and clerk has had in or with the fishing industry; the nature of such experience or connection and the number of years it covers. 6. What position each such official and clerk, who has had no practical experience in or direct connection with the fishing industry, filled or what duties he performed on first becoming attached to the Fisheries Branch. 7. Present duties and responsibilities of each such official or clerk. Presented May 10, 1920. Mr. Duff *Not printed.*
157. Return to an Order of the House of the 3rd May, 1920, for a copy of all correspondence, telegrams, and other documents exchanged between Dr. L. W. McNutt, Vancouver, B. C., and the Department of Soldiers' Civil Re-establishment, Sir Robert Borden and the Director of Medical Services of the Soldiers' Civil Re-establishment, with reference to claim for \$2,590.72 by the said Dr. McNutt against the above mentioned department, and also with reference to the resignation or dismissal of the said Dr. McNutt from the department in question. Presented May 11, 1920. Mr. Power. *Not printed.*
158. Return to an Order of the House of the 17th March, 1920, for a Return showing:—1. Number of employees in the inside service of the Labour Department. 2. How many are males. 3. How many are females. 4. How many males are French. 5. How many females are French. 6. How many are Protestants. 7. How many females are Protestants. Presented May 11, 1920. Mr. Hoeken *Not printed.*
158. Return to an Order of the House of the 17th March, 1920, for a Return showing:—1. Number of employees in the inside service of the Post Office Department. 2. How many are males. 3. How many are females. 4. How many males are French. 5. How many females are French. 6. How many males are Protestants. 7. How many females are Protestants. Presented May 11, 1920. Mr. Hoeken *Not printed.*
158. Return to an Order of the House of the 17th March, 1920, for a Return showing:—1. Number of employees in the inside service of the Secretary of State Department, including the Printing Bureau. 2. How many are males. 3. How many are females. 4. How many males are French. 5. How many females are French. 6. How many males are Protestants. 7. How many females are Protestants. Presented May 11, 1920. Mr. Hoeken *Not printed.*
158. Return to an Order of the House of the 12th April, 1920, for a Return showing:—1. Number of persons employed by the Civil Service Commission. 2. How many are males. 3. How many are females. 4. How many males are French. 5. How many females are French. 6. How many males are Protestants. 7. How many females are Protestants. Presented May 11, 1920. Mr. Hoeken *Not printed.*
158. Return to an Order of the House of the 17th March, 1920, for a Return showing:—1. Number of employees in the inside service of the Department of Interior. 2. How many are males. 3. How many are females. 4. How many males are French. 5. How many females are French. 6. How many males are Protestants. 7. How many females are Protestants. Presented May 11, 1920. Mr. Hoeken *Not printed.*
158. Return to an Order of the House of the 17th March, 1920, for a Return showing:—1. Number of employees in the inside service of the Marine and Fisheries Department. 2. How many are males. 3. How many are females. 4. How many males are French. 5. How many females are French. 6. How many males are Protestants. 7. How many females are Protestants. Presented May 11, 1920. Mr. Hoeken *Not printed.*

## CONTENTS OF VOLUME 10—Continued.

- 158f. Return to an Order of the House of the 22nd March, 1920, for a Return showing:—1. Number of employees in the inside service of the Finance Department including the Insurance Branch. 2. How many are males. 3. How many are females. 4. How many males are French. 5. How many females are French. 6. How many males are Protestants. 7. How many females are Protestants. What institutions are at present under the jurisdiction and management of the Department of Soldiers' Civil Re-establishment. 2. Number of patients in each institution. 3. Number of employees in each institution. 4. Cost per year of each institution. Presented May 12, 1920. Mr. Pardee *Not printed.*
160. Fifth Annual Report of the Board of Directors of the Canadian Northern Railway System, for the year ended December 31, 1919. Presented by Hon. Mr. Reid, May 12, 1920. *Printed for sessional papers only.*
161. First Annual Report of the Board of Directors of Canadian Government Merchant Marine, Limited. Presented by Hon. Mr. Reid, May 12, 1920. *Printed for sessional papers only.*
162. Return to an Order of the House of the 12th May, 1920, for a Return showing:—1. Sales of military and other supplies made by the War Purchasing Commission in each of the years 1917, 1918 and 1919, and amount of money obtained for these supplies in each of the above years. 2. Whether these supplies were sold by tender, by advertisement, or at public auction. 3. How military supplies, including rugs, furniture, etc., at Camp Borden were sold, who the purchasers were and what prices were received for the various articles. Presented May 14, 1920. Mr. Ross *Not printed.*
163. Return to an Order of the House of the 19th April, 1920, for a copy of all papers, letters, correspondence between the Department of Justice or any of its officers and the Civil Service Commission or any of its members with reference to the promotion of the Secretary to the Deputy Minister of Justice in 1919 and 1920. Presented May 14, 1920. Mr. Cabill *Not printed.*
164. Return to an Order of the House of the 24th March, 1920, for a copy of all correspondence and telegrams between the Dominion Government and the Alberta Government relating to irrigation development in Alberta, and more particularly to Lethbridge Northern Irrigation District. Presented May 17, 1920. Mr. Buchanan *Not printed.*
165. Return to an Order of the House of the 5th May, 1920, for a Return showing the names of all persons who have passed the Civil Service examinations from the province of Prince Edward Island in 1917 and 1919, showing: (a) the grade for which they passed; (b) the number of marks made by each; (c) those who are returned soldiers; (d) those who have received an appointment, with the name of their position. Presented May 17, 1920. Mr. Sinclair (P.E.I.) *Not printed.*
166. Return to an Order of the House of the 12th April, 1920, for a Return showing:—1. Number of Civil Service Investigating Commissions appointed since the 1st of January, A. D. 1915. 2. On what respective dates said Commissions were appointed, what number of Commissioners comprised each Board, their names and their home addresses. 3. How long each Board was engaged on such inquiry and how much was paid to each. 4. Whether there is any Board or any Member of a past or present Board now engaged in connection with the Civil Service inquiry or classification of the Civil Service, other than the regular Civil Service Commission of which Honourable Doctor Roche is the Chairman. 5. What amount or amounts were paid by the Government to the Civil Service Classification Commissioners during the time from 1st January, 1916, to and including the 15th of March, A. D. 1920, what amounts were paid to each of the said Classification Commissioners and on what dates. Presented May 17, 1920. Mr. McKenzie *Not printed.*
167. Return to an Order of the House of the 17th May, 1920, for a Return showing:—1. Number of married women whose husbands did not serve in the Canadian Expeditionary Force who are in the pay of various Government departments at Ottawa. 2. Whether it is a fact that the Department of Immigration has in its employ a lady at a salary of \$300 per month. 3. Whether this lady is the wife or mother of a returned soldier, and whether any effort was made at the time of her employment to secure the services of a war widow or dependent. 4. Whether this lady's husband is in the employ of the Government or of one of the provincial governments. 5. Whether it is a fact that the daughters of several departmental heads are employed by their fathers in Government service and that in such cases these young ladies hold positions which could be well filled with men who have been trained by the Department of Soldiers' Civil Re-establishment for the Civil Service but are unable to secure appointments. Presented May 19, 1920. Mr. Andrews *Not printed.*
168. Copy of Order in Council, P.C. 1595, dated 31st July, 1919; Appointment of Victory Loan Special Committee in connection with the stabilizing of the Victory Loan of 1917. Presented by Sir George Foster, May 20, 1920. *Not printed.*
169. Reports submitted by the Officer in charge of the Canadian War Records Office, London, England, to the Right Honourable Sir Robert L. Borden, G.C.M.G., M.P., Prime Minister of Canada; and to the Honourable Sir Edward Kemp, K.C.M.G., M.P., Minister, Overseas Military Forces of Canada, 1916-1919, with which is included a Report of the Executive Committee of the Canadian War Memorials Fund. Presented by Sir Robert Borden, May 20, 1920. *Not printed.*
170. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of Indian Affairs in Ottawa. 2. Their names and salaries. Presented May 21, 1920. Mr. Hocken *Not printed.*
- 170a. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of Labour in Ottawa. 2. Their names and salaries. Presented May 21, 1920. Mr. Hocken *Not printed.*

CONTENTS OF VOLUME 10 *Continued.*

170. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of Mines in Ottawa. 2. Their names and salaries. Presented May 31, 1920. Mr. Hoeken. *Not printed.*
- 170*g*. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of Naval Service in Ottawa. 2. Their names and salaries. Presented May 31, 1920. Mr. Hoeken. *Not printed.*
- 170*h*. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of employees in the Department of Justice in Ottawa. 2. Their names and salaries. Presented May 31, 1920. Mr. Hoeken. *Not printed.*
170. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of the Interior in Ottawa. 2. Their names and salaries. Presented June 2, 1920. Mr. Hoeken. *Not printed.*
170. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of Railways and Canals in Ottawa. 2. Their names and salaries. Presented June 8, 1920. Mr. Hoeken. *Not printed.*
- 170*k*. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of Public Works in Ottawa. 2. Their names and salaries. Presented June 10, 1920. Mr. Hoeken. *Not printed.*
- 170*l*. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of Soldiers' Civil Re-establishment in Ottawa. 2. Their names and salaries. Presented June 14, 1920. Mr. Hoeken. *Not printed.*
- 170*m*. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of Public Printing. 2. Their names and salaries. Presented June 17, 1920. Mr. Hoeken. *Not printed.*
- 170*n*. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of persons employed in the Department of Public Health. 2. Their names and salaries. Presented June 17, 1920. Mr. Hoeken. *Not printed.*
- 170*o*. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Number of employees in the Post Office Department in Ottawa. 2. Their names and salaries. Presented June 18, 1920. Mr. Hoeken. *Not printed.*
171. Also.—Return to an Order of the House of the 5th May, 1920, for a copy of a letter signed by twenty-two Senators and Members of the House of Commons representing the Provinces of Alberta, Saskatchewan and Manitoba, addressed to Sir Robert L. Borden, Prime Minister of Canada, dated September, 1919, recommending the shipment of grain by rail via Quebec; also a copy of the answer to such letter as well as the letters sent by J. T. Ross, Esq., President of the Quebec Board of Trade, to the Minister of Railways and Canals during the months of January and February, 1920, concerning export of wheat via Quebec, and of the letters of the Minister of Railways and Canals in answer thereto. Presented May 21, 1920. Mr. Lapointe. *Not printed.*
172. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Who the publishers are of the *Montreal Gazette*. 2. Amounts paid to the Montreal Gazette Publishing Company for each of the last fiscal years by the Dominion Government for (a) advertising, and (b) job printing. Presented May 21, 1920. Mr. Edwards. *Not printed.*
173. Return to an Order of the House of the 7th April, 1920, for a copy of all correspondence, letters and petitions received from the citizens of the Saguenay district and all others in connection with a subsidy from the Department of Trade and Commerce in order to obtain the services of a steamboat ferry between Ste. Catherine and Tadoussac. Presented May 21, 1920. Mr. Savard. *Not printed.*
174. Return to an Order of the House of the 19th March, 1919, for a return showing the names and post office addresses of all postmasters appointed in the Province of Nova Scotia since June 1, 1917, along with a copy of all correspondence with the Post Office Department or with the Civil Service Commission relating to such appointments. Presented May 26, 1920. Mr. Sinclair (Antigonish). *Not printed.*
175. Return to an Order of the House of the 3rd May, 1920, for a copy of the mortgage deeds for the twenty-five and the thirty-five million dollars granted by the Government of Canada to the Canadian Northern Railway Company, in 1918 and 1919. Presented May 26, 1920. Mr. Papineau. *Not printed.*
176. Return to an Order of the Senate dated the 4th instant, for a Return showing all correspondence that may have taken place with the British Admiralty, and with the Naval Mission to India and the Dominion, 1919-20, and also a list of shareholders, officers and directors of the Imperial Oil Company. The Senate. *Not printed.*
177. Return to an Order of the Senate dated the 5th instant, for a Return of copies of contracts between any Department or Departments of the Government and the owners of the steamship *Lady Evelyn*, in respect to the carriage of mails, passengers and freight between Pictou, Souris, and the Magdalen Islands; and copies of schedules of rates for such service, if such schedules are in the possession of the Government. The Senate. *Not printed.*

## CONTENTS OF VOLUME 10—Continued.

178. Return of an Order of the House of the 10th May, 1920, for a Return showing:—1. Whether inspectors in charge of terminal elevators, under the Board of Grain Commissioners, have full authority to inspect grain, as provided for in the Canada Grain Act. 2. If not, why not. 3. If so, whether the inspectors issue the requisite inspection certificates, with their signatures, or whether they so as to make of such inspection. 4. Whether the Chief Inspector or his immediate assistant, in charge of terminal elevators, has authority to change such inspection, without consent of the inspector directly in charge of a terminal elevator. 5. If so, whether this practice is provided for in the Canada Grain Act. 6. Whether inspection certificates, either inward or outward, are signed in blank by an officer under the Board of Grain Commissioners, and then filled in afterwards by a clerk. 7. Whether Western Inspection Certificates are signed in blank by the Chief Inspector or one of his officers, and then filled in by an officer in the Eastern Inspection District. 8. Whether the inward and outward inspection at terminal elevators is identically the same. 9. Whether the Canada Grain Act provides for the inspection of grain into terminal elevators, from steamers and barges. 10. If so, whether the inward or outward inspection governs. 11. How much grain the Government elevator at Port Arthur, has handled from September 1, 1919, to May 1, 1920. 12. How much grain the Government elevator at Port Arthur has handled during the following crop years: 1913-14, 1914-15, 1915-16, 1916-17, 1917-18, 1918-19. 13. Has not been handled in handling grain in the Government elevator, Port Arthur, for the above crop years, and for the period, September 1, 1919, to May 1, 1920. 14. Whether the above cost includes any provision for interest on investment and management. 15. Revenue per bushel for the above period: (a) including as revenue, money derived from the sale of overages, screenings and scalpins; (b) excluding as revenue, money derived from the sale of overages, screenings and scalpins. 16. Number of employes engaged in the above elevator during the above periods. 17. Name of the senior officer or manager who superintended the operations of the Government elevator under the Department of Trade and Commerce, for the above periods. 18. Whether all the Government elevators carry insurance on grain stored thereon, in accordance with law. 19. If not, why the discrimination against the other (commonly owned) elevators, and on whose authority the law is broken. 20. Section 95, subsection 1, of the Canada Grain Act provides for the imposition of overages over one-quarter of one per cent to the Government. Whether the Board of Grain Commissioners are keeping strict account of all grain sold into and out of the terminal elevators, including screenings and scalpins, so as to arrive at the above figures. 21. Whether the Registration Department, under the Board of Grain Commissioners, has full information available showing the gross weight in and gross weight out of terminal elevators. 22. Change made by the Board of Grain Commissioners in the wording of the outward weight certificates. 23. When the change was made. 24. Whether the weight certificate, as worded, was considered faulty up to the time of the change. 25. If not, why the change in the wording was made. 26. Whether the Canada Wheat Board has an officer at Fort William, whose duty it is to check the grades given by the inspection department under the Department of Trade and Commerce, on all grains shipped for and on account of the Canada Wheat Board. 27. If so, how many officers are engaged in this office, their names and salaries. 28. If so, what the necessity is of two Government officials doing the one task. 29. If so, whether the expenses incidental to this office are deducted from the money which ought rightly to be given to the farmers, for the participation certificates issued. 30. Whether the Canada Wheat Board appoints the inspector certificates issued by the Department of Trade and Commerce, without reservation. 31. Whether the Canada Wheat Board always avails itself of the highest market for all wheat sold for and on account of the producers. 32. Since the Government has taken over the control of the wheat business, whether this has had a tendency to reduce the work of the Board of Grain Commissioners. 33. If so, whether the number of employes under the Board of Grain Commissioners have been reduced, for the purposes of economical administration. 34. Whether the administration of the Canada Grain Act is self-sustaining. 35. If not, how the deficits are made up from year to year and on whose authority. 36. Salaries paid to the secretary of the Board of Grain Commissioners and the Secretary of the Canada Wheat Board. 37. Whether the public terminal elevators at Fort William, or Port Arthur purchase and sell grain from time to time, contrary to the Canada Grain Act. 38. If so, on whose authority. 39. Section 48 of the Canada Grain Act provides for the fixing of grades other than statutory grades, by the Grain Standards Board. Whether this Board has fixed the composition of grades of (a) screenings, (b) scalpins. 40. If not, why not. 41. If not, who has fixed the composition and grades up to the present time, and on what authority. 42. If fixed, what they are. 43. Whether the original dock bags taken from the grain are returned to the producer or the buyer of the warehouse receipt on which the specific parcel. 44. If not, why not. 45. How long the Government, through the Department of Agriculture, has handled standard stock food for terminal elevators. 46. Whether the venture has been profitable. 47. Surplus or deficit for each year. 48. Price paid to the terminal elevators for the standard stock food basis for Fort William. 49. Price received by the Government for the same food on the same basis. Presented May 27, 1920. Mr. Stevens. *Printed for sessional papers only.*
179. Memorandum No. 8, respecting work of the Department of Militia and Defence—European War—from November 1, 1918, to October 31, 1919. Presented by Hon. Mr. Githrie, May 28, 1920. *Not printed.*
180. Return to an Order of the House of the 12th May, 1920, for a Return showing:—1. Whether the Government operations at the Dog Fish Reduction Works at Clark's Harbour, Nova Scotia, have been discontinued. 2. If so, what disposition has been made of the property. 3. Total Government disbursements including the original cost and loss in operation. 4. On whose report or recommendation the operation was abandoned. 5. Recommendation of the authority advising abandonment. 6. Whether E. B. Fielding, of the Honorary Advisory Council for Scientific and Industrial Research, authorized the report of the chairman on fish waste in Canada as contained on page 33 of the report of the Administrative Chairman of the Honorary Advisory Council for Scientific and Industrial Research, for the year ending March 31, 1919. 7. Whether Mr. Fielding reported with regard to the above-mentioned plant as follows: "At Clark's Harbour I inspected the Government Dog Fish Reduction plant, which though very badly cared for appeared to be in working order, and well worth, in my opinion, retaining for the purpose of the manufacture of fertilizer, though quite unsuitable for the manufacture of food." 8. Consideration given by the Government to Mr. Fielding's report. Presented May 28, 1920. Mr. McCurdy. *Not printed.*
181. Return to an Order of the House of the 12th May, 1920, for a return showing the total amounts paid for advertisements or newspaper articles relating to voluntary enlistment before the Military Service Act of 1917 was in force: (a) to English newspapers in Canada and United States, (b) to French newspapers in Canada and United States; (c) to English newspapers in the province of Quebec, (d) to French newspapers in the province of Quebec. Presented May 28, 1920. Mr. Archambault. *Not printed.*
182. Return to an Order of the House of the 15th March, 1920, for a Return showing—How many of the 22,954 temporary appointments made by the Board of Civil Service Commissioners since the armistice are at present on the pay rolls of the various departments of the Government. Presented May 28, 1920. Mr. Sinclair (Antigonish). *Not printed.*
183. Return to an Order of the House of the 3rd May, 1920, for a Return showing:—1. How many generals belonging to the permanent force have had to give up their rank during the last six months. 2. How many generals have been promoted since the armistice, and the names of those who are still in the service. 3. How many officers have

## CONTENTS OF VOLUME 10—Continued.

- been promoted brigadier general since the armistice, their names, how they are employed, and whether it is the intention to retain them in that rank. 4. How many officers of the permanent force have been pensioned, their names and the amount of pension. Presented May 28, 1920. Mr. Bureau *Not printed.*
184. Final report of the work of Canadian Munition Resources Commission, from November, 1915, to March, 1919, inclusive. Presented by Sir Robert Borden, May 31, 1920. *Not printed.*
184. Copy of Order in Council, P.C. 1192, dated the 29th May, 1920, Dissolving the Canadian Munitions Resources Commission. Presented by Sir Robert Borden, May 31, 1920. *Not printed.*
185. Return to an Order of the House of the 26th April, 1920, for a copy of all correspondence between the Government or any member thereof and the Canadian Press, Limited, and the Canadian Associated Press, with regard to the establishment of an Imperial news service. Presented May 31, 1920. Mr. Robb *Not printed.*
186. Return to an Order of the House of 3rd May, 1920, for a copy of all correspondence, letters, petitions or any other documents relative to the appointment of the Deputy Postmaster at Edmonton, Alberta. Presented May 31, 1920. Mr. Mackie (Edmonton.) *Not printed.*
187. Return to an Order of the House of 31st March, 1920, for a copy of all correspondence, letters, telegrams, reports by detectives and others, and every document relating to the theft of Fifty Thousand dollars from the post office in the City of Edmonton, and to George Armstrong, Postmaster of the said post office, as well as to all employees in the said post office so far as all these may relate to the theft of Fifty Thousand dollars. Presented May 31, 1920. Mr. Mackie (Edmonton.) *Not printed.*
188. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Names and respective salaries of the employees of the Parliamentary Library. 2. How many are graduates of any college in Arts or Library Science. 3. Whether it is the intention of the Government to make any more appointments to the said Library of persons who have not taken a library science course in some recognized college. Presented May 31, 1920. Mr. Wigmore *Not printed.*
189. Return to an Order of the House of the 17th May, 1920, for a Return showing:—1. Whether the steamship *Metanona* sailed from Liverpool carrying soldiers and their families on or about the eighth day of February, A.D. 1919. 2. Complaints made to the Militia Department or any other department of the Government as to the condition of said steamer at time of sailing and during said voyage. 3. Complaints made to the Government or any department thereof as to the treatment accorded to said soldiers, their wives or families during said voyage. 4. Whether a delegation from the City of St. John appeared before a committee of the Cabinet on or about the 27th day of February, 1919, protesting against alleged ill treatment of said soldiers and their families during the said voyage. 5. If so, who comprised said delegation and what members of the Government acted on said Cabinet committee. 6. Whether the Government took any action as a result of said conference. If so, what action, and the result of same. 7. Whether said delegation filed affidavits or solemn declarations of passengers as to the condition of the steamer and treatment accorded said passengers during said voyage. 8. If so, whether the Government held an investigation concerning said complaints. 9. Result of such investigation. Presented June 2, 1920. Mr. Copp *Not printed.*
190. Return to an Order of the House of the 19th May, 1920, for a Return showing:—1. Total amount of sick mariners' dues collected from shipping entering Canadian ports for each of the years 1912, 1913, 1914, 1915, 1916, 1917, 1918 and 1919. 2. Amount expended by the Government in assistance to sick or distressed mariners during each of said years. 3. Number of officials of the Marine Department in Ottawa engaged exclusively on duties connected with collection, distribution and administration of sick mariners' dues. 4. Number of officials of Marine Department transferred to Health Department in connection with sick mariners' dues. Presented June 2, 1920. Mr. Stevens *Not printed.*
191. Return to an Order of the House of the 10th March, 1920, for an order showing:—1. Number of dismissals of Civil Servants made in the cities of the Dominion of Canada since the 1st of January, 1915. 2. Number of appointments which have taken place or have been made of Civil Servants in the cities of the Dominion of Canada since January, 1915. Presented June 2, 1920. Mr. Mackie (Edmonton.) *Not printed.*
192. Return to an Order of the House of the 10th March, 1920, for a return giving a list of the lawyers from the province of Quebec who acted: (a) as public representatives; (b) military representatives; (c) in the office of the registrars; and (d) in the office of the Central Appeal Judge, during the administration of the Military Service Act, showing the amount paid to each of the said lawyers. Presented June 4, 1920. Mr. Archambault *Not printed.*
193. Copies of Orders in Council, P.C. 1022, dated 8th May, 1920, P.C. 1065, dated 15th May, 1920, and P.C. 1280, dated 4th June, 1920, covering the Cost of Living Bonus for employees in the Civil Service of Canada for the fiscal year, 1920-21. Presented by Hon. Mr. Rowell, June 7, 1920. *Not printed.*
194. Copies of Orders in Council in respect to the Federal Housing Scheme, as follows:—P.C. 639, of March 27, 1920, authorizing an increase in the maximum amount of the loans which may be granted under Class (a) of the Federal project. P.C. 375, of February 29, 1919, approving the General Scheme of Housing of the Province of Ontario. P.C. 2201, of October 30, 1919, approving certain amendments to the British Columbia Housing Scheme, approved on May 1, 1919, P.C. 907. P.C. 1030, of May 19, 1920, approving certain amendments to the General Housing Scheme of the Province of Quebec. P.C. 1233, of May 31, 1920, approving the General Scheme of Housing of the Province of Saskatchewan. Presented by Hon. Mr. Rowell, June 7, 1920. *Not printed.*
195. Return to an Order of the House of the 5th May, 1920, for the production of copies of all letters, telegrams, papers and correspondence exchanged between the Department of Agriculture and others in reference to the establishment of a Demonstration Farm at Baie St. Paul, in the County of Charlevoix. Presented June 7, 1920. Mr. Casgrain. *Not printed.*
196. Return to an Order of the House of the 8th April, 1920, for a Return showing:—1. What is, or has been, the numerical strength of the staff of the Department of Public Works, by districts, throughout the Dominion of Canada since the 1st of January, 1915, to the 1st of January, 1920. 2. The names of the employees. 3. What salary is paid, or was, to each employee of the Department during this period. 4. Which of said employees could have been discharged since January, 1917. 5. How many employees in each district can now be dispensed with. 6. The expenditure in each of said districts during the entire period. Presented June 8, 1920. Mr. Mackie (Edmonton.) *Not printed.*

CONTENTS OF VOLUME 10—*Continued.*

196. Supplementary Return to an Order of the House of the 8th April, 1920, for a Return showing—1. What is, or has been, the numerical strength of the staff of the Department of Public Works, by districts, throughout the Dominion of Canada since the 1st of January, 1915, to the 1st of January, 1920. 2. The names of the employees. 3. What salary is paid, or was, to each employee of the Department during this period. 4. Which of said employees could have been discharged since January, 1917. 5. How many employees in each district can now be dispensed with. 6. The expenditure in each of said districts during the entire period. Presented June 17, 1920. Mr. Mackie (Edmonton). . . . . *Not printed.*
197. Return to an Order of the House of the 19th March, 1920, for a copy of all letters, telegrams, documents, petitions, reports, received by the Department of Railways and Canals and Canadian National Railways, and the correspondence exchanged between this Department and different persons and public bodies in reference to the curtailing of the railway service along the new line of the Quebec and Saguenay Railway between Quebec and Murray Bay since the 1st of November, 1919. Presented June 8, 1920. Mr. Casgrain . . . . . *Not printed.*
198. Return to an Order of the House of the 7th April, 1920, for a copy of all correspondence, letters and telegrams in connection with the granting of an allowance by the Post Office Department for a regular postal ferry service by motor yacht between Ste. Catherine and Tadoussac. Presented June 8, 1920. Mr. Savard . . . . . *Not printed.*
199. Return to an Order of the House of the 15th March, 1920, for a copy of all letters, petitions, telegrams and other documents relating to the retention in office, as a Fishery Overseer, of John A. Dillon, of Guysborough, N.S. Presented June 8, 1920. Mr. Sinclair (Antigonish) . . . . . *Not printed.*
200. Return to an Order of the House of the 12th April, 1920, for a copy of all documents, letters, telegrams and all other papers and correspondence exchanged between the Government or any department or commission thereof and the Government of the United States, the State of New York, the State of Vermont, or any other body, and a copy of any evidence given before any commission, referring to some or net fishing in Mississippi Bay. Presented June 8, 1920. Mr. Kay . . . . . *Not printed.*
201. Return to an Order of the House of the 5th May, 1920, for a Return showing amount of money spent by the Dominion Government since Confederation on improvements in the harbour of Halifax, St. John, Quebec, Montreal, Toronto, Hamilton, Port Arthur, Victoria and Vancouver. Presented June 8, 1920. Mr. Foster (York). . . . . *Not printed.*
202. Orders of the Director of Coal Operations—Nos. 1 to 144, inclusive. Presented by Hon. Mr. Meighen, June 8, 1920. . . . . *Not printed.*
203. Return to an Order of the House of the 22nd March, 1920, for a Return showing—1. Number of automobiles valued under \$1,000 imported into Canada in each of the years 1918 and 1919. 2. Number valued at between \$1,000 and \$2,000. 3. Number at a greater valuation than \$2,000. 4. Duty collected on these automobiles. 5. The duty collected on parts of automobiles imported during the years 1918 and 1919. 6. On what number of automobiles valued at less than \$1,000 excise duty was paid in the years 1918 and 1919. 7. On what number of automobiles valued at between \$1,000 and \$2,000 excise duty was paid in the same years. 8. On what number of automobiles valued at over \$2,000 excise duty was paid in the same years. 9. The amount of such excise duty. Presented June 9, 1920. Mr. Ross . . . . . *Not printed.*
204. Return to an Order of the House of the 5th May, 1920, for a copy of all papers, documents and letters in connection with Dr. Michel Fiset, of Quebec City, appointment by Order in Council, dated 18th April, 1914, as parcel post supervisor in Quebec City, with a salary of \$2,500 a year. Presented June 10, 1920. Mr. Iavigneux . . . . . *Not printed.*
205. First Annual Report of the Board of Commerce of Canada, dated 31st May, 1920; and also.—Copy of Order in Council, P.C. 1251, dated 1st June, 1920, submitting the above Report for His Excellency's information. Presented by Sir Robert Borden, June 10, 1920. . . . . *Not printed.*
206. Copy of Order in Council, P.C. 2529, dated December 18, 1919, regarding the distribution to the Provinces of the sum of \$200,000, which was placed at the disposal of the Department of Health for combatting venereal diseases. Presented by Hon. Mr. Rowell, June 11, 1920. . . . . *Not printed.*
207. Copy of Agreement between the Chief and Principal men of the Chippewas of Sarnia Band of Indians and His Majesty the King regarding the surrender of the Sarnia Indian Reserve to the Government of Canada, dated at Sarnia, Ont., 10th December, 1919. Presented by Hon. Mr. Meighen, June 14, 1920. . . . . *Not printed.*
208. Return showing—1. How many sittings were held by the Railway Commission to fix compensation for damages caused by the passing of the Canadian Northern through North Bay. 2. Who presided over the said sittings. 3. The awards made. 4. To whom they were paid. 5. The total cost of the said sittings. 6. The amount paid for counsel fees. 7. What amount was paid for witnesses. 8. To whom the amounts were paid. Presented June 15, 1920. Mr. McDonald . . . . . *Not printed.*
- 208a. Supplementary Return to an Order of the House of the 16th June, 1920, for a Return showing—1. How many sittings were held by the Railway Commission to fix compensation for damages caused by the passing of the Canadian Northern through North Bay. 2. Who presided over the said sittings. 3. The awards made. 4. To whom they were paid. 5. The total cost of the said sittings. 6. The amount paid for counsel fees. 7. What amount was paid for witnesses. 8. To whom the amounts were paid. Presented June 21, 1920. Mr. McDonald. . . . . *Not printed.*
209. Return to an Order of the House of 2nd June, 1920, for a copy of all papers, documents, telegrams and reports concerning the indemnity paid to the widow and children of J. L. A. Forbes, killed at Aston Junction, the 11th of September, 1918, while on duty as brakeman on the Government railways. Presented June 17, 1920. Mr. Bourassa . . . . . *Not printed.*
210. Partial Return to an Order of the House of 5th May, 1920, for the production of copies of all Rules of Court made by the different Superior Courts of Criminal Jurisdiction of Canada according to the provisions of Section 576 of the Criminal Code. Presented June 17, 1920. Mr. Casgrain . . . . . *Not printed.*

## PREFACE.

The Criminal Statistics of Canada are collected, compiled and published under authority of the Act respecting the Dominion Bureau of Statistics, 8-9 George V, Chapter 43.

The Introductory abstract of the present report has been written by Mr. Reginald E. Watts, Statistician, and the tables were compiled by Messrs. A. Bourret and O. Gravelle. No new tables have been introduced. Tables XIII and XIV, which appeared for the first time in the report of 1918, are repeated as they show a recapitulation of all classes of crime and sentences from the date of the first report, 1876, to the present time.

R. H. COATS,  
*Dominion Statistician.*

August, 1920.

# CRIMINAL STATISTICS OF CANADA, 1919

## INTRODUCTION.

Before dealing with the figures shown in the accompanying tables it will be of interest to take a brief retrospective glance at the trend of crime during the period in which these statistics have been published in Canada, viz., since 1876. Table XIII shows the number, ratio to population and percentage of convictions of offences grouped into several classes from 1876 to 1919. This table has been classified by offences not taking into consideration the method of court procedure, nor the technical distinction between "indictable" and "non-indictable" offences.

Taking convictions for all offences there was a very considerable increase in the number and in the ratio of population from 1876 down to the opening year of the war. During this period of thirty-nine years the number of convictions rose from 28,215, or 714 per 100,000 of the population to 183,035, or 2,369 per 100,000 population, which is an increase of 548 per cent in actual number, but, what is more remarkable, the ratio to population increased 232 per cent. It is further remarkable that this increase did not set in till the closing years of the last century, after which the figures went up rapidly till the breaking out of the war, which seemed to make the people realize that all efforts must be concentrated upon the suppression of the criminals beyond our shores. All in common were, for the time raised above petty self in the prosecution of the common cause, for criminality was abated and began immediately to decline. The absent population overseas was but 5 per cent of the total, yet by 1917 a diminution of 38 per cent in convictions is shown, these declining from 2,369 to 1,363 per 100,000 population. Then in 1918 when the mental strain was being relieved by the foreshadowed successful ending of the struggle, an increase in convictions again took place, the last two annual reports showing a progress almost as rapid as that just before the war.

The increase in convictions was not equally great in all parts of the country. In the provinces, including and west of Manitoba, the increase during the period 1900-14 was 804, and in the eastern provinces but 229 per cent. The increase in population for the same period was, West 235, and East 28 per cent. When the decrease in offences set in the West dropped more rapidly than the East. In 1916 the West had reduced its convictions by 58 per cent, whereas in the East the decline was but 24 per cent, but this decrease in the West is partially due to the receipt of incomplete returns from Saskatchewan and Alberta since the termination in 1916 of the services of the Royal North West Mounted Police in these provinces. The monthly reports of Criminal Statistics from that body were very much more complete than those received through the civil court officials. As an offset to that, the increase in the last two years has been greater in the East than in the West, being 13.5 and 9 per cent respectively.

With respect to origins of persons convicted of indictable offences, calculations reveal the following: According to the Census of 1911, the Canadian born were 78 per cent of the population, whereas the convictions of Canadian born show an average of only 59 per cent for the last ten years. Other British born in Canada amounted to 11 per cent, and the convictions to 15.5 per cent. Foreign

born made up 11 per cent and convictions 25.5 per cent. In the figures relating to convictions by birth places the number of "not given" are relatively apportioned.

In studying the trend of crime it is of particular moment to observe in what class of offences the increase is most marked, and it is gratifying to find that with respect to criminal cases proper the increase has been very slight. It is the minor class of offences that shows the greater increase.

Making use of ratios, the more accurate method of illustrating the subject, it is seen (Table XIII) that offences against the person have decreased almost steadily from 1876, when that class of crime was 17.6 per cent of the whole number of convictions and 125 per 100,000 of the population, to 1919 when the figures were 6.0 per cent and 88 per 100,000 population. Offences against property and other felonies of a criminal nature show an increase of from 11.3 per cent in 1876 to 12.1 per cent in 1919, and from 81 to 178 per 100,000 population. The criminal cases as a whole decreased from 28.9 to 18.1 per cent.

Of the minor offences the principal increase is in offences against Municipal Acts and by-laws, which, during that period, rose from 3.0 to 30.5 per cent of the total number of convictions.

Breaches of liquor laws show but little variation averaging between five and six per cent of the total convictions, but the ratio increased from 38 to 84 per 100,000 population. Drunkenness remained at a fairly constant figure, varying from 24 to 39 per cent until the last two years when it dropped to 17.1 and 18.6 per cent. Vagrancy and disorderly conduct varied little until just before the pre-war period, when the convictions for these offences nearly doubled only to diminish again with the general decline. Convictions for bawdy house-keeping and inmates thereof increased with certain variations from 1.9 to 4.3 per cent and from 13 to 63 per 100,000 population. Other minor offences in the main have increased a little. All the minor offences combined have increased from 71.1 to 81.9 per cent of the total convictions, and from 508 to 1,206 per 100,000 population during the whole period, reaching a higher figure during the high water period of 1913-14.

With regard to sentences the figures show a general tendency to greater leniency. Suspended sentences and those bound over to keep the peace have gradually increased from 1.6 per cent of the whole over during the forty-four years to over 17 per cent. On the other hand, terms of imprisonment in gaols and penitentiaries have decreased, whereas options of fine have varied only slightly.

The tables of this report are similar to those of former years embracing the two main divisions, indictable offences and summary convictions of non-indictable offences.

## PART I. INDICTABLE OFFENCES.

These are divided into six classes: Class I, offences against the person; Class II, offences against property with violence; Class III, offences against property without violence; Class IV, malicious offences against property; Class V, forgery and other offences against currency; Class VI, other offences not included in the preceding. The cases included in these classes were tried before the Courts of Assizes, King's Bench Supreme Court, and general sessions, according to the procedure in the different provinces; under the Acts respecting speedy trials, and under the Summary Trial's Act by police and other magistrates.

The number of persons who were brought to trial before the Superior Criminal Courts during the year ended September 30, 1919, was 1,155 as against 1,062 in 1918. Those who elected a speedy trial numbered 4,488 in 1919, and

## SESSIONAL PAPER No. 10d

3,795 in 1918. All others to the number of 17,378 in 1919, were tried before magistrates' courts under the Summary Trial's Act. For 1918 the figures were 16,890. The total number of indictable offences tried was 21,747 for 1918 and 23,021 for 1919. An increase of 1,274 over 1918.

The percentage of persons tried by jury has been on the whole gradually diminishing over a series of years. In 1891 the percentage of jury trials was 13, in 1900 it was 11, in 1910 it had dropped to 7, and in 1919 to 5 per cent. Speedy and summary trials correspondingly increased.

The convictions for indictable offences in 1919 numbered 18,396, or 1,026 more than in 1918. The percentages of acquittals to charges were: 1919, 20·09 per cent; 1918, 20·13 per cent; and 1917, 20·02 per cent. During the last ten years the percentage of acquittals has decreased from 25 to 20, which probably indicates greater care in investigating and laying charges.

In 1919, there were 4,564 acquittals, 10 cases in which "no Bill" was found by the grand jury, 11 cases in which the jury failed to agree upon a verdict, 7 cases of *nolle prosequi* or stay of proceedings, and 33 cases of detention for lunacy. In making computations these are grouped with acquittals.

The following table shows the number of charges, convictions and acquittals, and the percentages of acquittals by provinces:—

Provinces.	1918.				1919.			
	Number of charges.	Number of convictions.	Acquittals.		Number of charges.	Number of convictions.	Acquittals.	
			Number.	Per cent.			Number.	Per cent.
Prince Edward Island .....	42	37	5	11·90	32	31	1	3·12
Nova Scotia .....	990	717	273	27·58	1,059	767	292	27·67
New Brunswick .....	387	334	53	13·69	437	333	104	23·80
Quebec .....	4,631	3,747	884	19·09	4,823	3,920	903	18·74
Ontario .....	10,278	8,313	1,965	19·12	10,647	8,628	2,019	18·96
Manitoba .....	1,617	1,364	253	15·65	1,619	1,386	233	14·39
Saskatchewan .....	1,412	1,099	313	22·17	1,385	1,135	250	18·05
Alberta .....	1,237	889	348	28·13	1,480	1,040	440	29·73
British Columbia .....	1,138	859	279	24·52	1,532	1,151	381	24·87
Yukon .....	15	11	4	26·66	7	5	2	18·57
Canada .....	21,747	17,370	4,377	20·13	23,021	18,396	4,625	20·09

This table shows that the order in which the provinces stand with respect to the ratio of convictions to charges is thus: Prince Edward Island with 3·12 per cent of acquittals; Manitoba, Saskatchewan, Yukon, Quebec and Ontario, with acquittals ranging from 14·39 to 18·96 per cent; and New Brunswick, British Columbia, Nova Scotia and Alberta, ranging from 23·80 to 29·73 per cent.

With regard to criminality by provinces a computation of ratios for a period of five years reveals that Ontario stands highest with an average of 297 per 100,000 population, and Alberta second with 272. The latter province in 1915 showed the largest ratio of any province in any year with 464. Prince Edward Island and New Brunswick stand in the best position with an average of but 26 and 86 respectively, with Nova Scotia and Quebec next with 143 and 160. The ratio for the whole of Canada decreased from 260 per 100,000 population in 1915 to 189 in 1917, rising to 214 the next year and dropping again to 208 in 1919.

The following table shows by provinces the ratio per 100,000 population of convictions of indictable offences for five years 1915-19.

Provinces.	1915.	1916.	1917.	1918.	1919.	Average.
Prince Edward Island.....	17	15	35	39	33	26
Nova Scotia.....	188	126	113	139	148	143
New Brunswick.....	77	82	91	91	90	86
Quebec.....	141	174	151	164	168	160

Saskatchewan.....	336	271	168	154	152	214
Alberta.....	464	386	173	160	177	272
British Columbia.....	319	284	200	129	160	218
Yukon.....	317	235	258	130	59	200
Canada.....	260	235	189	214	208	221

According to urban and rural population the returns for 1919 show that 16,305 persons convicted of indictable offences represented themselves as residing in cities and towns, and 2,051 as living in rural districts. In 40 cases the residence was not given. The population of cities and towns of over 1,000 as given by the 1911 census was 3,009,896 or 41.8 per cent of the total population. The urban criminality, according to the figures above, for 1919 is 88 per cent. The increase in urban population since 1911 would probably reduce the difference slightly, but the figures show the cities and towns to be responsible for by far the greater percentage of detected crime.

By occupations the returns show that convictions for criminal offences among the agricultural class, which includes also miners, fishermen and lumbermen, decreased from 1,152 in 1918 to 966 in 1919, a decrease of 186, equal to 6.6 per cent of the whole body of convictions for 1918—compared with 5.6 per cent in 1919. Among the transportation and commercial class they increased from 1813 to 1963, being 10.4 and 10.7 per cent of the total convictions for the years 1918 and 1919. Among the domestic class they decreased from 1,866 or 10.7 per cent to 1,608 or 8.8 per cent of total convictions. Among the industrial class they increased from 1,214 or 7.0 per cent to 1,424 or 7.7 per cent. In the professional class convictions decreased from 359 or 2.0 per cent to 315 or 1.7 per cent. Among the labouring class they increased from 4,403 or 25.4 per cent to 5,232 or 28.4 per cent. Those without occupations and whose occupations were not recorded made up 27 per cent of total convictions for both years.

With regard to sex the returns show that of total convictions during 1919 those of males were 16,161, against 14,871 in 1918, an increase of 1,290; and those of females, 2,235, against 2,499 in 1918, a decrease of 264.

The following table shows convictions of females by provinces and the percentages to total convictions:—

Provinces.	1918.		1919.	
	Number of female convictions.	Percentage to total convictions.	Number of female convictions.	Percentage to total convictions.
Prince Edward Island.....	5	13.51	1	3.29
Nova Scotia.....	52	7.27	54	7.04
New Brunswick.....	29	8.68	21	6.31

Yukon.....				
Canada.....	2,499	14.39	2,235	12.15

## SESSIONAL PAPER No. 10d

The proportion of females convicted of indictable offences steadily decreased from 1884 till 1915. After that date an increase is shown as follows:—

Average from 1884 to 1891—8·60 per cent.

“	1892 to 1895—7·20	“
“	1896 to 1900—6·12	“
“	1901 to 1905—5·72	“
“	1906 to 1910—4·82	“
“	1911 to 1915—4·71	“
	1916—6·52	“
	1917—7·27	“
	1918—9·28	“
	1919—8·24	“

Adding bawdy house-keepers and inmates thereof that were transferred from the summary convictions to the indictable offences in accordance with changes in the criminal code in 1916, the figures for the last four years would be 19·17, 15·89, 14·39 and 12·15 per cent instead of those shown above.

With respect to birth places, the returns have been fairly uniform for a number of years. In 1919 those of Canadian birth contributed 55·21 per cent of the total convictions of indictable offences. Those born in England were 7·22, in Ireland 1·55, in Scotland 2·07, in other British Possessions 0·50, in United States 5·38 and in other foreign countries 15·11 per cent. Taking the ten years period ending 1919, there was an increase in crime till 1914, then a decrease set in till 1918, then an increase again. The return by birth places is shown in the following table:—

BIRTH PLACES OF PERSONS CONVICTED OF INDICTABLE OFFENCES FROM 1910 TO 1919, SHOWING THE GROWTH AND DIMINUTION DURING THREE PERIODS.

Year.	Canada.	England.	Ireland.	Scotland.	Other British Possessions.	United States.	Other Foreign.
1910.....	6,276	925	258	257	49	558	1,315
1911.....	6,376	1,246	302	365	16	734	1,547
1912.....	6,713	1,319	404	451	101	910	2,065
1913.....	7,619	1,961	451	571	87	1,212	2,674
1914.....	9,162	1,872	472	675	151	1,015	3,516
Increase from 1910 to 1914	46·0 p.c.	102·4 p.c.	83·0 p.c.	162·6 p.c.	208·2 p.c.	81·9 p.c.	167·4 p.c.
1915.....	9,172	1,482	371	473	132	980	3,741
1916.....	7,428	952	260	321	57	916	2,697
1917.....	7,097	780	180	242	95	845	2,228
Decrease from 1914 to 1917	22·5 p.c.	58·4 p.c.	61·9 p.c.	64·1 p.c.	37·1 p.c.	16·7 p.c.	36·6 p.c.
1918.....	9,322	1,177	285	381	152	947	3,161
1919.....	10,157	1,329	193	381	90	990	2,780
Increase from 1917 to 1919	43·1 p.c.	70·4 p.c.	7·2 p.c.	57·4 p.c.	(decrease) 5·2 p.c.	17·2 p.c.	24·8 p.c.

The variations in the total number of convictions for the three periods is (1) an increase of 83·23 per cent; (2) a decrease of 27·42 per cent; (3) an increase of 18·11 per cent.

The records with regard to religious denominations are as follows:—

CONVICTIONS OF INDICTABLE OFFENCES BY RELIGIOUS DENOMINATIONS.

Denominations.	Number of convictions.		Increase or Decrease.	Percentage to total convictions 1919.	Percentage of denominations to total population 1911.
	1918.	1919.			
Anglicans .....	1,910	2,186	+ 276	12.0	14.5
Methodists .....	1,368	1,589	+ 221	8.6	15.0
Presbyterians .....	1,397	1,432	+ 35	7.8	15.5
Baptists .....	385	383	— 2	2.1	5.3
Roman Catholics .....	6,959	6,896	— 63	37.3	39.3
Other Denominations .....	3,124	3,121	— 3	17.0	10.0
Not specified.....	2,227	2,789	+ 562	15.2	0.4

A study of the last two columns shows that the percentage of convictions is less than the percentage of population with respect to all the specified denominations; but in the case of "other denominations" and the "not specified" the percentage of convictions is greater than that of population, which indicates that the standard of morals is lower among the class who have no religious connection.

The returns of the educational status of those convicted of indictable offences show that in 1918 there were 14,234 of elementary or better education, 1,084 illiterates, and in 1919 there were 14,690 and 843 respectively, an increase of 456 among the educated and a decrease of 281 among the uneducated.

USE OF LIQUORS, PERCENTAGE TO TOTAL CONVICTIONS.

Period.	Moderate.	Immoderate.	Not Stated.
	Per cent.	Per cent.	Per cent.
1887-1890 .....	44.6	39.2	16.2
1891-1894 .....	53.8	40.1	6.1
1895-1898 .....	54.5	34.3	11.2
1899-1902 .....	60.1	29.8	10.2
1903-1906 .....	58.2	26.7	15.1
1907-1910 .....	55.4	22.4	22.2
1911-1914 .....	50.4	17.9	31.7
1915 .....	35.9	11.4	52.7
1916 .....	38.5	9.5	52.0
1917 .....	34.6	8.5	56.9
1918 .....	67.1	7.8	25.1
1919 .....	58.4	6.9	34.7

The figures show that the moderate drinkers, though varying their habits from time to time, have not changed much in the main. The immoderate drinking class has decreased from 40 per cent of the total convictions to under 7 per cent during the period, whereas the moderate and unknown classes have varied considerably, showing an increase. The conclusions to be drawn from the foregoing calculations as shown are that inebriety has little or no influence over criminality, that by far the greatest percentage of crime is committed by the moderate or non drinking class, or else the psychology of man is changing and fewer persons have the moral courage to own up to over indulgence.

First time criminals formed 82.2 per cent of the convictions in 1919. Those convicted a second time were 8.9 per cent and recidivists—those

## SESSIONAL PAPER No. 10d

convicted several times—were also 8·9 per cent of the total convictions. The figures for 1918 were almost the same, viz., 82·4, 8·9 and 8·7 per cent respectively.

With respect to conjugal condition, the greater percentage of crime has always been committed by the single portion of the population, the figures for 1919 being: single 60·2, married 24·3 and widowed 1·7 per cent of the convictions. For 1918 the figures stood: single 59·5, married 25·7 and widowed 1·5 per cent. These ratios are only very slightly different from those of twenty and thirty years ago.

## JUVENILE DELINQUENCY.

In analyzing this phase of the subject a serious condition is revealed, one which requires more than a cursory glance. The returns for the last three years show that more than 20 per cent of the indictable crimes have been committed by children under 16 years of age. Looking back the records show for the period 1884 to 1891 the average was 13·64 per cent, and in 1899 it was 16·38 per cent.

The following table shows the numbers of convictions and percentages of each sex from 1901 to 1919:—

JUVENILE OFFENDERS UNDER 16 YEARS OF AGE.

Year.	Total convictions, under 16 and over.	Number of Juveniles under 16 years of age.		Percentage to total convictions.	
		M.	F.	M.	F.
1901-1903 average	5,940	941	31	15·8	0·5
1904-1906 "	7,490	719	41	9·6	0·5
1907-1910 "	10,715	1,149	44	10·7	0·4
1911-1913 "	15,504	1,802	75	11·6	0·5
1914	21,438	2,542	86	11·9	0·4
1915	20,625	2,972	78	14·4	0·4
1916	19,160	3,055	102	15·9	0·5
1917	15,559	3,481	125	22·4	0·8
1918	17,370	3,927	177	22·6	1·0
1919	18,396	3,728	148	20·3	0·8

The increase of boy criminals as shown above has been almost 300 per cent in the past 20 years. The greatest advance in the figures is shown to be from 1914 to 1919, during which time the growth has been from 11·9 to 20·3 per cent of all convictions.

The crimes of which the 3,876 juveniles of under 16 years of age were convicted in 1919 are shown thus.

For offences against the person there were 118 charges, convictions numbering 85 and acquittals 33, as follows:—

Crimes.	Convictions.	Acquittals.
Aggravated assault	28	14
Common assault	30	14
Indecent assault	10	3
Carnal knowledge	4	
Endangering life of railway passengers	5	2
Shooting, stabbing and wounding	7	
Manslaughter	1	
Total	85	33

10 GEORGE V. A. 1920

For offences against property with violence there were 631 convictions and 28 acquittals divided as follows:—

Crimes.	Convictions.	Acquittals.
Burglary, house and shop breaking.....	611	25
Robbery.....		1
Highway robbery.....	1	1
Breaking into freight cars.....	19	2
Total.....	631	28

Offences against property without violence were as follows:—

Crimes.	Convictions.	Acquittals.
Theft.....	2,837	182
Horse and cattle stealing.....	10	
Theft of mail.....	6	
Theft from the person.....	5	1
Receiving stolen goods.....	74	11
False pretences.....	12	
Fraud.....	5	
Total.....	2,949	194

The disposition of cases of malicious injury to property was as follows:—

Crimes.	Convictions.	Acquittals.
Malicious injury to property.....	144	21
Arson.....	14	2
Total.....	158	23
Forgery and uttering forged documents.....	8	

Various other offences:—

Crimes.	Convictions.	Acquittals.
Carrying unlawful weapons.....	11	1
Prison breach and escape from custody.....	11	1
Sodomy.....	4	
Indecency and offences against public morals.....	15	1
Other misdemeanors.....	3	4
Total.....	45	7
Grand total.....	3,876	285

## SESSIONAL PAPER No. 10d

The crime of stealing, whether it be under the classification of burglary, robbery or common larceny, is shown to be by far the most prevalent, being 92 per cent of all the convictions. Stealing is the most natural offence for a youth to commit. The innate desire of the child before it has attained any other faculty is to grasp something and hold it. This desire is more often indulged than curbed and thus that trait of character is developed to a greater degree than that of judgment. What other result can be expected than that the uncontrolled habit should produce the thief? In the reports of 1901-2 and 3, when the growth of juvenile crime was quite marked, the attention of the Press, judges and juries, preachers, teachers and parents was drawn to the matter and they were urged to study the facts carefully with a view to take intelligent action to diminish the evil. The same warning applies now with even greater force.

The sentences imposed upon juvenile offenders in 1919 were: option of a fine, 254; to under one year in jail, 21; to various terms in penitentiaries, 7 (1, fifteen years for manslaughter; 1, five years for aggravated assault; 1, three years for sodomy; 2, four years for theft; 2, two years for burglary); to reformatories for various periods 541, and to be whipped 16. The remainder, 3,036 in number, were let off with a warning, bound to keep the peace or had their sentences suspended. By religion 1,738 were returned as Roman Catholics and 2,138, Protestants of different denominations.

Of the 3,876 juveniles convicted of indictable offences in 1919, 2,711 were dealt with in juvenile courts in the following cities: Montreal, 863; Toronto, 989; Winnipeg, 457; Vancouver, 131; Ottawa, 120; Halifax, 65; Victoria, 31; Brandon, 36; Brantford, 19.

In addition to the indictable offences hitherto discussed there were almost an equal number of youths convicted of minor offences by the Juvenile Courts in the cities above mentioned. These are shown below.

YOUNG DELINQUENTS CONVICTED OF MINOR OFFENCES BY THE JUVENILE COURTS, 1919.

Offences.	Montreal.	Toronto.	Winnipeg.	Vancouver.	Ottawa.	Halifax.	Victoria.	Brandon.	Brantford.	Total.
Assault .....		5			2	6				13

## INDICTABLE OFFENCES BY CLASSES.

## CLASS I.—OFFENCES AGAINST THE PERSON.

Offences.	1918.		1919.	
	Number of charges.	Number of convictions.	Number of charges.	Number of convictions.
Murder.....	50	20	79	28
Murder, attempt to commit .....	20	7	34	22
Manslaughter.....	49	21	62	32
Abortion and concealing birth of infants.....	35	20	10	8
Rape and other crimes against decency.....	498	285	516	311
Procuration.....	59	33	39	23
Bigamy.....	107	91	92	71
Shooting, stabbing and wounding.....	162	111	182	109
Assault on females.....	36	32	29	22
Aggravated assault.....	643	464	711	471
Assault on peace officers.....	368	340	554	503
Assault and battery.....	1,239	912	1,109	852
Refusing to support family.....	164	105	114	85
Various other offences against the person.....	138	88	153	77
Totals for Canada.....	3,568	2,529	3,684	2,614

The outstanding point in the above table is the increase in the number of murder, attempted murder and manslaughter cases. The number of murders for 1919 is the second highest record since the first publication of these statistics, there being 79 charges and 28 convictions, while 1915 was the peak year in this regard with 86 charges and 34 convictions. The average number of convictions of murder for the last forty-four years is 12, 1906 being the banner year with only 2 convictions. The increase of convictions for offences against the person in 1919 over 1918 is a trifle over 3 per cent.

## CLASS II.—OFFENCES AGAINST PROPERTY WITH VIOLENCE.

Offences.	1918.		1919.	
	Number of charges.	Number of convictions.	Number of charges.	Number of convictions.
Burglary, house, warehouse and shophreaking.....	2,162	1,932	2,717	2,420
Robbery and demanding with menaces.....	183	100	348	164
Highway robbery.....	20	17	27	22
Totals for Canada.....	2,365	2,049	3,092	2,606

The charges in this class increased 30·8 and the convictions 22·3 per cent.

## SESSIONAL PAPER No. 10d

## CLASS III.—OFFENCES AGAINST PROPERTY WITHOUT VIOLENCE.

Offences.	1918.		1919.	
	Number of charges.	Number of convictions.	Number of charges.	Number of convictions.
Bringing stolen goods into Canada.....	5	4	12	12
Embezzlement.....	7	6	11	7
False pretences.....	600	421	579	406
Feloniously receiving stolen goods.....	487	323	536	373
Fraud and conspiracy to defraud.....	529	360	499	366
Horse, cattle and sheep stealing.....	88	64	90	68
Theft.....	10,275	8,404	10,613	8,651
Theft of post letters.....	21	20	32	28
Totals for Canada.....	12,012	9,602	12,372	9,911

Of this class theft forms 90 per cent, and taking burglary, robbery and theft under all heads in the preceding two classes, it is seen that this class of crime makes up 60 per cent of all the indictable offences, which proportion is representative of that of former years.

## CLASS IV.—MALICIOUS OFFENCES AGAINST PROPERTY.

Offences.	1918.		1919.	
	Number of charges.	Number of convictions.	Number of charges.	Number of convictions.
Arson.....	74	33	73	43
Malicious injury to horses, cattle and other damage to property.....	301	216	450	327
Totals for Canada.....	375	249	523	370

This class shows an increase of 39.5 per cent with respect to charges and 48.6 per cent of convictions.

## CLASS V.—FORGERY AND OTHER OFFENCES AGAINST THE CURRENCY.

Offences.	1918.		1919.	
	Number of charges.	Number of convictions.	Number of charges.	Number of convictions.
Offences against currency.....	3	1	.....	.....
Forgery and uttering forged documents.....	306	255	466	377
Totals for Canada.....	309	256	466	377

While there were no returns of offences against the currency for 1919 the increase in forgery and uttering forged documents is 52.2 per cent for charges and 47.3 per cent for convictions over 1918.

## CLASS VI.—OTHER OFFENCES NOT INCLUDED IN THE FOREGOING CLASSES.

Offences.	1918.		1919.	
	Number of charges.	Number of convictions.	Number of charges.	Number of convictions.
Treasonable acts.....	4	4		
Sedition.....	39	21	37	19
War Measures Act, offences against.....	17	15		
Attempt to commit suicide.....	34	23	28	20
Sodomy and bestiality.....	89	65	83	54
Indecent exposure and other offences against public morals.....	95	79	153	140
Perjury and subornation of perjury.....	105	41	94	41
Carrying unlawful weapons.....	107	99	98	91
Conspiracy.....	54	21	21	6
Forcible entry.....	3	2	12	2
Offences against gambling and lottery acts.....	471	415	332	296
Prison breach and escape from prison.....	180	168	177	169
Offences against revenue laws.....	26	25	312	292
Riot and affray.....	82	58	75	65
Keeping bawdy houses and inmates thereof.....	1,665	1,551	1,340	1,239
Various other misdemeanors.....	147	98	122	84
Totals for Canada.....	3,118	2,685	2,884	2,518

Although the figures in this class, as a whole, show a diminution during the year, yet there are two items that show notable increases, viz., offences against public morals and revenue laws. The charges in the former case increased 61 and the convictions 30 per cent. In the latter case the increase is over one thousand per cent in both charges and convictions. This may be explained as the result of the prohibition laws lately enacted; since illicit stills are being ferreted out by the dozen, whereas, formerly it was not necessary to resort to illegal methods in order to satisfy the desire for stimulants. In all but one item—forcible entry—decreases are shown.

## SENTENCES.

Of the 18,396 persons convicted of indictable offences in 1919, 5,053 were given the option of a fine, a decrease of 53 from the 1918 figures; 4,376 were sent to the common gaols for terms of imprisonment under two years, a decrease of 309; 978 were sentenced to penitentiary terms of two to five years, this figure being an increase of 277 over that of 1918; 229 to terms of five years and over, an increase of 44; 7 to life imprisonment as against 4 for 1918; 678 to reformatory schools, the same number as last year; 28 death sentences were passed in 1919, being 8 more than in 1918, and 7,047 persons had their sentences suspended or were bound over to good behaviour, which number exceeded that of the previous year by 438.

One man under sentence of death committed suicide before the date set for his execution. In one case of manslaughter where the sentence was suspended a new trial was ordered by the Court of Appeal. In 26 cases corporal punishment was administered with the lash; 2 for rape, 2 for carnal knowledge, 1 for incest, 1 for indecent assault, 1 for assault on females, 1 for carrying unlawful weapons, and 16 for theft. In some cases this whipping was in addition to a term of imprisonment. Eight criminals were deported and in two cases deportation was pending when the returns were forwarded.

SESSIONAL PAPER No. 10d

## PART II.—SUMMARY CONVICTIONS.

The second division of offences consists of cases disposed of Police by Magistrates or other Justices of the Peace under the Summary Conviction's Act, and includes offences against the various Provincial and Municipal Acts and By-laws, breaches of the peace, common assaults, threatening and insulting language, offences against the liquor laws, drunkenness, vagrancy, etc.

This class of offences, as was previously mentioned, is steadily increasing; the number of convictions in 1919 was 111,623 as against 105,899 in 1918 and 98,452 in 1917, an increase of 5.4 per cent over 1918, which latter year shows an increase of 7.56 per cent over 1917. Of these the female offenders numbered 8,300 or 7.43 per cent. In 1918 the percentage of female offenders was 7.37 and 7.05 in 1917, thus showing a slight increase from year to year.

The following table gives the number of Summary Convictions by provinces in 1919, as compared with 1918.

Provinces.	1918.			1919.			Percentage of Increase or Decrease.		
	Total.	M.	F.	Total.	M.	F.	Total.	M.	F.
Prince Edward Island . . .	209	205	4	236	223	13	+13.0	+ 9.0	+225.0
Nova Scotia . . . . .	4,794	4,532	262	5,533	5,238	295	+11.2	+15.6	+ 12.6
New Brunswick . . . . .	1,611	1,530	81	2,447	2,361	86	+51.9	+54.3	+ 6.2
Quebec . . . . .	25,374	21,338	4,036	30,881	26,708	4,173	+21.7	+25.2	+ 3.4
Ontario . . . . .	46,448	44,360	2,088	44,587	42,325	2,262	- 4.0	- 4.6	+ 8.3
Manitoba . . . . .	7,298	6,856	442	8,128	7,690	438	+11.4	+12.2	- 0.9
Saskatchewan . . . . .	6,536	6,335	201	6,180	5,889	291	- 5.4	- 7.0	+ 30.9
Alberta . . . . .	6,744	6,484	260	5,961	5,672	289	-11.6	-12.5	+ 11.1
British Columbia . . . . .	6,821	6,394	427	7,638	7,185	453	+12.0	+12.4	+ 6.1
Yukon . . . . .	64	61	3	32	32		-50.0	-47.5	.....
Canada . . . . .	105,899	98,095	7,804	111,623	103,323	8,300	+ 5.4	+ 5.3	+ 6.3

With respect to totals and males these figures show that Ontario is the only province of Eastern Canada in which there was a decrease. In the West, Saskatchewan, Alberta and Yukon show decreases. All the other provinces show increases. Summary convictions of females increased in every province excepting Manitoba and in the Yukon, the latter place returning no convictions of females for 1919.

Grouped by offences, the figures are:—

Offences.	Number		Variation.
	1918.	1919.	
Assault and other offences against the person . . . . .	5,108	5,116	+ 8
Trespass and other offences against property . . . . .	2,680	3,170	+ 490
Breach of Municipal by-laws . . . . .	38,401	39,593	+1,192
Breach of liquor laws . . . . .	7,472	7,383	- 89
Drunkenness . . . . .	21,026	24,217	+3,191
Vagrancy, disorderly, and inmates of bawdy houses . . . . .	10,550	10,921	+ 371
Offences against the Militia and War Measures Acts . . . . .	6,295	6,082	- 213
Miscellaneous minor offences . . . . .	14,367	15,141	+ 774
Total . . . . .	105,899	111,623	+ 5,724

In 1919 breaches of Municipal Acts and by-laws constituted 35.5 per cent of the total summary convictions, and of these 54 per cent or 22.7 per cent of all the convictions were offences relating to highways. This latter class has in the last twenty years increased more rapidly than any other offence. In 1901 there were but 185 convictions for not observing the regulations regarding street traffic. By 1911 the number of convictions reached 5,777 and in 1919 had grown to 25,296. The advent of the motor vehicle is the principal cause of this increased activity in the Police Courts.

Although drunkenness was on the decline between 1913 and 1918 the figures above show an increase of 3,191 or 15.2 per cent in convictions for 1919 over the previous year. In 1919 offences relating to the liquor traffic are practically the same as for 1918, being but 89 less. In this connection it will be interesting to study comparative figures over a period of years, relating to fines imposed and breaches of the laws against trafficking in and drinking liquor.

The following table shows the number of persons fined, amount of fines paid and unpaid, and the average for each person fined.

BREACH OF LIQUOR LAWS.

Year.	Number of persons fined.	Amount of Fines.			Average fine for each person.	Percentage of unpaid fines.
		Total.	Paid.	Unpaid.		
		\$	\$	\$	\$ cts.	Per cent.
1897	1,994	102,417	99,344	3,073	51.36	3.0
1905	3,114	129,191	112,860	16,331	41.49	12.6
1919	7,079	1,178,842	930,947	247,995	166.52	21.4

DRUNKENNESS.

1897	9,382	30,506	22,274	8,232	3.25	27.0
1905	19,394	84,682	54,766	29,916	4.36	35.3
1919	21,975	226,939	186,176	39,763	10.33	17.1

These figures speak eloquently as to the high cost of drinking in 1919 compared with the other two years given.

The man in the street might be inclined to ask, "Has Prohibition obtained its objective?"

The answer is that in 1897 for both classes of offences 11,376 persons paid \$121,618 in cash or served time in jail equivalent to \$11,305 as penalties for their misbehaviour; in 1905 22,508 persons paid \$167,626 in fines and served time for \$46,247 in unpaid fines, whereas in 1919 the figures stood at 29,054 persons, \$1,117,123 and \$287,758 respectively. The average fine for each person showed an increase, from 1897 to 1919, of from \$51.36 to \$166.52 for liquor laws and from \$3.25 to \$10.33 for drunkenness.

Comparative tables for 1918 and 1919 for non-indictable offences are shown in Table V of the report on pages 236 to 246.

#### METHODS OF TRIAL FOR INDICTABLE OFFENCES.

The number of persons proceeded against by the various courts for indictable offences in 1919 was: tried by jury, 1,155 or 5.0 per cent of the whole, of whom 654 or 56.6 per cent were convicted; tried by judge without a jury (speedy trial), 4,488 or 19.5 per cent of the whole, of whom 3,113 or 69.4 per cent were convicted; tried under the Summary Trial's Act, 17,378 or 75.5 of the

## SESSIONAL PAPER No. 10d

whole, of whom 14,629 or 84.2 per cent were convicted. The figures for 1918 were: tried by jury, 1,062 or 4.9 per cent of the whole of which the convicted were 565 or 53.2 per cent; speedy trials, 3,795 or 17.4 per cent of the whole of which the convicted were 2,618 or 68.9 per cent; under the Summary Trial's Act, 16,890 or 77.7 per cent of the whole, of which the convicted were 14,187 or 84.0 per cent.

The following table shows the number of jury trials and trials without jury of indictable offences, the percentage of jury trials to the whole, and the percentages of convictions of those tried with and without a jury for the period 1901-1919.

Year.	Number of cases tried.				Percentage of jury trials to the whole.	Percentage of convictions.	
	With a Jury.		Without a Jury.			Jury.	Without Jury.
	Convicted.	Acquitted.	Convicted.	Acquitted.			
1901	354	287	5,284	2,345	7.8	55.2	70.2
1902	428	352	5,232	2,440	9.2	54.9	68.2
1903	383	321	6,138	2,736	7.4	54.4	69.2
1904	349	355	6,405	2,752	7.0	51.0	70.0
1905	401	311	7,223	2,964	6.5	56.3	70.9
1906	394	191	7,698	2,617	5.4	67.3	74.6
1907	509	410	8,601	2,521	7.6	55.4	77.3
1908	629	425	10,705	3,336	7.0	59.7	76.2
1909	706	414	10,743	3,487	7.3	68.4	75.5
1910	728	439	10,972	3,166	7.6	62.4	77.6
1911	737	433	11,890	3,565	7.0	63.0	77.0
1912	770	439	14,797	4,162	6.0	63.7	78.0
1913	720	366	17,600	5,292	4.5	66.3	76.5
1914	831	518	20,607	6,051	4.8	60.8	77.3
1915	778	527	19,847	5,562	4.9	59.6	78.1
1916	597	433	18,563	4,349	4.3	57.9	81.0
1917	462	385	15,097	3,510	4.3	54.5	80.1
1918	565	497	16,805	3,880	4.9	53.2	81.2
1919	654	501	17,742	4,124	5.0	56.6	81.1

The foregoing statement shows that the percentage of jury trials, though varying from year to year, has gradually decreased from an average of a little over eight per cent for the first three years to under five per cent for the last three years. The percentages of convictions of jury and non-jury case are notable, inasmuch as they show that the juries fail to secure as high a ratio of convictions as do the judges sitting without the intervention of a jury. The averages for the period are: convictions of persons tried by jury, 59.4 per cent, and without a jury, 76.8 per cent.

## PARDONS AND COMMUTATIONS.

The number of cases in which the prerogative of mercy was exercised in 1919 was 1,453, an increase of 297 over 1918. Of the persons thus affected 356 were granted unconditional pardon, 840 were released under ticket of leave, 284 of whom had other specified conditions imposed. Fines were remitted in 168 cases. The terms of imprisonment were reduced in two cases, and in two cases lashes were remitted.

Of the prisoners released, 485 were from penitentiaries, 356 from reformatories and 461 from common gaols. Those not imprisoned whose fines were remitted amounted to 151. By sexes the division is 1,374 males and 79 females. There were 39 cases in which unconditional pardon was granted to ticket-of-leave men, being eight more than the previous year. Death sentences were commuted to life imprisonment in six cases of males and to a term of twelve years in the case of one female.

## PRÉFACE.

La Statistique de la Criminalité est colligée, compilée et publiée en vertu des dispositions de la loi constituant le Bureau Fédéral de la Statistique, 8-9 Georges V, chapitre 43. Le précis introductif du présent rapport a été rédigé par M. Reginald E. Watts, statisticien, et les tableaux compilés par MM. A. Bourret et O. Gravelle. Ce rapport ne contient pas de tableaux nouveaux. Les tableaux XIII et XIV, parus pour la première fois dans le rapport de 1918, sont répétés et constituent une récapitulation des crimes, délits et contraventions de toutes catégories depuis 1876, date du premier rapport, jusqu'à maintenant.

R. H. COATS,  
*Statisticien du Dominion.*

Bureau Fédéral de la Statistique,  
Août 1920.

# STATISTIQUE DE LA CRIMINALITÉ AU CANADA, 1919.

## INTRODUCTION

Avant d'aborder l'examen des chiffres présentés dans les tableaux qui vont suivre, il convient de jeter un coup d'œil rétrospectif sur les tendances de la criminalité au cours de la période qui commence en 1876, date du début de ces informations.

Le tableau XIII indique le nombre, le pourcentage per capita et la proportion relative des condamnations prononcées, par catégories de délits, depuis 1876 jusqu'à 1919. Dans ce tableau on a groupé les délits de même nature, indépendamment de la procédure criminelle qui a été suivie, et sans établir de distinction entre les délits criminels ou justiciables d'un jury et les petits délits ou condamnations sommaires.

En considérant l'ensemble des délits, on constate une augmentation très considérable de leur nombre et de leur pourcentage per capita, entre 1876 et le commencement de la guerre. Durant cette période de trente-neuf ans, le nombre des condamnations s'est élevé de 28,215, ou 714 par 100,000 habitants, à 183,035 ou 2,359 par 100,000 habitants, soit une augmentation de 548 pour cent de leur nombre; mais, détail plus frappant, la proportion per capita a atteint 232 pour cent. Il est à remarquer que cet accroissement n'a commencé à se manifester que pendant les dernières années du siècle passé, après quoi les chiffres montèrent rapidement jusqu'au début de la guerre, époque à laquelle la population semble avoir concentré tous ses efforts sur la suppression des criminels vivant hors de notre pays. Absorbée par la grande tâche à accomplir dans l'intérêt de la civilisation, la population vit s'élever le niveau de sa moralité, si bien que la criminalité commença immédiatement à décliner. Dès 1917, quoique 5 pour cent seulement du total de la population fut alors outre-mer, les condamnations baissèrent de 38 pour cent, c'est-à-dire qu'elles déclinèrent de 2,369 à 1,363 par 100,000 habitants. Puis en 1918, lorsque la tension mentale commença à disparaître pour faire place à la certitude d'une victoire prochaine, le nombre des condamnations augmenta de nouveau, les deux dernière rapports annuels indiquant une progression presque aussi rapide qu'avant la guerre.

L'augmentation de la criminalité ne se produisit pas d'une manière égale dans toutes les parties du pays. Dans les provinces de l'ouest, à partir du Manitoba et y compris cette province, l'accroissement pendant la période 1900-14 atteignit 804 pour cent, tandis que dans les provinces de l'est, elle se limitait à 229 pour cent. Pendant la même période, la population de l'ouest a augmenté de 235 pour cent et celle de l'est de 28 pour cent. Lorsque la criminalité commença à décliner, les progrès réalisés furent plus rapides dans l'ouest que dans l'est. En 1916 on signalait déjà une diminution de 58 pour cent des condamnations prononcées dans l'ouest tandis que dans l'est le fléchissement ne dépassait pas 24 pour cent; mais cette diminution dans l'ouest est attribuable partiellement aux rapports incomplets provenant de la Saskatchewan et de l'Alberta, causés par la suppression, en 1916, des services de la Police Montée du Nord-Ouest dans ces provinces. Les rapports mensuels sur la criminalité émanant de ce corps étaient beaucoup plus complets que ceux reçus par la suite des fonctionnaires des tribunaux civils. Par contre, pendant les deux dernières années on constate une augmentation plus grande dans l'est que dans l'ouest, les chiffres étant 13.5 et 9 pour cent, respectivement.

Au point de vue de l'origine des condamnés pour crimes et délits graves, l'analyse du rapport révèle ce qui suit: d'après le recensement de 1911, la population née au Canada représentait 78 p.c. du total, tandis que les condamnations prononcées contre la population aborigène, pendant les dix dernières années, ne forment que 59 pour cent du total. Les autres sujets britanniques nés au Canada constituaient 11 pour cent du total et les condamnations qui les ont frappés, s'élèvent à 15.5 pour cent. La population née à l'étranger, dont le chiffre ne dépasse pas 11 pour cent, absorbe 25.5 pour cent des condamnations. Dans les chiffres relatifs aux condamnations par lieu de naissance, le nombre des mentions "inconnu" est relativement proportionné.

En constatant les fluctuations de la criminalité, il est du plus haut intérêt d'établir dans quelle catégorie de crimes ou délits l'augmentation est la plus marquée; à cet égard, il est consolant d'observer que l'accroissement des crimes proprement dits a été fort minime; ce sont les délits de peu de gravité et les contraventions qui présentent l'accroissement le plus considérable.

En se servant de pourcentages, méthode la plus efficace pour mettre un sujet en lumière, on voit (tableau XIII) que les attentats contre les personnes ont diminué presque régulièrement depuis 1876 jusqu'en 1919, puisque cette catégorie de crimes représentait 17.6 pour cent du total des condamnations et 125 par 100,000 habitants et qu'elle est tombée à 6 pour cent et à 88 par 100,000 habitants. Les vols qualifiés, les incendies et autres actes criminels sont montés de 11.3 pour cent en 1876 à 12.1 pour cent en 1919 et de 81 à 178 par 100,000 habitants. Dans l'ensemble, les causes criminelles ont baissé de 28.9 à 18.1 pour cent. En ce qui concerne les contraventions, leur masse est constituée par la violation des règlements municipaux; pendant cette période, les contraventions de cette nature ont passé de 3.0 à 30.5 pour cent du nombre total des condamnations.

Les infractions aux lois sur les boissons spiritueuses n'ont guère varié, leur moyenne demeurant entre 5 et 6 pour cent du total des condamnations, mais la proportion per capita s'est élevée de 38 à 84 par 100,000 habitants. Les délits d'ivresse n'ont pas connu de fluctuation sérieuse; ils variaient de 24 à 39 pour cent, jusqu'aux deux dernières années, époque à laquelle ils tombèrent à 17.1 et 18.6 pour cent. Le vagabondage et l'inconduite sont demeurés presque au même niveau jusqu'au commencement de la guerre; alors les condamnations de cette nature ont presque doublé, puis elles suivirent le déclin général de l'ensemble des condamnations. Sauf certaines variations, les tenanciers de maisons de prostitution et les occupants de ces maisons ont été l'objet de condamnations de plus en plus nombreuses, dont la proportion est passée de 1.9 à 4.3 pour cent et de 13 à 63 par 100,000 habitants. Les autres délits de peu de gravité ont, dans l'ensemble, subi une légère augmentation. Ces mêmes délits et contraventions, tous ensemble, ont augmenté de 71.1 à 81.9 pour cent du total des condamnations et de 508 à 1,206 par 100,000 habitants pendant la totalité de la période, atteignant leur chiffre le plus élevé au moment de la marée haute de la criminalité, en 1913-14.

Au point de vue des sentences, on constate une tendance générale vers une plus grande indulgence. Les prévenus non condamnés, quoique reconnus coupables, et ceux définitivement élargis sur promesse de bonne conduite, appuyée par un cautionnement, ont vu leur nombre s'accroître de 1.6 pour cent de la totalité à plus de 17 pour cent pendant cette période de quarante-quatre ans. D'autre part, la durée des peines d'emprisonnement et de détention dans les pénitenciers a diminué; on constate peu de changement dans le nombre des condamnations à la prison, avec option d'une amende. De même que les années précédentes on a divisé les tableaux de ce rapport en deux groupes principaux, savoir: les crimes et les délits justiciables d'un jury et les condamnations sommaires, pour autres délits et contraventions.

DOC. PARLEMENTAIRE No. 10d

## IÈRE PARTIE—CRIMES ET DÉLITS JUSTICIAIBLES DE LA COUR D'ASSISES.

Ils sont divisés en six catégories: 1, attentats contre les personnes; 2, délits contre la propriété, avec violence; 3, délits contre la propriété, sans violence; 4, dommages malicieux à la propriété; 5, faux et faux-monnayage; 6, autres délits non compris dans les catégories précédentes. Les crimes et délits de ces catégories ont été jugés par les Cours d'Assises, les Cours du Banc du Roi, la Cour Suprême et les Cours des Sessions, selon la procédure criminelle adoptée dans les différentes provinces; en vertu des lois sur les procès expéditifs et en vertu de la loi sur les procès sommaires, par les magistrats de police et autres.

Le nombre des personnes traduites devant les cours criminelles supérieures pendant l'année terminée le 30 septembre 1919 s'est élevé à 1,155 au lieu de 1,062 en 1918. Les accusés qui ont choisi un procès expéditif, étaient au nombre de 4,488 en 1919, et 3,795 en 1918. Tous les autres, c'est-à-dire 17,378 en 1919, ont été jugés par les Cours des magistrats, en vertu de la loi sur les procès sommaires; en 1918 il y en avait eu 16,890. Quant aux crimes et délits justiciables des Cours d'Assises, le nombre des causes soumises à ces cours était en 1919, de 23,021 au lieu de 21,747 en 1918, soit une augmentation de 1,274.

Le pourcentage des accusés jugés par jury a graduellement diminué depuis une série d'années. En 1891 le pourcentage des procès par jury était représenté par le chiffre 13, en 1900 par le chiffre 11, en 1910 il était tombé à 7 et en 1919 à 5 pour cent. Les procès expéditifs et les procès sommaires ont subi une augmentation correspondante.

Les condamnations pour crimes et délits graves en 1919, ont atteint le nombre de 18,396, soit 1,026 de plus qu'en 1918. Le pourcentage des acquittements, dans les mêmes causes, représentait 20.09 pour cent en 1919, 20.13 pour cent en 1918, 20.02 pour cent en 1917. Au cours des dix dernières années le pourcentage des acquittements est descendu de 25 à 20, ce qui indique probablement que les enquêtes ont été plus approfondies et les accusations portées avec plus grand soin.

En l'année 1919, on compte 4,564 acquittements, 10 "non-lieu" prononcés par le grand jury, 11 cas dans lesquels le verdict n'a pu être prononcé à cause du désaccord du jury, 7 cas de *nolle prosequi*, ou suspension de poursuites, et 33 cas où l'insanité du prévenu fut proclamée. Ces derniers cas sont groupés avec les acquittements dans la computation des pourcentages.

Le tableau qui suit indique le nombre d'accusations, de condamnations et d'acquittements, ainsi que les pourcentages des acquittements, par provinces.

	1918.				1919.			
	Nombre d'accusations.	Nombre de condamnations.	Acquittements.		Nombre d'accusations.	Nombre de condamnations.	Acquittements.	
			Nombre.	Pourcentage.			Nombre.	Pourcentage.
Ile du Prince-Edouard ...	42	37	5	11.90	32	31	1	3.12
Nouvelle-Ecosse...	990	717	273	27.58	6,959	767	292	27.67
Nouveau-Brunswick.....	387	334	53	13.69	437	333	104	23.80
Québec...	4,631	3,747	884	19.09	4,823	3,920	903	18.74
Ontario .....	10,278	8,313	1,965	19.12	10,647	8,628	2,019	18.96
Manitoba .....	1,617	1,364	253	15.65	1,619	1,386	233	14.39
Saskatchewan ..	1,412	1,099	313	22.17	1,385	1,135	250	18.05
Alberta .....	1,237	889	348	28.13	1,480	1,040	440	29.73
Colombie Britannique ..	1,138	859	279	24.52	1,532	1,151	381	24.87
Yukon .....	15	11	4	26.66	7	5	2	18.57
Canada .....	21,747	17,370	4,377	20.13	23,021	18,396	4,625	20.09

Il résulte de ce tableau que le pourcentage des condamnations, par rapport aux accusations, s'établit dans les provinces ainsi qu'il suit: l'Île du Prince-Edouard compte 3·12 pour cent d'acquittements; dans le Manitoba, la Saskatchewan, le Yukon, Québec et Ontario, les acquittements varient de 14·39 à 18·96 pour cent; enfin au Nouveau-Brunswick, en Colombie Britannique, en Nouvelle-Ecosse et en Alberta, cette proportion oscille entre 23·80 et 29·73 pour cent.

Au point de vue de la criminalité par province, une computation des données statistiques, couvrant une période de cinq ans, révèle que la province d'Ontario tient la tête avec une moyenne de 297 par 100,000 habitants, l'Alberta arrivant deuxième avec 272. En 1915, cette dernière province avait battu tous les records, avec le chiffre formidable de 464 par 100,000 habitants. L'Île du Prince-Edouard et le Nouveau-Brunswick occupent le rang le plus favorable avec une moyenne respective de 26 et 86, suivis par la Nouvelle-Ecosse et Québec, avec 143 et 160. Pour l'ensemble du Canada le pourcentage des condamnations par 100,000 habitants, qui était de 260 en 1915, descendit à 189 en 1917, pour remonter à 214 l'année suivante, et retomber à 208 en 1919.

On trouvera dans le tableau suivant, pour chaque province et pour le pays entier, les proportions par 100,000 habitants des condamnations pour crimes et délits graves, prononcées pendant les cinq années 1915-19.

Provinces.	1915.	1916.	1917.	1918.	1919.	Moyenne.
Île du Prince-Edouard.....	17	15	35	39	33	26
Nouvelle-Ecosse.....	118	126	113	139	148	143
Nouveau-Brunswick.....	77	82	91	91	90	86
Québec.....	141	174	151	164	168	160
Ontario.....	335	292	252	299	306	297
Manitoba.....	298	223	190	229	221	232
Saskatchewan.....	336	271	158	154	152	214
Alberta.....	464	386	173	160	177	272
Colombie Britannique.....	319	284	200	129	160	218
Yukon.....	317	235	258	130	59	200
Canada.....	260	235	189	214	208	221

Si l'on divise les criminels entre urbains et ruraux, on voit qu'en 1919, 16,305 personnes condamnées pour crimes et délits justiciables d'un jury habitaient dans les cités et les villes, tandis que 2,051 vivaient dans les campagnes; dans 40 cas ce renseignement manque. La population des cités et des villes de plus de 1,000 habitants, telles qu'elle résulte du recensement de 1911, était de 3,009,896 habitants ou 41·8 pour cent de la population totale; par conséquent, d'après ces chiffres, la criminalité urbaine en 1919 représentait 88 pour cent. L'augmentation de la population urbaine depuis 1911 réduirait probablement quelque peu cette proportion, mais il est indiscutable que c'est dans les cités et les villes que se commet le plus grand nombre des crimes qui sont découverts.

Si l'on veut connaître les métiers et occupations des condamnés, on apprend que les condamnations pour crimes et délits parmi la classe agricole (comprenant aussi les mineurs, les pêcheurs et les bûcherons) qui étaient au nombre de 1,152 en 1918 sont tombées à 966 en 1919, soit une diminution de 186, égale à 6·6 pour cent de la totalité des condamnations pour toutes causes prononcées en 1918, au lieu de 5·6 pour cent en 1919. Dans la classe du commerce et des transports, elles sont passées de 1,813 à 1,965, soit de 10·4 à 10·7 pour cent du total des condamnations pendant les années 1918 et 1919. Dans le monde des domestiques et serviteurs elles sont descendues de 1,866 ou 10·7 pour cent à 1,608 ou 8·8 pour cent du total des condamnations. Chez les industriels et les employés

## DOC. PARLEMENTAIRE No. 10d

des industries, elles ont subi une augmentation, montant de 1,214 ou 7·6 pour cent à 1,424 ou 7·7 pour cent. Parmi les carrières libérales les condamnations sont descendues de 359 ou 2·0 pour cent à 315 ou 1·7 pour cent. Dans la classe ouvrière elles ont augmenté de 4,403 ou 25·4 pour cent à 5,232 ou 28·4 pour cent. Enfin, les condamnés sans occupation et ceux sur le compte desquels on ne possède pas de renseignement formaient 27 pour cent du total des condamnations pendant ces deux années.

En ce qui concerne le sexe, les rapports indiquent que sur le total des condamnations en 1919, 16,161 ont frappé des hommes et jeunes gens, contre 14,871 en 1918, soit une augmentation de 1,290, tandis que 2,235 s'appliquent à des femmes ou filles, au lieu de 2,499 en 1918, soit une diminution de 264.

On verra dans le tableau ci-dessous le nombre des condamnations féminines, par province, et le pourcentage du total des condamnations.

Provinces.	1918.		1919.	
	Nombre des condamnations féminines.	Pourcentage du total des condamnations.	Nombre des condamnations féminines.	Pourcentage du total des condamnations.
Ile du Prince-Edouard .....	5	13·51	1	3·29
Nouvelle-Ecosse .....	52	7·27	54	7·04
Nouveau-Brunswick .....	29	8·68	21	6·31
Québec .....	1,047	27·94	886	22·60
Ontario.....	878	10·56	783	8·95
Manitoba.....	186	13·64	125	9·01
Saskatchewan.....	70	6·37	94	8·28
Alberta.....	88	9·90	154	14·81
Colombie Britannique .....	144	16·76	117	10·17
Yukon.....	—	—	—	—
Canada.....	2,499	14·39	2,235	12·15

Le nombre des condamnés du sexe féminin, pour crimes et délits graves, a régulièrement décliné de 1884 à 1915. Après cette date, il suit une marche ascendante, ainsi que l'indiquent les chiffres ci-dessous.

Moyenne de 1884 à 1891—8·60 pour cent  
 Moyenne de 1892 à 1895—7·20 pour cent  
 Moyenne de 1896 à 1900—6·12 pour cent  
 Moyenne de 1901 à 1905—5·72 pour cent  
 Moyenne de 1906 à 1910—4·82 pour cent  
 Moyenne de 1911 à 1915—4·71 pour cent  
 1916—6·52 pour cent  
 1917—7·27 pour cent  
 1918—9·28 pour cent  
 1919—8·24 pour cent.

Si l'on ajoutait à cette catégorie de criminels les tenanciers de maisons de prostitution et leurs pensionnaires, autrefois jugés par procès sommaires, mais maintenant placés dans la catégorie des criminels par suite des modifications apportées au code criminel en 1916, les chiffres des quatre dernières années seraient 19·17, 15·89, 14·39, et 12·15 pour cent au lieu de ceux donnés ci-dessus.

Au point de vue du lieu de naissance des condamnés, on constate très peu de changement depuis un certain nombre d'années. En 1919, ceux nés au Canada représentaient 55·21 pour cent du total des condamnations prononcées en matière de délits criminels; ceux nés en Angleterre 7·22, en Irlande 1·55,

en Ecosse 2·07, dans les autres possessions britanniques 0·50, aux Etats-Unis 5·38 et dans les autres pays étrangers 15·11 pour cent. Si l'on dissèque la période décennale se terminant en 1919, on trouve que la criminalité a augmenté jusqu'en 1914, puis qu'une diminution s'est produite jusqu'en 1918, suivie d'une nouvelle augmentation. Le tableau suivant classe les condamnés par lieu de naissance.

Lieu de naissance des condamnés pour délits criminels, de 1910 à 1919, et fluctuation au cours des trois périodes.

Année.	Canada.	Angleterre.	Irlande.	Ecosse.	Autres possessions britanniques.	Etats-Unis.	Autres étrangers.
1910	6,276	925	258	257	49	558	1,315
1911	6,376	1,246	302	365	16	734	1,547
1912	6,713	1,319	404	451	101	910	2,065
1913	7,619	1,961	451	571	87	1,212	2,674
1914	9,162	1,872	472	675	151	1,015	3,516
Augmentation de 1910 à 1914	46·0 p.c.	102·4 p.c.	83·0 p.c.	162·6 p.c.	208·2 p.c.	81·9 p.c.	167·4 p.c.
1915	9,172	1,482	371	473	132	980	3,741
1916	7,428	952	260	321	57	916	2,697
1917	7,097	780	180	242	95	845	2,228
Diminution, de 1914 à 1917	22·5 p.c.	58·4 p.c.	61·9 p.c.	64·1 p.c.	37·1 p.c.	16·7 p.c.	36·6 p.c.
1918	9,322	1,177	285	381	152	947	3,161
1919	10,157	1,329	193	381	90	990	2,780
Augmentation, de 1917 à 1919	43·1 p.c.	70·4 p.c.	7·2 p.c.	57·4 p.c.	Diminution 5·2 p.c.	17·2 p.c.	24·8 p.c.

La fluctuation dans le nombre des condamnations, au cours des trois périodes, est caractérisée par (1) une augmentation de 83·23 p.c. (2) une diminution de 27·42 p.c. (3) une augmentation de 18·11 p.c.

Voici maintenant les statistiques relatives à la religion des condamnés :

#### CONDAMNATIONS POUR DÉLITS CRIMINELS, PAR RELIGION.

Religions	Nombre des condamnations.		Augmentation ou diminution.	Pourcentage du total des condamnations, 1919.	Pourcentage des religions à la population en 1911.
	1918.	1919.			
Anglicane	1,910	2,186	276	12·0	14·5
Méthodiste	1,368	1,589	221	8·6	15·0
Presbytérienne	1,397	1,432	35	7·8	15·5
Baptiste	385	383	2	2·1	5·3
Catholique Romaine	6,959	6,896	63	37·3	39·3
Autres confessions	3,124	3,121	3	17·0	10·0
Non indiquée	2,227	2,789	562	15·2	0·4

En examinant les deux dernières colonnes on voit que le pourcentage des condamnations est inférieur au pourcentage de la population, dans tous les cas où existe une indication de religion; au contraire, lorsqu'il s'agit des rubriques "autres religions" et "non indiquée" le pourcentage des condamnations est supérieur à celui de la population, ce qui indique que l'étalon de la moralité est plus bas parmi les classes qui n'appartiennent à aucune église.

Les informations recueillies au point de vue du degré d'instruction des condamnés pour délits criminels démontrent qu'en 1918, 14,690 d'entre eux avaient

## DOC. PARLEMENTAIRE No. 10d

reçu une instruction primaire ou plus élevée, tandis que 1,084 étaient illettrés; en 1919 il y avait 14,690 des premiers et 843 des seconds, soit une augmentation de 456 chez les condamnés possédant de l'instruction et une diminution de 281 parmi les illettrés.

## L'ALCOOLISME ET LA CRIMINALITÉ.—POURCENTAGE DU TOTAL DES CONDAMNATIONS.

Période.	Usage modéré de spiritueux.	Usage immodéré de spiritueux.	Non indiqué.
	p. c.	p. c.	p. c.
1887-1890..	44.6	39.2	16.2
1891-1894..	53.8	40.1	6.1
1895-1898..	54.5	34.3	11.2
1899-1902..	60.1	29.8	10.2
1903-1906..	58.2	26.7	15.1
1907-1910..	55.4	22.4	22.2
1911-1914..	50.4	17.9	31.7
1915..	35.9	11.4	52.7
1916..	38.5	9.5	52.0
1917..	34.6	8.5	56.9
1918..	67.1	7.8	25.1
1919..	58.4	6.9	34.7

Il résulte de ces chiffres que les buveurs modérés, quoique variant leurs habitudes de temps en temps, n'ont pas beaucoup changé, dans l'ensemble. La catégorie des ivrognes invétérés est tombée de 40 pour cent du total des condamnations à moins de 7 pour cent pendant cette période, tandis que la catégorie "non indiquée" et celle des modérés ont subi des variations considérables, et présentent une augmentation sensible. Les conclusions qui se dégagent des calculs qui précèdent montrent que l'ivresse n'exerce qu'une influence insignifiante sur la criminalité et que le plus grand pourcentage des crimes est commis par des buveurs d'eau ou des buveurs très modérés, à moins qu'un changement ne se soit produit dans la psychologie humaine et qu'un nombre moindre de personnes aient le courage moral d'avouer qu'elles sont adonnées à l'usage excessif des spiritueux.

En 1919, les personnes condamnées pour la première fois formaient 82.2 pour cent des condamnations; celles condamnées pour la seconde fois représentaient 8.9 pour cent et les récidivistes—c'est-à-dire ceux déjà condamnés plusieurs fois—étaient aussi 8.9 pour cent du total des condamnations. En 1918 les chiffres étaient presque les mêmes, savoir: 82.4, 8.9, et 8.7 pour cent respectivement.

Au point de vue de l'état civil, le pourcentage le plus considérable des crimes a été, de tout temps, le lot des célibataires, les chiffres de 1919 étant: célibataires 60.2; mariés 24.3; veufs et veuves 1.7 pour cent des condamnations. En 1918 ces chiffres avaient été: célibataires 59.5; mariés 25.7; veufs et veuves 1.5 pour cent. Ces proportions diffèrent très peu de celles constatées vingt ou trente ans auparavant.

## LA CRIMINALITÉ PARMIS LA JEUNESSE.

En analysant cette phase du sujet on découvre une situation fort inquiétante, qui nécessite un examen approfondi. Il résulte des rapports des trois dernières années que plus de vingt pour cent des crimes ont été commis par des enfants au-dessous de 16 ans. En remontant plus haut, les statistiques nous indiquent que, pendant la période écoulée entre 1884 et 1891, cette moyenne n'était que de 13.64 pour cent et qu'en 1899, elle s'élevait à 16.38 pour cent.

Dans le tableau qui suit on a relevé le nombre des condamnations prononcées contre les enfants des deux sexes, de 1901 à 1919, ainsi que les pourcentages.

## JEUNES DÉLINQUANTS AU-DESSOUS DE 16 ANS.

Année.	Total des condamnations.	Nombre de jeunes gens au-dessous de 16 ans condamnés.		Pourcentage du total des condamnations.	
		Garçons.	Filles.	Garçons.	Filles.
1901-1903, moyenne.....	5,940	941	31	15.8	0.5
1904-1906 ".....	7,490	719	41	9.6	0.5
1907-1910. ".....	10,715	1,149	44	10.7	0.4
1911-1913 ".....	15,504	1,802	75	11.6	0.5
1914.....	21,438	2,542	86	11.9	0.4
1915.....	20,625	2,972	78	14.4	0.4
1916.....	19,160	3,055	102	15.9	0.5
1917.....	15,559	3,481	125	22.4	0.8
1918.....	17,370	3,927	177	22.6	1.0
1919.....	18,396	3,728	148	20.3	0.8

Ce tableau nous montre que la criminalité parmi la jeunesse a augmenté de presque trois pour cent dans les vingt dernières années. L'augmentation la plus considérable se place entre 1914 et 1919, période durant laquelle les condamnations ont monté de 11.9 à 20.3 pour cent du total des condamnés.

Les crimes pour lesquels les 3,876 jeunes gens au-dessous de 16 ans ont été condamnés en 1919 se classifient ainsi qu'il suit:

Les attentats et outrages contre les personnes ont donné lieu à 118 accusations, suivies de 85 condamnations et 33 acquittements, dont voici le détail:

	Condam-nations.	Acquitte-ments.
Voies de fait graves.....	28	14
Voies de fait simples.....	30	14
Attentats à la pudeur.....	10	3
Commerce charnel.....	4	-
Tentatives de déraillement.....	5	2
Coups et blessures.....	7	-
Homicide involontaire.....	1	-
Total.....	85	33

Les délits contre la propriété, avec violence, ont donné lieu à 631 condamnations et 28 acquittements, pour les causes suivantes:

	Condam-nations.	Acquitte-ments.
Vol avec effraction et cambriolage.....	611	25
Vol qualifié.....	-	1
Vol à main armée.....	1	-
Vol dans les wagons de marchandises.....	19	2
Total.....	631	28

## DOC. PARLEMENTAIRE No. 10d

Les délits contre la propriété, sans violence, se répartissent de la manière suivante :

	Condam-nations.	Acquitte-ments.
Vol, simple .....	2,837	182
Vol de chevaux et de bétail .....	10	—
Vol de lettres .....	6	—
Vol sur la personne .....	5	1
Recel de marchandises volées .....	74	11
Escroqueries .....	12	—
Fraude .....	5	—
Total.....	2,949	194

L'énumération des dommages malicieux à la propriété est ainsi établie :

	Condam-nations.	Acquitte-ments.
Dommages malicieux à la propriété.....	144	21
Incendie.....	14	2
Total.....	158	23
Faux et usage de faux .....	8	—

Autres délits divers :	Condam-nations.	Acquitte-ments.
Port d'armes illégal .....	11	1
Evasion de prison .....	11	1
Sodomie .....	4	—
Indécence et outrage à la pudeur..	15	1
Autres délits.....	3	4
Total..	45	7
Grand total..	3,876	285

Le vol, soit par cambriolage ou qualifié ou le simple larcin est, de beaucoup, le délit commis le plus fréquemment, constituant 92 pour cent de toutes les condamnations. L'enfant se laisse aisément attirer vers le vol. Le désir inné de l'enfant qui n'a pas la force de résister à ses mauvais penchants est de saisir quelque chose et de s'en emparer. Le plus souvent ce désir, au lieu d'être réprimé s'accomplit, la faiblesse du caractère l'emportant sur la raison et le jugement. N'est-il pas inévitable que l'enfant soit conduit au vol par l'absence de contrôle de ses inclinations ? Dans les rapports publiés en 1901, 1902 et 1903, qui dévoilaient la croissance de la criminalité juvénile, il était fait appel à la presse, aux magistrats et aux jurys, au clergé, aux instituteurs et aux parents, qui étaient adjurés d'ouvrir les yeux sur cette plaie sociale et de prendre toutes les mesures propres à la guérir. Aujourd'hui, cette adjuration doit être répétée avec une plus grande énergie.

Voici la nomenclature des condamnations imposées aux jeunes délinquants pendant l'année 1919; option d'amende, 254; moins d'un an de prison, 21; condamnations au pénitencier, de différentes durées, 7; (1, cinq ans pour homicide involontaire; 1, cinq ans pour voies de fait graves; 1, trois ans pour sodomie; 2, quatre ans pour vol; 2, deux ans pour vol avec effraction); 541 ont été envoyés dans les maisons de correction pour des durées variables et 16 ont été condamnés à la peine du fouet. Les autres, au nombre de 3,036, ont été relâchés après avoir été admonestés, placés sous cautionnement ou bien bénéficiaient d'un sursis. 1,738 de ces jeunes gens appartenaient à la religion catholique romaine, 2,138 étaient protestants ou adeptes d'autres religions.

Sur les 3,876 jeunes gens condamnés pour délits criminels en 1919, 2,711 ont comparu devant les tribunaux pour enfants des villes suivantes: Montréal, 863; Toronto, 989; Winnipeg, 457; Vancouver, 131; Ottawa, 120; Halifax, 65; Victoria, 31; Brandon, 36; Brantford, 19.

Outre ces condamnés pour crimes et délits graves dont il vient d'être parlé ci-dessus, un nombre presque égal de jeunes gens ont été condamnés par les mêmes tribunaux pour enfants des villes ci-dessus nommées, pour menus délits ou contraventions.

Nous en donnons ci-dessous un résumé.

JEUNES DÉLINQUANTS CONDAMNÉS POUR MENUS DÉLITS PAR LES TRIBUNAUX POUR ENFANTS, EN 1919.

Délits et contraventions.	Mont- réal.	To- ron- to.	Win- ni- peg.	Van- cou- ver.	Ota- wa.	Hali- fax.	Vic- to- ria.	Bran- don.	Brant- ford.	Total.

DOC. PARLEMENTAIRE No. 10d

## CRIMES ET DÉLITS GRAVES, PAR CATÉGORIES.

## IÈRE CATÉGORIE.—ATTENTATS CONTRE LES PERSONNES.

Énumération.	1918.		1919.	
	Nombre de		Nombre de	
	Accusa- tions.	Condam- nations.	Accusa- tions.	Condam- nations.
Assassinat	50	20	79	28
Assassinat, tentative d'.	20	7	34	22
Homicide involontaire.	49	21	62	32
Avortement et suppression d'enfants.	35	20	10	8
Viol et crimes indécents.	498	285	516	311
Embauchage immoral	59	33	39	2
Bigamie	107	91	92	71
Coups et blessures	162	111	182	109
Voies de fait contre les femmes.	36	32	29	22
Voies de fait graves.	643	464	711	471
Voies de fait sur la police.	368	340	554	503
Rixe.	1,239	912	1,109	852
Refus de pourvoir aux besoins de la famille	164	105	114	85
Divers attentats contre les personnes	138	88	153	77
Total pour le Canada	3,568	2,529	3,684	2,614

Ce qui ressort, à première vue, du tableau ci-dessus c'est l'augmentation du nombre des assassinats, des tentatives d'assassinat et des homicides involontaires. En 1919, on vit 79 accusations pour assassinats et 28 condamnations; ces chiffres sont les plus élevés de toute la période couverte par les statistiques, si l'on en excepte l'année 1915, qui détient le record avec 86 accusations et 34 condamnations. Pour l'ensemble des quarante-quatre dernières années, la moyenne annuelle du nombre des condamnations pour meurtres est de 12; l'année 1906, exceptionnellement, n'en eut que 2. Comparant ensemble les années 1919 et 1918, on constate que l'augmentation des condamnations pour attentats contre les personnes dépasse légèrement 3 pour cent.

## IIÈ CATÉGORIE.—DÉLITS CONTRE LA PROPRIÉTÉ, AVEC VIOLENCE.

Énumération.	1918.		1919.	
	Nombre de		Nombre de	
	Accusa- tions.	Condam- nations.	Accusa- tions.	Condam- nations.
Vol avec effraction, cambriolage d'habitations et de magasins	2,162	1,932	2,717	2,420
Vol et demandes avec menaces	183	100	348	164
Vol à main armée.	20	17	27	22
Totaux pour le Canada	2,365	2,049	3,092	2,508

Dans cette catégorie les accusations ont augmenté de 30·8 et les condamnations de 22·3 pour cent.

IIIe CATÉGORIE.—DÉLITS CONTRE LA PROPRIÉTÉ, SANS VIOLENCE.

Énumération.	1918.		1919.	
	Nombre de		Nombre de	
	Accusa-tions.	Condam-nations.	Accusa-tions.	Condam-nations.
Faire entrer au Canada des choses volées. ....	5	4	12	12
Détournement.....	7	6	11	7
Escroquerie.....	600	421	679	406
Recel de marchandises volées.....	487	323	536	373
Fraude et complicité de fraude.....	529	360	499	366
Vol de chevaux, bêtes à cornes et moutons..	88	64	90	68
Vol simple.....	10,275	8,404	10,613	8,651
Vol de lettres recommandées.....	21	20	32	28
Totaux pour le Canada.....	12,012	9,602	12,372	9,911

Dans cette catégorie, le vol absorbe 90 pour cent; si l'on additionne ensemble les vols simples, les cambriolages et les vols à main armée relatés dans les deux tableaux précédents, on voit que cette catégorie de crimes et délits représente 60 pour cent de la totalité des crimes et délits justiciables d'un jury, cette proportion différant peu des chiffres des années précédentes.

IVe CATÉGORIE.—DÉLITS MALICIEUX CONTRE LA PROPRIÉTÉ.

Énumération.	1918.		1919.	
	Nombre de		Nombre de	
	Accusa-tions.	Condam-nations.	Accusa-tions.	Condam-nations.
Incendie.....	74	33	73	43
Dommages malicieux aux chevaux et au bétail et autres dommages à la propriété.....	301	216	450	327
Totaux pour le Canada.....	375	249	522	370

Dans cette catégorie on remarque une augmentation de 39·5 pour cent dans les accusations et 48·6 pour cent dans les condamnations.

Ve CATÉGORIE.—FAUX ET FAUX-MONNAYAGE.

Énumération.	1918.		1919.	
	Nombre de		Nombre de	
	Accusa-tions.	Condam-nations.	Accusa-tions.	Condam-nations.
Faux-monnayage et contrefaçon.....	3	1	.....	.....
Faux et usage de faux.....	306	255	466	377
Totaux pour le Canada.....	309	256	466	377

## DOC. PARLEMENTAIRE No. 10d

Les données manquent en 1919, quant au faux-monnayage; mais en ce qui concerne les faux et usage de faux, l'augmentation est de 52.2 pour cent pour les accusations et 47.3 pour cent pour les condamnations en 1918.

## VIÈ CATÉGORIE.—AUTRES CRIMES ET DÉLITS NON COMPRIS DANS LES CATÉGORIES PRÉÉDENTES.

Énumération.	1918.		1919	
	Nombre de		Nombre de	
	Accusa- tions.	Condam- nations.	Accusa- tions.	Condam- nations.
Actes de trahison...	4	4		
Sédition..	39	21	37	19
Violation de la loi des mesures de guerre..	17	15		
Tentative de suicide ..	34	23	28	20
Sodomie et bestialité ..	89	65	83	54
Exposition indécente et autres attentats à la pudeur.	95	79	153	140
Faux témoignage et subornation de faux témoins..	105	41	94	41
Port d'armes illégal....	107	99	98	91
Conspiration..	54	21	21	6
Violation de domicile	3	2	12	2
Infractions aux lois sur le jeu et les loteries ..	471	415	332	296
Évasion de prison..	150	168	177	169
Violation des lois fiscales....	26	25	312	292
Émeute et tumulte..	82	58	75	65
Maisons de prostitution, tenanciers et pensionnaires	1,605	1,551	1,340	1,239
Autres délits divers...	147	98	122	84
Totaux pour le Canada ..	3,118	2,685	2,884	2,518

Quoique cette catégorie, dans son ensemble, semble en décroissance, il convient de remarquer que deux délits au moins présentent une augmentation considérable sur l'année précédente, ce sont les attentats à la pudeur et les violations des lois fiscales. Dans le premier les accusations ont augmenté de 61 et les condamnations de 30 pour cent; dans le second cas, l'augmentation dépasse mille pour cent, tant au point de vue des accusations que des condamnations. Ceci s'explique aisément comme étant la conséquence des lois sur la prohibition récemment édictées. Depuis l'existence de la prohibition les alambies illicites sont découverts par douzaines, tandis qu'autrefois lorsqu'on pouvait se procurer de l'alcool aisément, il n'était pas nécessaire d'employer de semblables moyens. Dans tous les autres cas, on constate une diminution, à l'exception des violations de domicile.

Sur les 18,396 personnes condamnées en 1919, pour crimes et délits justiciables d'un jury, 5,053 le furent avec option d'amende, soit une diminution de 53 sur les chiffres de 1918; 4,376 ont été envoyées en prison pour une durée inférieure à deux ans, soit une diminution de 309; 978 ont été condamnées au pénitencier pour des périodes de deux à cinq ans, soit une augmentation de 277 sur les chiffres de 1918; 229 pour des périodes de cinq ans et plus, soit une augmentation de 44; 7 à la détention perpétuelle au lieu de 4 en 1918; 678 dans les maisons de correction, nombre égal à celui de l'an dernier; 28 condamnations à mort ont été prononcées en 1919, soit 8 de plus qu'en 1918; enfin 7,047 personnes ont bénéficié d'un sursis, avec ou sans cautionnement, ce nombre excédant de 438 celui de l'année précédente.

Un condamné à mort s'est suicidé. Dans un cas d'homicide involontaire, où la sentence avait été suspendue, un nouveau procès fut ordonné par la cour d'Appel. La peine du fouet fut appliquée dans 26 cas, dont 2 pour viol, 2 pour

commerce charnel, 1 pour insultes, 1 pour attentat à la pudeur, 1 pour voies de fait sur une femme, 1 pour port d'armes illégal et 16 pour vol. Dans quelques cas la peine du fouet s'ajoutait à un emprisonnement. Huit criminels furent expulsés du pays, et deux cas d'expulsion étaient en suspens lorsque les rapports ont été faits.

## II<sup>E</sup> PARTIE.—CONDAMNATIONS SOMMAIRES.

Le second groupe de délits est constitué par les causes jugées par les magistrats de police ou autres juges de paix, en vertu de la loi sur les condamnations sommaires. Dans ce groupe figurent les infractions aux lois provinciales et municipales, le tapage, les menaces et les insultes, la violation des lois sur les spiritueux, l'ivresse, le vagabondage, etc.

Ainsi qu'on le dit plus haut, ce groupe de menus délits et contraventions présente une augmentation toujours croissante; en 1919 le nombre des condamnations s'est élevé à 111,623 contre 105,899 en 1918 et 98,452 en 1917, soit une augmentation de 5.4 pour cent sur 1918, laquelle année présente elle-même une augmentation de 7.56 sur 1917. Sur ce total, les femmes et filles condamnées se dénombraient par 8,300 soit 7.43 pour cent. En 1918, le pourcentage des condamnations féminines était de 7.37 et en 1917 de 7.05; il y a donc un léger accroissement d'année en année.

Le tableau qui suit est un relevé du nombre des condamnations sommaires prononcées en 1919, dans chaque province, comparativement à 1918.

Provinces.	1918.			1919.			Fluctuation des pourcentages.		
	Total.	Hommes.	Femmes.	Total.	Hommes.	Femmes.	Total.	Hommes.	Femmes.
Ile du Prince-Edouard..	209	205	4	236	223	13	13.0	9.0	25.0
Nouvelle-Ecosse...	4,794	4,532	262	5,533	5,238	295	11.2	15.6	12.6
Nouveau-Brunswick .	1,611	1,530	81	2,447	2,361	86	51.9	54.3	6.2
Québec..	25,374	21,338	4,036	30,331	26,708	4,173	21.7	25.1	3.4
Ontario	46,448	41,360	2,088	44,587	43,225	2,262	4.0	4.6	8.3
Manitoba	7,298	6,856	442	8,128	7,606	438	11.4	12.2	0.9
Saskatchewan..	6,536	6,335	201	6,180	5,889	291	5.4	7.6	30.9
Alberta.	6,744	6,484	260	5,961	5,672	289	11.6	12.5	11.1
Colombie Britannique..	6,821	6,394	427	7,638	7,185	453	12.0	12.4	6.1
Yukon	64	61	3	32	32		50.0	47.5	.....
Canada	105,899	98,095	7,804	111,623	103,323	8,300	5.4	5.3	6.3

Il appert du tableau ci-dessus qu'Ontario est la seule province de l'est du Canada où se soit produite une décroissance tant au point des condamnations totales que de celles prononcées contre les hommes. Dans l'ouest, la diminution se manifeste dans la Saskatchewan, l'Alberta et le Yukon. Dans toutes les autres provinces on trouve une augmentation. Les condamnations sommaires prononcées contre les femmes ont augmenté dans chaque province, sauf dans le Manitoba et le Yukon, ce dernier territoire étant vierge de toutes condamnations contre les femmes en l'année 1919.

## DOC. PARLEMENTAIRE No. 10d

Voici maintenant les mêmes chiffres, répétés par genre de délits et contraventions:

Délits et contraventions.	1918.	1919.	Fluctuation.
	Nombre.	Nombre.	
Voies de fait et autres attentats contre les personnes.	5,168	5,116	+ 8
Empiètement et autres délits contre la propriété.....	2,680	3,170	+ 490
Infractions aux règlements municipaux .....	38,401	39,593	+1,192
Violation des lois sur les spiritueux.	7,472	7,383	- 89
Ivresse..	21,026	24,217	+3,191
Vagabondage, conduite déréglée et pensionnaires de maisons de débauche	10,550	10,921	+ 371
Violation des lois militaires et des mesures de guerre	6,295	6,082	- 213
Différents menus délits et contraventions ..	14,367	15,141	+ 774
Total	105,899	111,623	5,724

En 1919, les infractions aux règlements municipaux ont constitué 35.5 pour cent du total des condamnations sommaires, et dans cette classe de contraventions 64 pour cent, ou 22.7 pour cent du total des condamnations, concernaient des violations des règlements de la voirie. Au cours des vingt dernières années, cette catégorie de contravention s'est accrue plus rapidement qu'aucune des autres. En 1901 il n'y avait eu que 185 condamnations pour infractions aux règlements sur la circulation; dès 1911, on en comptait 5,777 et en 1919 on atteignait le chiffre formidable de 25,296. La vogue de l'automobilisme est la cause principale de ce surcroît de travail dans les cours de police.

Quoique l'ivresse ait décliné entre 1913 et 1918, les chiffres ci-dessus indiquent une augmentation de 3,191 ou 15.2 pour cent dans les condamnations prononcées en 1919, sur celles de l'année précédente. En ce qui concerne le trafic des spiritueux, la situation en 1919 n'a guère varié, car il n'y eut que 89 condamnations de moins qu'en 1918. A ce sujet il sera intéressant, dans quelques années, d'examiner les chiffres comparatifs des amendes imposées et des actes de violation des lois contre le trafic des spiritueux et contre l'ivresse.

Dans le tableau suivant on trouvera le nombre de personnes condamnées, le quantum des amendes imposées et payées, et la moyenne de l'amende par condamnation.

## INFRACTIONS AUX LOIS SUR LES SPIRITUEUX.

Année.	Nombre de personnes condamnées.	Montant des amendes.			Moyenne pour chaque personne.	Pourcentage des amendes impayées
		Total.	Payées.	Impayées.		
		§	§	§		
1897.....	1,994	102,417	99,344	3,073	51.36	3.0
1905.....	3,114	129,191	112,869	16,331	41.49	12.6
1919.....	7,079	1,178,842	930,947	247,995	166.52	21.4

## IVRESSE.

1897.....	9,382	30,566	22,274	8,292	3.25	27.0
1905.....	19,394	84,682	54,766	29,916	4.36	35.3
1919.....	21,975	226,939	186,176	39,763	10.33	17.1

Ces chiffres parlent éloquemment; ils témoignent qu'en 1919 les amateurs de spiritueux ont payé beaucoup plus cher que pendant les deux autres années qui servent de comparaison.

Et maintenant, si quelqu'un demandait: "La prohibition a-t-elle atteint son but?"

La réponse à cette question est qu'en 1897, 11,376 personnes coupables de l'un ou de l'autre de ces deux délits ont payé \$121,618 d'amendes, en espèces, ou bien passé en prison un temps équivalent à \$11,305 d'amendes imposées, à titre de pénalité de leur conduite; en 1905, 22,508 personnes ont payé \$167,626 d'amendes et racheté par la prison \$46,247 d'amendes, tandis qu'en 1919, on trouve les chiffres suivants: condamnés 29,054, amendes payées \$1,117,123 et amendes rachetées par la prison \$287,758. La moyenne de l'amende pour chaque condamné est passée de \$51.36 en 1897 à \$166.62 en 1919 pour les infractions aux lois des spiritueux et de \$3.25 à \$10.33 pour ivresse.

Les tableaux comparatifs pour 1918 et 1919, consacrés aux menus délits et contraventions, se trouvent dans le tableau V du rapport, pages 236 à 246.

#### MODES DE JUGEMENT DES CRIMES ET DÉLITS GRAVES.

On établit ainsi qu'il suit le nombre des personnes poursuivies devant les différentes cours criminelles en 1919, pour crimes et délits graves; jugées par jury, 1,155 ou 5.0 pour cent de la totalité, dont 654 ou 56.6 pour cent ont été condamnées; jugées par un juge, sans jury (procès expéditifs), 4,488 ou 19.5 pour cent de la totalité, dont 3,113 ou 69.4 pour cent ont été condamnées; jugées en vertu de la loi sur les procès sommaires 17,378 ou 75.5 de la totalité, dont 14,629 ou 84.2 pour cent ont été condamnées. Les chiffres de 1918 étaient les suivants: jugés par jury 1,062 ou 4.9 pour cent de la totalité, dont 565 ou 53.2 pour cent condamnés; procès expéditifs 3,795 ou 17.4 pour cent de la totalité, dont 3,113 ou 59.4 pour cent condamnés; sous la loi des procès sommaires 16,890 ou 77.7 pour cent de la totalité, dont 14,629 ou 84.0 pour cent condamnés.

Le tableau suivant présente le nombre des procès par jury et des procès sans jury, dans les cas de crimes et délits graves, le pourcentage des procès par jury par rapport à l'ensemble, et les pourcentages des condamnations dans les procès, soit par jury, soit sans jury, durant la période 1901-1919.

Année.	Nombre de causes jugées.				Pourcentage des procès par jury par rapport à l'ensemble.	Pourcentage des condamnations.	
	Avec jury.		Sans jury.			Par jury.	Sans jury.
	Acquittements.	Condamnations.	Acquittements.	Condamnations.			
1901	354	287	5,284	2,245	7.8	55.2	70.2
1902	428	352	5,232	2,440	9.2	54.9	68.2
1903	383	321	6,138	2,736	7.4	54.4	69.2
1904	349	335	6,405	2,752	7.0	51.0	70.0
1905	401	311	7,223	2,964	6.5	56.3	70.9
1906	394	191	7,698	2,617	5.4	67.3	74.6
1907	509	410	8,601	2,521	7.6	55.4	77.3
1908	629	425	10,705	3,336	7.0	59.7	76.2
1909	706	414	10,743	3,487	7.3	68.4	75.5
1910	728	439	10,972	3,166	7.6	62.4	77.6
1911	727	433	11,890	3,565	7.0	63.0	77.0
1912	770	439	14,797	4,162	6.0	63.7	78.0
1913	720	366	17,600	5,392	4.5	6.3	76.5
1914	831	518	20,607	6,051	4.8	60.8	77.3
1915	778	527	18,947	5,562	4.9	59.6	78.1
1916	597	433	18,563	4,349	4.3	57.9	81.0
1917	462	385	15,097	3,510	4.3	54.5	80.1
1918	565	497	16,805	3,880	4.9	53.2	81.2
1919	654	501	17,742	4,124	5.0	56.6	81.1

Il résulte de l'état qui précède que le pourcentage des procès par jury, quoique variant d'année en année, a graduellement diminué, la moyenne des trois premières années qui était de un peu plus de huit pour cent étant descendue au-dessous de cinq pour cent pour les trois dernières années. Le pourcentage des condamnations dans les causes avec ou sans jury constitue une documentation importante, car il démontre que les acquittements par jury sont beaucoup plus nombreux que ceux prononcés par les juges siégeant seuls. Pour cette période, 59.4 pour cent seulement des personnes jugées par un jury ont été condamnées, tandis que la moyenne des condamnations ayant frappé les accusés jugés sans jury est de 76.8 pour cent.

## GRÂCES ET COMMUTATIONS.

En 1919, le droit de grâce s'est exercé en faveur de 1,453 condamnés, soit une augmentation de 297 sur 1918. Sur ce nombre 356 ont été libérés définitivement et sans condition, 840 ont bénéficié des dispositions de la loi sur la libération conditionnelle, enfin 284 ont été graciés sous certaines conditions.

Il a été fait remise des amendes dans 168 cas. La durée des emprisonnements a été réduite dans 2 cas et, dans 2 autres cas, remise a été faite de la peine du fouet. Parmi les prisonniers relâchés, 485 étaient dans les pénitenciers, 356 dans les maisons de correction et 461 dans les prisons. 151 de ceux ayant bénéficié d'une remise d'amende n'étaient pas emprisonnés. Ces libérés appartenaient au sexe masculin à concurrence de 1,374 et au sexe féminin à concurrence de 79. Trente-neuf condamnés, ayant déjà bénéficié de la libération conditionnelle ont reçu leur grâce entière, c'est-à-dire 8 de plus que l'année précédente. 6 condamnations à mort prononcées contre des hommes ont été commuées en prison perpétuelle; enfin une femme condamnée à mort a vu sa peine commuée en douze ans de prison.

1919

## REPORT

OF THE

**Inspection of Weights and Measures, Electricity and Gas**

To the Right Honourable  
The Minister of Trade and Commerce.

SIR,—I have the honour to submit the annual report on the Inspection of Weights and Measures, Electricity and Gas; also statements in connection therewith for the fiscal year ended March 31, 1919.

F. C. T. O'HARA,  
*Deputy Minister.*

THE DEPARTMENT OF TRADE AND COMMERCE,  
OTTAWA, September 15, 1919.

Mr. E. O. Way, Chief Inspector of Weights and Measures, reports as follows:—

Owing to its close association with industry and commerce, the Weights and Measures Inspection Service has felt and shows the effects of the war, particularly for the strenuous period of the last year covered by this report. Many business places have been closed, and the output of home scale manufacture, as well as importations of the same, had fallen off considerably, thus reducing the amount of fees collected. At the same time, notwithstanding numerous increases in salary and the increasing cost of travelling, hotel expenses, cartage and freight on standards, etc., the normal expenses of the service show an actual reduction of \$7,001.39 over last year. A contributing factor to this satisfactory showing has been the elimination of several superfluous officers and part-time men, which has resulted in some economy and greater efficiency in every sense of the word. The revenue collected for the year amounts to \$136,497.80 as against \$141,389.40 collected last year, showing a decrease of \$4,891.60.

The total expenditures amount to \$229,885.89 as against \$211,060.39 last year, showing an increase of \$18,825.50, but this total includes the special war bonuses to the sum of \$25,826.89. Deducting this sum, the normal expenditure amounts to \$204,059, which is \$7,001.39 less than last year.

Appendix A gives a summary statement of the receipts and expenditures by divisions.

Gradually is this Weights and Measures Inspection Service coming into its own. Gradually are the public and the merchants beginning to realize the importance and significance of accurate scales and measures, inasmuch as the one purchase all their needs by weight and measure, whilst the success or failure of the other is in the "balance" of his scales. Weights and measures are the counterpart of the currency. Both must be fine and true. Just as neither purchaser nor seller will short change one or two cents, so is it become

10 GEORGE V. A. 1920

equally important that neither give nor receive short weight or measure—for one-half ounce of butter at 60 cents per pound is the equivalent of 2 cents. This phase of weights and measures—the short-weight question—with current high prices and the enormous development of package goods, has almost superseded in importance the actual inspection and accuracy of the mechanical appliances used in trade, for incorrect or dishonest weight can be given even over a correct and duly inspected scale.

In this connection the year 1918-19 has been a notable one for the Weights and Measures Service of Canada. First by its transfer by Order in Council (June 3, 1918) from the Department of Inland Revenue to the Department of Trade and Commerce, where it more properly belongs, and secondly by the enactment of an amendment to the Weights and Measures Act last session, making the giving of short weight, measure, or count a statutory offence, and liable to a penalty of \$25 for the first offence and to \$100 for the second offence. This completes an inspector's authority because he can now see that the scales and measures, etc., used in trade are correct and just, and also that they are used correctly and correct weight given. Lacking the above statutory power, short weight could only be dealt with under the common law or Criminal Code, an indirect and most unsatisfactory proceeding.

Another important amendment requires all weights and measures to be inspected once a year instead of every two years, and establishes the principle of examination for officers before appointment.

The transfer of this service to Trade and Commerce has the material advantage of throwing the Inspection and Sale Act and the Weights and Measures Act, which are to a great extent complementary, into close association and under the direction of one department. The former Act establishes standards of weight and measure for staple commodities, and also deals with package goods and their net-weight marking. The field inspectors of weights and measures on their scale inspection itineraries, are therefore available to see that the packers, etc., are packing correct weight, and have taken up this work with marked success—for a good deal of short weight, and some overages have been found and reported to the principals. These activities will quickly put a stop to carelessness in the commercial weighing departments to the material benefit of the public, for trifling shortages amount to a very great deal in the aggregate, and have the direct result of increasing prices. For example, one-half ounce short on butter at 60 cents per pound raises the price to 62 cents—the shortage of one-quarter ounce on 1 pound of sugar means a loss to the public of 15,625 pounds on one million pounds, or at 12 cents per pound the loss of \$1,875.

The following is a summary of the machines, etc., inspected during the year, of which detailed statement will be found in appendices B, etc.:—

## SUMMARY.

	Submitted	Verified.	Rejected.	Percentage of Rejections.
Weights (Dom.)	59,703	59,238	465	0.78
Measures of capacity (Dom.)	98,282	98,261	21	0.02
"    "    milk cans	77,825	77,794	31	0.03
Babcock glass-ware (pipettes, etc.)	31,837	31,453	384	1.20
Measures of length	7,752	7,737	15	0.19
Weighing machines	102,914	98,701	4,213	4.08
Measuring devices	8,901	8,633	268	3.01
Metric weights and measures	791	791		
"    "    scales	333	309	24	7.02
	388,338	382,917	5,421	1.39

## SESSIONAL PAPER No. 10e

The percentage of rejections is small and does not correctly represent the situation because the inspectors rectify all the weights they find incorrect and adjust a large number of scales and measuring machines wherever possible, otherwise the expense for trifling repairs and adjustments, to scale owners away from industrial centres, would be excessive.

During the year sixty seizures have been made and eight prosecutions, five of which resulted in conviction and fines. In fifty-two cases they were closed with the confiscation of the machines, a good many of them being ignorantly in use when quite incorrect and unfit for repair.

Under the Milk Test Act, 31,837 pieces of Babcock glassware, used in the dairy industry for making butter-fat tests, have been verified and stamped in the Weights and Measures Standards Branch itself, producing a revenue of \$1,573.10—practically the same as last year.

## THE METRIC SYSTEM.

This stupendous question is still the subject of active propaganda on the part of the "pros" and the "antis." An organization in San Francisco has flooded the American continent with a pro-metric pamphlet more enthusiastic than truthful, requesting its readers to write their Government demanding the compulsory introduction of the meter-liter-gram system. To date the department has not received one such written demand from any single manufacturer or commercial house. To-day any production facility is quickly adopted. The motor car and delivery truck have replaced the horse because of their indisputable advantages. Why then, it may be asked, has not the metric system likewise ousted the English system if it has and embodies the advantages which its sponsors claim for it? One reason is that many advocates are theorists and confound the words "decimal" and "metric"—thinking we cannot enjoy the former without the latter, whereas the practical man soon learns that the adoption of the metric system means the introduction of an entirely new unit and an entirely new set of drawings, gauges, templates, tools, etc., because there is no relation between standard English and metric sizes. For instance:—

$\frac{3}{4}$ inch	=	19.05 min.
$\frac{7}{8}$ "	=	22.05 "
1 "	=	25.40 "
$1\frac{1}{8}$ "	=	27.575 "

There is therefore practically no conversion. The same applies to measures of capacity for—

1 quart	=	1.1365 litres.
1 gallon	=	4.5460 "
1 bushel	=	36.3680 "

The bushel is the most important unit by virtue of its relation to grain standards and prices, etc. There is no equivalent in the metric system, so that an entirely new system of grain standards, and for vegetables, would have to be introduced, for—

1 bushel	=	8	gallons.
1 decalitre	=	2.1998	"
1 hectolitre	=	21.9975	"

from which the nearest equivalent to the bushel is seen to be 4 decalitres, which is twice the double decalitre and smaller than a demi-hectolitre.

10 GEORGE V, A. 1920

The finding of the Special Committee of the English Government on "Commercial and Industrial Policy after the War" (1918) must in this connection be given due respect.

*Inter alia*, this report says:—

"It is admitted that the demand for spare parts, replacements, etc., would make it necessary to continue manufacture, for the home markets alone, on our existing system side by side with the new, for a very long period; in such cases as railway locomotives perhaps for a generation.

"We are not satisfied by any evidence which has been brought before us that trade has actually been lost to this country owing to the fact that the use of the metric system is not compulsory. . . .

"Our weights and measures are capable of detailed improvements . . . but we are not convinced that the metric system is upon the whole even theoretically superior to the British system, and we are not satisfied that the practical objections to the proposed change are such as decisively to outweigh any advantages which are claimed for it."

In this connection it must be noted that whilst there are some thirty-four countries claimed as using the metric system, the majority of these are of small account industrially. In other words such cities as London, Manchester, Sheffield, Liverpool, Glasgow Belfast, or New York, Chicago, Philadelphia, and Pittsburg have more population and infinitely more industrial development and production than such entire countries as Serbia, Siam, Montenegro, Uruguay, Equador, Bolivia, or even Chili, Peru, Bulgaria, or Greece. Any change therefore must be most carefully considered and the enthusiasm for uniformity tempered by the actual needs of, and the effects upon, established British American industry.

Mr. Ormond Higman, Chief Engineer, reports as follows on the work done under the provisions of the Electricity Inspection Act, the Gas Inspection Act, and the Electricity and Fluid Exportation Act.

During the progress of the war the inspection work of these services decreased very materially, due mainly to the difficulty experienced by the electric and gas companies in procuring the necessary help to handle the meters. Since hostilities ceased and help became available there has been a very decided increase in the number of meters presented for verification.

The number of meters tested during the fiscal year 1918-19 is as follows:—

Electricity meters.....	140,336
Gas meters.....	73,324
Total.....	213,660

These figures, compared with the previous year, show a decrease in gas meters tested of 1,842, and an increase in electricity meters of 12,943.

The revenue collected from these services for the fiscal year just closed is as follows:—

Electricity inspection.....	\$ 87,421 25
Gas inspection.....	55,701 45
Total.....	\$143,122 70

Compared with the fiscal year 1917-18 these figures show an increase of \$7,900.90 for electricity and a decrease of \$617.60 for gas.

The expenditures for the fiscal year 1918-19 for the combined services amount to \$111,590.96, being an increase as compared with the previous year of \$95.42.

While the above figures show an apparent surplus of revenue over expenditure of \$40,267.12 on the year's operations, it should not be overlooked that the salaries of laboratory and administrative services at Ottawa are at present paid out of the Civil Government vote and do not appear under the head of service expenditures.

## SESSIONAL PAPER No. 10e

Taking into account the fact that increases in salaries have been granted to the somewhat underpaid staff of inspectors and their assistants, and the further fact that some expenditures will of necessity have to be made on maintenance of equipment, which have been largely withheld during the war, it is estimated that the revenue and expenditure for the fiscal year ending March 31, 1920, will about balance.

The standardizing laboratories at Ottawa and Vancouver have continued the work of periodically checking the secondary or inspectional standards, thus ensuring accuracy in the work of our inspectors. In addition to this the Ottawa laboratory, in spite of 50 per cent of its staff being overseas, has conducted a large number of electrical tests for the War Purchasing Board, the Wireless Branch of the Marine Department, and the Department of Public Works. The equipment of the electric and gas standards laboratory at Winnipeg is now proceeding and, it is expected, will be ready for work during the ensuing summer.

The checking of our primary electrical standards with the Bureau of Standards primaries at Washington should receive attention at an early date. Such international checking is most desirable in order that accuracy be maintained.

The details of operations under the various Acts administered by this branch are set out in the accompanying appendices to the report.

## APPENDIX A.

## STATEMENT of Weights and Measures Expenditures and Revenues.

FIRST ANNUAL REPORT

OF THE

DOMINION STATISTICIAN

FOR THE

FISCAL YEAR ENDED MARCH 31, 1919

THE DOMINION BUREAU OF STATISTICS  
ITS ORIGIN, PURPOSE AND ORGANIZATION

---

*PRINTED BY ORDER OF PARLIAMENT*

OTTAWA  
J. DE LABROQUERIE TACHÉ  
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY

1919

LETTER OF TRANSMITTAL.

*To His Excellency the Duke of Devonshire, K.G., P.C., G.C.M.G., G.C.V.O., etc., etc.,  
Governor General and Commander in Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to submit herewith, for the information of Your Excellency and the Parliament of Canada, the First Annual Report of the Dominion Statistician, under Clause 4 of the Statistics Act, 1918, (8-9 George V., Chap. 43).

The report contains a description of the Origin, Purpose, and Organization of the Dominion Bureau of Statistics, established under the Act in 1918.

I have the honour to be,

Your Excellency's most obedient servant,

GEORGE E. FOSTER,  
*Minister of Trade and Commerce.*

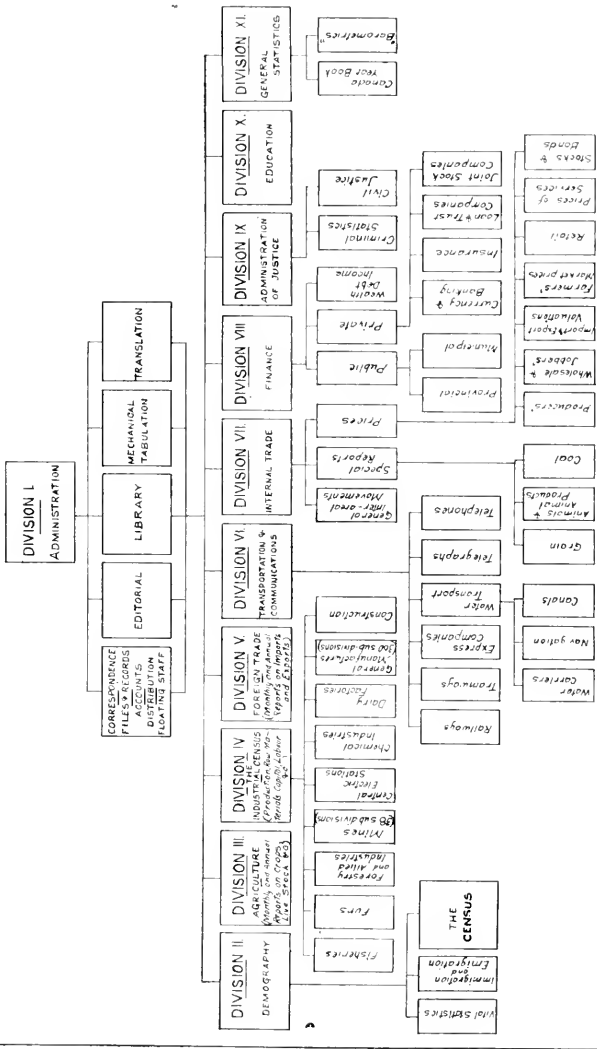

DEPARTMENT OF TRADE AND COMMERCE,  
OTTAWA, March 31, 1919.

# FIRST ANNUAL REPORT

OF THE

## DOMINION STATISTICIAN, 1918-19.

---

To the Right Hon. Sir GEORGE E. FOSTER, P.C., G.C.M.G.,  
Minister of Trade and Commerce,  
Ottawa, Canada.

SIR.—The present is the first report to be made under the Act respecting the Dominion Bureau of Statistics, passed during the parliamentary session of 1915 (to be cited as "The Statistics Act"), which requires the Dominion Statistician, as the officer charged with the supervision and control of the Bureau, "to report annually to the Minister with regard to the work of the Bureau during the preceding year." (S-9 George V, c. 43, s. 4.)

Several features of the past year's work in statistics have been of exceptional importance, including the establishment of annual statistics of agriculture in co-operation with all the provinces; the reorganization of the statistics of exports and imports; the expansion of the statistics of production and of internal trade; the holding of two conferences between Dominion and Provincial officials looking to a Dominion-wide system of vital statistics; the carrying out of the statistical work of the Canada Registration Board; the beginning of systematic treatment of the statistics of public finance; and the issue of a "Jubilee Volume" of the Canada Year Book.

The outstanding event of the year, however, was the passing of the Statistics Act, which established the Dominion Bureau of Statistics and inaugurated a new policy and organization for the official statistics of Canada. The Bureau was a product of evolution rather than of creation, the Act representing the culmination of plans which had been under consideration for some time. It has been thought, therefore, that the first administrative report under the Act should take the form of an explanation of the significance and purpose of the new legislation, and of a rather inclusive description of the work and arrangements of the Bureau in carrying them into effect. This is done in the statement which appears in the following pages entitled "The Dominion Bureau of Statistics—Its Origin, Purpose, and Organization." The developments of the past year just enumerated thus appear in their proper setting; an outline is given which will be of practical utility in the working out of arrangements still to be completed; whilst a suitable background is provided for future reports.

Not least of the lessons of the war is that the days of *laissez faire* are gone, and that statistics must more and more become the guide of Government as the haphazard methods of the past are outgrown. It is significant that Italy, noting doubtless the effectiveness of the *Statistisches Reichs Amt* as a German weapon, reorganized her statistics in 1917 as a war measure. It was a British High Commissioner to the United States who, in 1917, stated that statistics were winning the war for England. In the United States, it is safe to say that statistical organization doubled in scope during the year which followed the entrance of that country into the war. In the part that Canada must play in the era of peace and reconstruction that is now dawn-

10 GEORGE V. A. 1920

ing, no small issue will undoubtedly depend on the carefully classified and analysed knowledge she can muster of her resources and their possibilities—in other words, on her statistics.

Statistics wear a dry-as-dust and repellant look to many. The aversion to so-styled "arithmetical literature" has been explained by Mr. Knibbs, Commonwealth Statistician of Australia, as probably a reminiscence of school-day experience. The statistics of a nation are, in point of fact, the quantitative expression of the character and activities of the people, and hence are of the most profound significance. Once mere by-products of departmental accounting, they have long since passed the stage of being ancillary to administration in the narrow sense and are a scheme of organization in themselves, framed with the broadest purposes in view. Their application is now, in fact, so general that a review like the following may have an interest if only as a correlated statement of the features in modern life which are of importance from a sociological and economic standpoint, the ceaseless interplay of which forms that bewildering composite usually described as the progress of the nation.

I have the honour to be, sir,

Your obedient servant,

R. H. COATS,

*Dominion Statistician.*

DOMINION BUREAU OF STATISTICS,

OTTAWA, March 31, 1919.

## THE DOMINION BUREAU OF STATISTICS—ITS ORIGIN, PURPOSE AND ORGANIZATION

The establishment of the Dominion Bureau of Statistics under the Statistics Act, assented to on May 24, 1918 (S-9 George V, c. 43), marks a fundamental departure in statistical policy and organization, and the beginning of a new era in Canadian official statistics. Briefly, the Statistics Act, which it is the function of the Bureau to administer, calls for the centralization and consolidation of all the purely statistical work of the Government—with provision for its organization on a scale commensurate with the national needs. The Bureau, it must be stated at once, was not created *de novo*, but was an outgrowth of the "Census and Statistics Office," in existence since 1905; moreover, the reorganization of statistics along the lines indicated by the Act had been in progress since 1916. The Act, however, crystallized and enlarged what had before been only tentative and partial, and may justly be said to have formally inaugurated the new régime. In proceeding, therefore, to a review of the reorganization which is now being effected and of the purpose it has in view (incidentally affording a practical guide to existing and projected statistics), it will be of interest first to sketch the history of statistical progress in Canada, and more particularly the conditions of the past decade which led to the passing of the Statistics Act. Thereafter, a detailed account will be given of the Bureau, and of the several divisions formed or forming in which the statistical work of the future will be carried out.

### Historical.

The history of statistical development in Canada may be divided roughly into three periods: (1) the period of the early French and English colonies; (2) the period of the United Provinces, culminating in reconstruction at Confederation; and (3) the modern period, dating from the Census Act of 1879, and falling into two broad phases, the line between which may be placed at 1905. These periods are not sharply differentiated, statistics having been an unconscious rather than a conscious growth; they are, however, in the later stages marked off by legislation which affected considerable sections of the field and may be said to constitute a dominating influence.

*The Early French and English Colonies.*—It may not be generally known that the credit of taking the first census of modern times belongs to Canada. The year was 1666, the census that of the colony of New France. Still earlier records of settlement at Port Royal (1605) and Quebec (1608) are extant; but the census of 1666 was a systematic "nominal" enumeration of the people (i.e., a record of each individual by name), taken on the *de jure* principle, on a fixed date, showing age, sex, occupation, and conjugal and family condition. It is, therefore, clearly a census in the modern sense, and not a mere report of settlement, like its precursors. The results (showing 3,215 souls) occupy 154 pages in manuscript deposited in the Archives of Paris, with a transcript at Ottawa. Two years later a supplementary inquiry included the areas under cultivation and the numbers of sheep and cattle.

Similar censuses of Acadia (Nova Scotia) and Newfoundland followed in 1671. These initial experiments were evidently held to justify themselves, for within the next hundred years the process was repeated several times, and was gradually extended to cover all the French colonies in America.

After the British Conquest (1763), numerous memoranda on population and other statistics by colonial governors are on record, and censuses of the different sections under British rule (Upper and Lower Canada, Nova Scotia and New Brunswick) continued to be taken at frequent though irregular intervals. A full account and summary of these may be found in volume IV of the Report of the First Census of Canada (1870-71), a volume designed to start the new Dominion on its career with a review of all previous statistics appertaining to the territories within its domain.

When it is recalled that in Europe the first censuses (those of certain of the German Kingdoms) date only from early in the eighteenth century (those of France and England dating from the first year of the nineteenth), whilst in the United States no census was taken before 1790, the achievement of the primitive St. Lawrence colony in instituting what is to-day one of the principal instruments of government in every civilized community, may call for more than passing appreciation.<sup>1</sup>

*The United Provinces.*—The policy of desultory census-taking was ended for Canada in 1847 by an Act which represents the first legislative attempt to bring official statistics under control. The Act created a "Board of Registration and Statistics," with instructions to "collect statistics and adopt measures for disseminating or publishing the same," and to report annually to Parliament. It also provided for a decennial census. The Board was originally composed of the Receiver-General, the Provincial Secretary, and the Inspector-General, but in 1857 the Minister of Agriculture was substituted for the Inspector-General, and became Chairman of the Board. Thus originated the connection maintained for over half a century between the Census of Canada and the Ministry of Agriculture. Two censuses were taken under the Act of 1847, in 1851 and 1861, respectively. Censuses of Nova Scotia and New Brunswick were taken in the same years.

*Reconstruction at Confederation.*—For some time prior to Confederation, dissatisfaction had been felt with the working of the Act of 1847. This culminated in 1865 in a report by the then Minister of Agriculture, the Hon. T. D'Arcy McGee, which included a memorial by Dr. J. C. Taché, Secretary of the Board of Registration and Statistics. The strictures in this report on existing conditions were of the severest

<sup>1</sup> An article on "Census-taking in various countries" which appeared in the *Census and Statistics Monthly*, vol. IV, 1911, pp. 94-96, and which dealt with the origin of Census-taking, may be of interest for purposes of reference here.

Mr. G. H. Knibbs, C.M.G., F.S.S., Commonwealth Statistician of Australia, has the following note on early Census-taking: "Though the practice of Census-taking, in some form or other, is probably as old as any form of civilization, the institution now known as the Census may be said, in so far as its scope and application are concerned, to have been evolved only during the 19th century. We at least know that in Babylonia statistical inquiries were carried out as far back as 3800 or perhaps even 4500 B.C., whilst in China enumerations of the people took place certainly as early as about 3000 B.C., and in Egypt in about 2500 B.C. It is not without interest to note that the first Biblical account of an enumeration of the people is that referred to in the Book of Exodus (Exodus, xxx, 12), where it is stated that Moses was directed to number the Children of Israel and to levy a poll tax, the assigned date of this being 1491 B.C. There are several other Biblical references to Censuses (Numbers, i, 1-3 and 47-49; Numbers iii, 14, etc., and 14, 34, etc.; 1 Chronicles, xxiii, 3, etc.; 2 Chronicles, ii, 17; 2 Samuel, xxiv, 1-9; Ezra, ii, 1-61; Nehemiah, vii, 6-69). The most notable of all these is, perhaps, that carried out in 1017 B.C. by the Hebrew King David. Strange as it may appear to-day, there is good authority for believing that the Biblical account of the Divine wrath (1 Chronicles, xxvii, 24. See also 1 Chronicles, xxi, 1-6), resulting from the action of David in carrying out this enumeration of the Israelites, gave rise to the idea that the act of Census-taking was in all cases a religious offence, and consequently had the effect of delaying the adoption of the Census in England for many years. A form of Census, taken every quinquennium for fiscal and military purposes, was a regular Roman institution, and lasted from about 435 B.C. until the sacking of Rome (A.D. 410). After the latter date, although various works of a statistical nature, notably the *Breviary of Charlemagne* (A.D. 808) and the *Domesday Book of William the Conqueror* (A.D. 1086)—were compiled in Europe during the Middle Ages, we have no record of any further Census having been taken until the 17th Century. The credit for the revival of systematic enumeration belongs to the Canadian Province of Quebec, or La Nouvelle France, as it was then called. There, a Census was taken in 1666, and at a somewhat later date Censuses were also taken in Nova Scotia (then Acadia) and Newfoundland."

## SESSIONAL PAPER No. 10f

character. Notwithstanding the express provisions of the Act, no statistics, it was affirmed, had been collected or published, except those of the two decennial censuses, and the latter abounded in inaccuracies and inconsistencies ("absurdities of the most ridiculous character") notwithstanding that over \$260,000 had been expended on their preparation. The report concluded with a plea for "real Canadian statistics" to be achieved under a series of nine recommendations which may be resolved into two: (1) the working-over, collection, and republication of Canadian statistics from the earliest times, and (2) the taking of a census in 1871 by way of bringing the series of statistics thus obtained to date and of laying foundations for a better future on improved methods. "Such a mass," wrote Dr. Taché, "of well-prepared information on the territorial, vital, religious, educational, administrative, judicial, agricultural, commercial, industrial and financial statistics of our country would constitute a monument at which the enlightened part of the population would look with complacency, and other countries with a great deal of interest." The proposals of the report were to a large extent adopted, and Dr. Taché was himself appointed Commissioner for the Census of 1871, which was taken under a special Act passed in 1870. Meanwhile, the British North America Act, 1867, had specifically mentioned "Census and Statistics" among the subjects falling under the jurisdiction of the Dominion Government, as requiring national rather than local direction, whilst the Act establishing the Dominion Department of Agriculture in 1868 named "the Census, Statistics and the Registration of Statistics" as the sixth of nine subjects under its control.

*The Modern Period.*—From a legislative standpoint, the statistical system which lasted until 1918 may be said to date from the "Census and Statistics Act" of 1879. The Act required a census to be taken in 1881 and "at the beginning of every tenth year thereafter." A section headed "Statistics" provided that the Minister of Agriculture should, from time to time, make rules and regulations "for the purpose of collecting, abstracting, tabulating and publishing vital, agricultural, criminal, and other statistics." As administered, however, the Act was mainly a Census Act, and took little cognizance of general statistics. These, for the most part, grew up independently, and only briefest mention of them is possible here: A miscellaneous collection of municipal, insurance, and building society statistics had been brought out in an annual volume by the Department of Finance prior to 1873. From the earliest times, the statistics of imports and exports had been recorded by the Department of Customs; after 1893 these statistics were also published in made-over form by the Department of Trade and Commerce. A Railway Statistics Act had been passed in 1873, and a Criminal Statistics Act in 1876. Statistics of banking and public finance were present from the beginning, as were those of certain phases of production, notably fisheries. A scheme of mortuary statistics for leading cities dated from 1883. In general, each department published such statistics as were thrown off by its administrative machinery. The only medium for co-ordination was the Statistical Year Book, which came into existence in 1886; the general statistical sections of the Act of 1879 had in that year been erected into a separate statute, and the Year Book was brought out thereunder.<sup>1</sup> The decennial census, however, remained the most comprehensive statistical inquiry in Canada, and the sole authority upon many important phases of national activity. With the opening of the West, the practice of taking a census for these rapidly growing sections

<sup>1</sup> Immediately after Confederation a "Year Book and Almanac of British North America, being an Annual Register of Political, Vital and Trade Statistics, Customs Tariffs, Excise and Stamp Duties, and Public Events of Interest in Upper and Lower Canada, New Brunswick, Nova Scotia, Prince Edward Island, Newfoundland and the West Indies" was founded. Subsequently this title was altered to "The Year Book and Almanac of Canada, being an Annual Statistical Abstract of the Dominion and a Register of Legislation and of Public Men in British North America." The editor was Mr. Arthur Harvey, of the Finance Department, Ottawa, but the work was in no sense a government publication. It lasted from 1867 to 1879.

midway between the general censuses was inaugurated in 1885 with a census of the Northwest Territories and in 1886 with a census of Manitoba. The latter was repeated in 1896, and was extended to the other Prairie Provinces in 1906 and 1916.

A new but not essentially different phase was introduced in 1905, when the Census Office was made permanent. Previously, what amounted to a new organization had been called into existence for each census. The United States had made its census permanent in 1902, and there were potent reasons for similar action in Canada, notably the need of a trained and experienced staff for work so important and unique, and of the maintenance of a uniform policy and technique.<sup>1</sup> The "Census and Statistics Act," 1905, was of the nature of a consolidation of the Census Act, the Statistics Act, and the Criminal Statistics Act. The new "Census and Statistics Office" was placed under the direction of a "Chief Officer" whose duties comprised the taking of the decennial and quinquennial censuses of population, natural products, and economic resources, and the prosecuting of such special intercensal inquiries as might be ordered from time to time by the minister. The Act made several improvements in statistical machinery.

A considerable amount of new work of original character was undertaken by the reorganized office after 1905, including a postal census of manufactures in 1906, and postal censuses of dairying and agriculture in 1907. In 1908, a crop-reporting service was instituted, the results being issued in a monthly bulletin. No attempt, however, was made to work with other statistical departments. The Year Book was, in fact, remodelled in 1905 by omitting education, vital, municipal, and other statistics of provincial origin, though the review of Dominion departmental statistics was maintained. Meanwhile the latter continued to multiply. The immigration statistics of the Department of the Interior date from 1897; statistics of forestry, issued by the Forestry Branch of the Department of the Interior, from 1908; statistics of mining production (reorganized) from 1906; and statistics of unemployment, strikes, wages, and prices from different years of the opening decade of the present century. Statistics of transportation and communications were reorganized in 1907.

It would be interesting to describe in a less impersonal way the growth of this considerable body of data, and possibly in some future report to trace more intimately the conditions surrounding the beginnings of statistical work in Canada and some of the difficulties that met its pioneers. The decennial censuses, as already remarked, were the outstanding landmarks. Those of 1871 and 1881 were taken by Dr. Taché, whose report in 1865 was so far-reaching in its effects. The third census, (1891) was taken under supervision of the late Dr. George Johnson, and the fourth (1901) and fifth (1911) under that of the late Dr. Archibald Blue, as special census commissioners. How the scope of the census increased from decade to decade may perhaps be most succinctly indicated by the accompanying tables, which include certain obvious and important indices of growth, although they are, of course, by no means a final criterion. It will be seen that whilst population doubled, the extent and cost of the inquiry increased more than proportionately.

<sup>1</sup> For a detailed discussion of the point, see "A Permanent Census Office," prepared at the request of the Chairman of the Committees on the Census, U.S. Senate and House of Representatives, Washington, 1901.

\* Includes cost of adding and tabulating machines and the installation of the latter.

*Provincial Statistics.*—A word may be added on provincial statistics. The British North America Act did not, of course, preclude the collection and publication of statistics by Provincial Governments. In the provinces, as in the Dominion, the practice has been for each department to publish the statistics it considers desirable, usually in the form of annual reports to the Legislature. Ontario has the longest established and until recently the most completely developed series, but statistics of a sort have existed in all the provinces from the earliest times. Some of these have overlapped and duplicated Dominion statistics, as in agriculture, dairying, insurance, and mining; in other cases, the provincial figures have been the only ones in the field, as in education, municipal and vital statistics. In all cases, each province and each department within the province has proceeded for the most part independently, thus rendering interprovincial comparisons on any extended scale extremely difficult, and Dominion totals impossible.

An exception must be noted in the case of Quebec, until 1912 one of the most backward of the provinces statistically, but now among the most progressive. By an Act of the Legislature, dated December 21, 1912, a Bureau of Statistics was created for the collection and publication of useful statistics and information, especially with regard to education, industry, trade, agriculture, population and colonization. For the preliminary organization of the work, M. Henri Bunle, Statistician in the General Statistical Service of France, was engaged; on the completion of this survey, a chief of the bureau was appointed in the person of M. G. E. Marquis, and substantial progress has since been registered. The chief organ of the Bureau is a Statistical Year Book, published in the French and English languages.

### The Statistical Commission of 1912.

Such in briefest outline was the situation which had developed in Canadian statistics in the opening decade of the century. A considerable body of statistical publications had grown into existence; in certain sections of the field good work was being done—in many others not so good; there was much duplication, at the same time that there were numerous gaps, often at crucial points; finally, there was a total lack of general plan or provision for consistent progress. The embarrassment which this occasioned with the rapid growth of the country and the increasing complexity of its problems, many of which called in the most insistent way for statistical treatment, will be appreciated. It led in course of time to much search for a remedy, and at length to the step which brought remedial action within reach.

On April 1, 1912, the Census and Statistics Office was transferred to the Ministry of Trade and Commerce, with general reorganization in view. A few weeks later, the step to which reference has just been made was taken, namely, the appointment on May 12, 1912, of a departmental commission "to examine and report upon the official statistics of Canada."<sup>1</sup> The Order in Council appointing the commission set forth in general terms the evils for which it was expected to find a cure. Outside of the decennial census, the reference affirmed, no comprehensive system of statistics was in existence. Especially to be deprecated was the dearth of statistics of production and of the distribution of Canadian commodities within the country itself. The duplication of effort between departments was referred to, and the opportunity for co-operation with the provinces pointed out, the suggestion being made that Dominion and provincial effort should be co-ordinated, and a central statistical organization set up. The commission was in fine directed to inquire into all the statistical work going forward in the several departments, its scope, methods, and reliability, and with a view to practical results, "to report a comprehensive system of general statistics adequate to the interests of the country and in keeping with the demands of the time."

The commission duly presented its report, and it is interesting before going further to quote the general confirmation of the unsatisfactory nature of existing conditions with which they prefaced their findings—a statement which may be regarded as the final word on the method under which Canadian statistics had thus far been permitted to develop. Referring to the remarks contained in the reference as paraphrased above, the commission said:—

"Though many of the statistical reports issued by various departments and branches are of undoubted excellence and value, there is apparent in the body of Canadian statistics, considered as a whole, a lack of coherence and common purpose. This is traceable to imperfect appreciation in the past of the fact that the statistics of the country, whether the product of one agency or several agencies, should constitute a single harmonious system, with all divisions in due correlation. Under the British North America Act, 1867, the Dominion is given specific authority to deal with 'statistics,' and while this must not be regarded as precluding statistical activity on the part of local governments it does apparently imply that statistics are a matter of national concern and may therefore properly come under the general co-ordinating authority of the Federal Government. No such viewpoint or function, however, has in the past been assumed by the Dominion. On the contrary each department or branch, charged either directly or indirectly with statistical investigation, has con-

<sup>1</sup>The members of the Commission were Richard Grigg, Commissioner of Commerce, Chairman, and Adam Shortt, Civil Service Commissioner, E. H. Godfrey, Census and Statistics Office, W. A. Warne, Department of Trade and Commerce, R. H. Coats, Department of Labour, and J. R. K. Bristol, Department of Customs.

## SESSIONAL PAPER No. 10f

cerned itself primarily with the immediate purpose only in view. This is, from the usual standpoint, quite as it should be; a department is not to be expected to regard points of view beyond the scope of the administration assigned to it. Nevertheless, the effect statistically has been to inculcate routine and the neglect of opportunities for furnishing wider information and service.

"While this detachment has characterized the departments of the Dominion Government, still more has it been evident as between the several provinces and the Dominion, and between province and province, notwithstanding that the national importance of many of the functions of the provincial governments under Confederation calls urgently for statistical uniformity and homogeneity. This general condition we would consider to be the fundamental defect which must be met and overcome in the existing situation. Some of the unfortunate results which have followed may be briefly noted.

"(1) The scope of Canadian statistics has been restricted. On not a few points of vital interest to the country little or no statistical information exists in a form suitable for practical application. There has been no general comprehensive answer to the question, what statistics should a country such as Canada possess? i.e., what are the phenomena requiring the scientific measurements supplied by statistics if Canadian national development is to proceed to the best advantage? It may be argued that the demand for statistics may be trusted to create the supply; but to wait for the occasion to arise is often to be too late, and such a policy precludes the growth of a statistical system along logical lines.

"(2) Where the statistical activities of several bodies working along similar lines are virtually independent, duplication is inevitable. The notes of evidence show many cases both of actual duplication and of serious waste of effort through lack of co-operation between statistical authorities.

"(3) The statistics are unequal in quality and value. There are instances, both Dominion and provincial, of imperfect statistical method resulting from (a) lack of expert knowledge of the subject under investigation and (b) lack of appreciation of the nature and conditions of statistical measurement. The absence of leadership is nowhere more apparent than in the varying extent to which statistical methods have been developed in different branches. The whole question of reliability is involved in this. Without careful adjustment of method accuracy is impossible. On such a point no more severe criticism is possible than the statement that room for improvement exists.

"(4) The restriction of outlook has impaired promptitude in the issue of reports. Many statistics lose a large part of their value after a comparatively short lapse of time. Especially is this true in a rapidly-growing country like Canada.

"(5) Lack of unity and co-ordination prevents true comparisons between Canada and other countries. The recent growth of international trade and intercourse has rendered such comparisons more than ever necessary, and they have become indispensable to the national progress of Canada."

Before leaving this aspect, it may be said that whilst the above constitutes the most comprehensive arraignment that has appeared of the Canadian statistical scheme other weighty authorities have borne witness to the inconvenience and worse caused by its inequalities and lack of system. Indeed, few public inquiries have been made in recent years without uncovering this feature. Almost simultaneously with the Statistical Commission, the Ontario Commission on Unemployment passed a resolution strongly advocating statistical reform, whilst the Municipal Improvement League of Canada and the Dominion Economic Commission drew attention to fields of first importance in which existing statistics were either wholly lacking or were inadequate to the country's needs.

### The Remedy Centralization.

Next, as to the remedy. On the subject of general statistical organization, the commission recommended as follows:—

(1) That there be created a Central Statistical Office to organize, in co-operation with the several departments concerned, the strictly statistical work undertaken by the Dominion Government.

The object of this organization should be to co-ordinate the statistics of Canada under a single comprehensive scheme and so to extend them that they may meet the present needs of the country and follow the probable course of its development. To borrow a phrase employed in a similar connection by an eminent statistician, the object of such a reorganization should be primarily to constitute a "central thinking office" on the subject of the statistics of Canada. Describing the possible functions of such an office in Great Britain, Mr. Bowley wrote<sup>1</sup>:—

"Such an office must have cognizance of all the statistics of more than departmental importance which are published officially . . . . Misleading statistics must be suppressed, overlapping must be stopped, careful plans must be devised for filling in the gaps at present left and preparations made for investigation of matters likely to become of public importance. All Bills involving or affecting the collection of statistics should be considered by it . . . . Publications for the use of the public should in some cases be edited by it, with careful definitions, and with short analyses and criticism stating accurately and intelligibly the purport and meaning of their contents; in other cases, where a department already exists for such publication, there should be co-operation with a view to carrying out the purposes already indicated.<sup>2</sup>

This so well expresses our own views as to the scope and functions which the proposed Canadian Office should assume that we cannot do better than allow it to stand as a part of the report, adding that the examples of Germany and Australia show that the idea is both practicable and valuable.

(2) In order to give effect to this recommendation, it may be necessary to enact fresh legislation or to amend the present Census and Statistics Acts.

(3) The Central Office referred to should, we think, carry out the general policy and the various specific recommendations of the present report."

The report went on to outline how the above could best be carried into effect. With respect to a number of subjects, specific recommendations were made, but it was pointed out that a more detailed examination of the field as a whole than the commission had been able to give was necessary before exact procedure could in any case be laid down. The intention of the report was in fact to be suggestive, rather than constructive, and the commission expressly urged that the first task in the proposed reconstruction should be the formulation of a comprehensive plan of statistics having reference to such matters as the scope of the data to be included, the agencies best qualified to cover the several subdivisions, and the precise manner in which the data in each subdivision should be collected, compiled, and published. In general, it was

<sup>1</sup> The Improvement of Official Statistics, by Arthur L. Bowley, M.A., Journal of the Royal Statistical Society vol. LXXI, pt. III, September 30, 1908, p. 478.

<sup>2</sup> Mr. Bowley further recommended procedure (for Great Britain) as follows: "Let an office be formed, whose first duty shall be to undertake the decennial census and frequent supplementary inquiries. Let it co-operate with, perhaps ultimately absorb, the Registrar General's departments. Let it take over the tabulation and publication of statistics collected by administrative departments. Let it arrange a *modus vivendi* with the Board of Trade in whatever way will secure the best delimitation of functions and completeness of information. It should, perhaps, be subject for constitutional purposes to the Treasury."

## SESSIONAL PAPER No. 10f

suggested that the proposed central office should work in close co-operation with Dominion departments concerned in the statistics through an advisory committee, and that a working plan for inter-provincial co-operation should also be evolved. Full discussion, it was thought, would open a door to a solution of the more important difficulties of detail, the lack of national statistical direction and initiative being in the opinion of the Commission the feature which chiefly called for remedy under existing conditions.

**Action on the Commission's Report.**

The first step in carrying out the report of the commission was taken on June 19, 1915, by the creation of the office of "Dominion Statistician," to which were attached the duties previously exercised by the "chief officer" of the Census and Statistics Office. The title "Dominion Statistician" had been borne by the editor of the Year Book previous to 1904, but the significance now attached to it was widened to include direction of the various statistical activities comprehended in the proposed scheme of enlargement and centralization. As the latter, however, was still tentative, the first duty, in addition to the ordinary administration of the office, was the minute examination of the statistical field as enjoined by the commission, and the drawing up of final and definite plans. The work was interrupted by the Western Census of 1916, but on December 6, 1916, an Order in Council was passed reaffirming the desirability of centralization in statistical organization, and arranging for conferences between the Census and Statistics Office and the several departments concerned. In the practical discussions which ensued, some time further was consumed. On their conclusion, however, it was felt that a thorough canvass had been made of possibilities, and it was decided to proceed by way of legislation along the lines that appeared feasible.

**The Statistics Act, 1918.**

The Act "respecting the Dominion Bureau of Statistics" (to be cited as the "Statistics Act"), passed at the session of Parliament of 1918, is the measure designed to give final form to the statistical policy of Canada. It crystallizes the suggestions of the Statistical Commission in the light of subsequent research, and with the regulations thereunder lays down a definite plan for the organization and development of statistics. Structurally, the Act is a consolidation of previous statistical legislation of the Dominion Government, including the Census Act, the General Statistics Act, the Railway Statistics Act, and the Criminal Statistics Act—with additions to render the scheme comprehensive. Specific sections deal with the decennial and quinquennial censuses of population and agriculture, an annual census of industry (to include mines, fisheries, forestry, manufactures), the statistics of trade and commerce (foreign and internal), transportation statistics, criminal statistics, and general statistics. Many improvements and additions in detail are made, and the general machinery of administration is considerably strengthened. But the most significant section is that which provides for the creation of the Dominion Bureau of Statistics and broadly defines the latter's functions. The Bureau is charged with the general administration of the Act. Its duties are "to collect, abstract, compile and publish statistical information relative to the commercial, industrial, social, economic and general activities and condition of the people." To these, however, is added the task of collaborating with all other departments of the Government "in the compilation and publication of statistical records of administration." Finally, the taking of the census is under its jurisdiction.

The above, it will be seen, confers what may be regarded as complete jurisdiction in statistics. Particularly significant is the provision for collaboration with the other

10 GEORGE V, A. 1920

departments, the interpretation of which is, briefly, that where statistics necessarily originate as by-products of departmental administration and their compilation is in the nature of departmental accounting, they should not only meet departmental requirements, but should conform, under arrangements with the Bureau, to the general needs of statistics from the broadest point of view. In other words, provision is made for the organization of the inquisitorial powers possessed by the Government in different connections to the best statistical advantage. Inquisitorial powers are conferred on (1) departments having executive control in specific fields in connection with the exercise of that control, and (2) upon the Dominion Bureau of Statistics for informational purposes. Where the two sets of powers are parallel they are to be organized from the statistical standpoint in co-operation. All other statistics are vested in the Bureau. The multiplication of inquiries by departments having no legal powers to demand response, and the resultant carelessness inculcated in the public, has provided not the least of latter-day handicaps to statistical efficiency.\*

In order to define the principle explicitly, and to provide for arriving at satisfactory interdepartmental adjustments, an Order in Council under the Act was passed October 12, 1918, as follows:—

The Committee of the Privy Council have had before them a report, dated October 7, 1918, from the Minister of Trade and Commerce, submitting that section 3 of the "Act respecting the Dominion Bureau of Statistics," passed at the last session of Parliament, imposes upon the Bureau the duty of collecting, abstracting, compiling and publishing statistical information relative to the commercial, industrial, social, economic, and general activities and condition of the people, and of collaborating with all other Departments of the Government in the compilation and publication of statistical records of administration, and that at the present time statistics are being compiled and published in various departments and branches of the public service, resulting in some cases in unnecessary expense and overlapping.

The Minister, therefore, recommends as follows:—

(1) That all purely statistical investigations relative to the commercial, industrial, social, economic and general activities of the people shall be carried out in the Dominion Bureau of Statistics;

(2) That with respect to such records of any department or branch of the public service as are of a statistical character the Dominion Statistician shall confer with the head of such department or branch with a view to arranging that such records be collected, and compiled in so far as possible in conformity with the methods and organization established in the Bureau, the object of such

\* As between (a) complete consolidation of statistical staffs under a single control, and (b) co-ordination under different controls through a commission, the Act provides for consolidation, though leaving room for adjustments in the light of expediency.

Whether statistics is an independent science or merely a highly technical method of presenting facts to be evolved by each science in turn, the principle of each specialist compiling his own statistics has been less frequently followed in government departments than would in a superficial view be supposed. For example the mining statistics of the Mines Department have not been compiled by the departmental experts on copper, iron, coal and the like products but by a statistician attached to the department. Canadian railway statistics have likewise been popularly regarded as decentralized because attached to the Department of Railways and Canals, whereas in reality they have been self-centred, the control of Canadian railways being vested in the Board of Railway Commissioners, whilst the department's function has been to operate the Intercolonial Railway and Canadian Canal system, and to pass on applications for the building of new railway lines. The intercensal statistics of agriculture, again, might be conceived to have shifted from a decentralized to a centralized condition with the passing of the Census and Statistics Office in 1912 from the Department of Agriculture to the Department of Trade and Commerce, carrying the agricultural statistical work with it; in reality there was no change in the practical relation of the work—a fact that shows how purely verbal such distinctions may be. The task of centralization is therefore less difficult than is sometimes supposed, once the principle is accepted as matter of government policy.

## SESSIONAL PAPER No. 10f

arrangement being the prevention of overlapping, the increase of comparability, and the utilization of departmental organizations in the best manner for statistical ends;

(3) That after such conference the Dominion Statistician shall, at as early a date as practicable, prepare a report on the statistical work of each department or branch of the public service, with a view to carrying out the above requirements, such report to be submitted to Your Excellency in Council for approval with a view to effecting a permanent arrangement for dealing with the statistics collected by the Government; and

(4) That to further promote efficiency and economy, all statistical compilations for the Government be carried out in so far as practicable by mechanical appliances, and that for this purpose use be made of the machines installed in the Bureau of Statistics.

The Committee concur in the foregoing recommendations, and submit the same for approval.

Under the above, adequate means were provided for the working out of the scheme of centralization in so far as the Dominion departments are concerned. It remains to add that the Act also provides the machinery for provincial co-operation—which in view of the extent of provincial jurisdiction is no less essential to statistical organization than is co-operation between Dominion departments—by a clause enabling the Bureau to enter into arrangements for the collection and supplying of statistical data through provincial departments or officers, the latter when executing any duty in this connection to be deemed, for purposes of the execution of that duty, officers under the Statistics Act.

### Organization under the Statistics Act, 1918.—The Dominion Bureau of Statistics.

We may now turn to a statement of the organization that has been effected under the Statistics Act, 1918. Though still under development and in places tentative, the plan to which the Bureau is working admits of review in some detail.

At the close of its initial year, the Bureau was embraced in eleven main divisions. Division I, devoted to Administration, was, as the name implies, in executive and general control. The actual field of statistics was apportioned among the remaining divisions as follows: Division II, Population (Demography)—The Census; Division III, Agriculture; Division IV, The Industrial Census (fisheries, furs, forestry, dairy factories, mines, central power stations, general manufactures and construction); Division V, Exports and Imports; Division VI, Transportation (Land and Water); Division VII, Internal Trade, Prices, etc.; Division VIII, Finance (Public and Private)—Wealth, Debt, Taxation; Division IX, Administration of Justice; Division X, Education; Division XI, General Statistics—The Canada Year Book.

In describing the work of the above divisions in turn, an opportunity will be afforded both of noting the principles of centralization that have been followed—and more particularly the co-operative arrangements that have been made with Dominion and Provincial Departments—as well as of indicating, at least in summary, the scope and character of the statistics that are now being undertaken or that are being projected as necessary for important public policy.

#### Division I.—Administration.

The Administration Division is charged with the general executive work of the Bureau, which is performed in close contact with the office of the Dominion Statistician and under the more immediate supervision of the Secretary of the Bureau. It

answers the inquiries of the public, appoints and dismisses staff, keeps the Bureau's accounts, and has charge of its permanent records and correspondence files. All requisitions are issued by it, stationery and other supplies given out, mailing lists for the Bureau's publications prepared and revised, and the distribution of reports, bulletins and press notices made. A mimeographing and multigraphing service for the other divisions is a feature, and organization is being made of a central checking and verifying office through which all reports of the Bureau will pass for final revise, drafting of graphs and diagrams, etc.

The Administration Division is naturally the focal point of the Bureau's organization by subjects, and an important part of its duty is to act as *liaison* agent between the other divisions, in which connection three features of the Bureau which specially exemplify the advantages of centralization call for mention:—

(1) *Floating staff*.—Two pronounced characteristics of statistical work are: (1) the large proportion of routine, and (2) the ebb and flow. Such work is peculiarly of the kind which gains by centralization: as the experience of "big business" proves, any arrangement which increases the proportion of low-priced employees adds efficiency and reduces expense. A staff of experienced clerks capable of being shifted to points of pressure is accordingly a prominent feature of the Bureau. Accompanying it is a cost-accounting system to record the working time spent on each piece of work, and incidentally to provide a measure of clerical efficiency.

(2) *Machinery*.—The use of card-punching and electric tabulating machinery has revolutionized statistical compilation. The machines require expert supervision and are expensive (installations to date by the Bureau have cost \$75,000, and the rental of others is proportionate), but the added range of analysis and the saving in time and final costs they permit are great. Thus far machinery has been applied in the Bureau's work only to the census of population and to certain internal trade and transportation records; centralization, however, will facilitate the extension of its use. It will have been noted, in fact, that the Order in Council of October 12, 1915,\* looks (clause 4) to the utilization of the Bureau's machines by other Government departments as well, the installation being on a peak-load basis, and intervals occurring when the machines are either wholly or in part idle. In France, a central battery of machines compiles the executive statistics of several departments, and in private business central compiling plants are springing up in the larger cities, as in Montreal, supported by banks, insurance companies, etc., which are thus enabled to avoid the overhead of installation. At the close of the year, services of the nature above indicated were being organized for the Pensions Board and the Taxation Division of the Department of Finance (the cards to be punched in the departments and transferred for compilation to the Bureau) the Bureau gaining in this way, in addition to the primary object, some useful statistical by-products and a wider technical experience.†

(3) *Library*.—A library of standard works on statistical technique, outstanding statistical documents of the past, and current statistical publications of the principal countries is being assembled under a competent librarian. The amalgamation of branches has reduced overlapping—which in library work is particularly expensive—and has rendered some previously uncatalogued collections of books and pamphlets generally accessible. The library is purely statistical, recourse being had to other local sources for works of more general application, except where the latter are constantly in requisition.

\*Quoted on pages 18-19.

† The following outline of the manner in which mechanical tabulation is effected in the Census of Population may be of popular interest. It will be understood that the records of each individual instead of being taken off from the census returns by hand on a compilation sheet are punched upon a card, and the compilation effected by passing the cards through sorting and tabulating machines.

SESSIONAL PAPER No. 10f

## Division II—Population—The Census.

Entering the field proper of statistics, the first subject of all to demand attention is undoubtedly the people which make up the nation—to which phase the term "demography" has been applied. And here on the threshold of the Bureau's work a principle which runs throughout its organization (applicable to best advantage under centralization) must be briefly noted.

In familiar parlance, two kinds of records are commonly employed in accounting, (1) a record of transactions as they occur, and (2) a periodical stock-taking. Similarly, statistics may be roughly divided into those derived from the continuous observation of phenomena while functioning, and those of the census or national stock sheet. Certain information is best brought out by the one treatment, certain other by the second. It is superfluous to add that the two series of records should be carefully related to each other, and that the limitations of each should be clearly recognized.

The decennial population census is, of course, the national stock-taking *par excellence*. The fact, however, that it has for primary object the enumeration of the people is of considerable moment statistically. The enumeration of the people in itself is a very large task (it has been said of the United States census that it is "the largest single administrative act of the Government") demanding machinery of an elaborate and special character. In chief it requires a very numerous field force, sufficient to reach by personal contact, within a few days' time, each individual within the country. Obviously the heavy expenditures of so large an organization should be made to yield the largest possible statistical return. But there are limits to the kind of data that a census thus organized can supply. It cannot, for example, undertake inquiries involving scientific or technical knowledge on the part either of the census agent or the person from whom the data are obtained. Perhaps the feature of the Canadian census that has oftenest provoked criticism in the past, namely, its tendency to over-elaboration, arose through lack of allowance for the limitations of the population enumerators—joined to its isolation from the general body of statistics. The attempt to collect mortuary statistics, or a record of the deaths occurring during the census year, is a case in point: vital statistics require fundamentally the method of continuous observation. Another instance of overtaxing is furnished by industrial production, a highly complex and technical subject, breaking up into innumerable subdivisions, each requiring special treatment beyond the powers of the ordinary popu-

*Punching.*—The punch-card is divided into fields or zones, each corresponding to a certain specific detail of record on the population schedule. In the card adopted for the 1911 Census, the first four fields were for the identification or "gang punch," so-called from the fact that the cards are perforated with a "gang" of punches simultaneously, the perforations corresponding to the number of the electoral and enumeration district to which they belong. As every district has a particular number, it is impossible, even should the cards become accidentally misplaced, to compile a card belonging to one district with those of another. The remainder of the card was divided into twenty-three fields or zones, covering all the information regarding the individual which could be efficiently compiled.

*Verification.*—After the cards are punched, gang punched and inspected, they are put through a verification machine in order to detect and reject cards which are insufficiently or inconsistently punched. It is considered "inconsistent," for example, if a woman is recorded as a blacksmith, or a person under five or over twenty as attending school, or a male under eighteen or a female under fifteen as married. Cards rejected for these and similar reasons are referred back for comparison with the original record.

*Sorting.*—Sorting is accomplished by an automatic machine which feeds the cards one by one between electric contacts. In synchronism with the forward movement of the card, a chute or opening is reciprocated across its path. The sorting is done at great speed, each machine sorting about two hundred and fifty cards per minute into twelve different classifications.

*Tabulating.*—After sorting for any one field, the cards are ready to be tabulated for the various data predetermined for publication. This is done by tabulating machines at the rate of about 15,000 per day.

The possibilities of mechanical tabulation may be illustrated by the fact that the analytical data of the Census of 1911 comprised 1,664 pages, as compared with 537 pages in 1901, as a result of new studies covering families, immigration, etc.

lation enumerator. Speaking broadly (the principle must not be run into the ground) the decennial census should be a stock-taking, primarily of the people but extended in so far as possible to the whole field of statistics. How this works out in specific cases, and the Canadian census is made to yield the maximum dividend on its overhead, is touched upon in the proper connection in the following. The taking of the census in this general way is made the duty of Division II of the Bureau, though the latter is assigned population as its subject proper.\*

Coming to population statistics in the light of the above, the subject falls into (1) those of the census or decennial stock-taking just mentioned, and (2) the statistics of day-to-day increase or decrease, including (a) vital statistics (births and deaths), and (b) the statistics of migration to and from the country. As above stated, these three divisions should be closely co-ordinated.

### *The Census.*

The Statistics Act provides for a census of the whole of Canada in 1921 and in every tenth year thereafter. Midway between, i.e., in 1926 and every tenth year thereafter, a census of the three prairie provinces, Manitoba, Saskatchewan and Alberta, is to be taken, in view of the more rapid growth that may be expected in these newer regions. This so-called "quinquennial" census dates from 1885-6, when Manitoba and the Northwest Territories were included; since 1906 it has been extended over the three provinces occupying the prairie section of Canada.

The census thus provided for is termed the "Census of Population and Agriculture." The reason for the inclusion of agriculture will, in the light of preceding remarks, be obvious. Approximately 35 per cent of the population of Canada is engaged in agriculture, and the most expensive part of the census organization is that of the rural districts. For agriculture, moreover, the ordinary population enumerator proves a satisfactory field agent, most of the processes of agriculture being familiar ones and such as an enumerator chosen in an agricultural district and usually a practical agriculturist himself can well cover. Hence the provision that the stock-taking of the Canadian people shall be a comprehensive survey as well of their primary industry. Reference in detail to the census of agriculture and its place in the scheme of general agricultural statistics will be found further on.†

\* In effect, the Dominion Bureau of Statistics is a general statistical office charged with the taking of the Census, whereas the Census and Statistics Office, which the Bureau supercedes, was a census office *plus* specific independent duties. "A highly organized Government" says a writer in the *Journal of the American Statistical Association* (December, 1914) "should provide for the continuous registration of social phenomena, and for the periodical census of social conditions." He continues, with reference to the U.S. Bureau of the Census: "Permanent maintenance for the performance of a function periodically, however important that function, is a stigma which is fundamentally discrediting to any public office . . . The decennial census has been called the 'greatest single piece of work' undertaken by the Government . . . but it is decidedly unfortunate that the notion should prevail so generally as it does, that providing a nucleus is the chief justification for permanent maintenance . . . The justification for permanent maintenance must ultimately be found if at all in the work done by the office in its character as a permanent bureau. If this other work of the permanent Bureau is casual, a sort of statistical fly-flapping without practical social value in itself, its continuance can not be justified by the exigencies of the decennial census, and the Bureau itself had best be abolished,—even though its abolition might somewhat impair the quality of the decennial census, or prevent any material improvement in that work . . . The intersocial activities of the Bureau absolutely determine the character of its working force. If these activities are trivial, the Bureau itself will always be found incompetent to undertake the decennial census. Unless, therefore, there is concrete evidence that the Bureau has become during the first decade of its existence a 'great statistical laboratory,' it has failed to qualify even for performing the one function which is generally regarded as its distinguishing character."

† See pages 26 and 30.

SESSIONAL PAPER No. 10f

*Vital Statistics.*

Vital Statistics, notwithstanding their importance as the basis of public health and of much of the security and moral tone of social life, have never been satisfactorily organized for the whole of Canada. They are under provincial jurisdiction (as pertaining to civil rights); but in two of the provinces they have virtually never been brought into existence, whilst in the others legislation and administrative methods have differed in the widest way. (For example, the statistical year is not uniform; the International Classification of Deaths is not universally followed; each province has its own standard of administration; and each province its own methods of compiling and presenting results.) Interprovincial comparisons of data or their combination into Dominion totals have accordingly heretofore been impossible.

The original Census Act provided that a record of deaths should be taken for the census year—an attempt to bridge the chasm—but this again may be set down as questionable method. For the reason mainly that in census-taking inquiries involving the use of memory or of scientific knowledge should be avoided (there are other reasons as well), the mortuary census was never more than a partial success, over twenty per cent of the deaths being missed and the information actually collected being of limited value, especially in the all-important matter of the cause of death. Even had it proved otherwise, mortality statistics are only a section of the field of vital statistics, and at ten-year intervals are of little use. Thirty-five years ago, the Dominion Government began the annual collection of vital statistics directly from the leading municipalities, then the only source of birth and death records, but the statistics lapsed in the early nineties with the organization of the provincial systems.

The remedy, of course, lies in uniform standard legislation and administration by the provinces, with a central Dominion office as intermediary agent for the maintenance of the standard and for the compiling and publication of the more important comparative results. More than almost any other subject, vital statistics gain by breadth of treatment; to work in a water-tight compartment is to lose half the fruits. Vital Statistics, in fact, are international in scope. The decennial census also should carefully relate its population rubrics to the needs and objects of vital statistics; certain data of first-rate interest to vital statistics are most readily obtained through the census. The census in the past has not always obtained these data, but it might plead in extenuation that it was difficult to relate its inquiry to vital statistics when the latter did not exist.

Looking to the working out of an arrangement as above outlined, the Census and Statistics Office, in 1916, submitted a memorandum to the provinces, in which the situation was reviewed in detail and a tentative solution put forward. A model provincial bill was drafted and appended to this memorandum, with model forms of registration and model regulations for procedure in detail, together with a draft Order in Council defining Dominion obligations—the whole based on the vital statistical legislation and administration of the several provinces and of other countries, notably the United States and Australia, whose forms of Government and social institutions approximate closely to our own. The memorandum was followed by an exchange of views, and by the end of 1917 sufficient progress had been made to warrant the calling of a conference for more formal action.

The conference was held in June, 1918, and there were present, in addition to the provincial and Dominion officials, who constituted the principals in the negotiations, representatives of the Dominion Departments of Immigration and Insurance, the Commission of Conservation, the Dominion Pension Board, a committee from the American Society of Actuaries, and delegates from the Canadian Medical Association, the Union of Canadian Municipalities, and the Municipal Improvement League of Canada. The United States Bureau of the Census kindly sent the chief of its Vital

Statistical Division to assist in the deliberations. The conference, after a two-days' session, adopted the general plan suggested by the Bureau, the Model Bill and forms being sent on to a committee, which completed the work of drafting at a meeting held in December, 1918. Briefly, the plan involves the passing of the Model Bill and its enforcement to a ninety per cent standard by the provinces. The Dominion Bureau, on its part, agrees to print and supply the various forms and schedules called for by the scheme; to pay the cost of transcribing and forwarding the data when collected by the provinces; to effect all compilations by the punched-card method and according to a plan of tabulation to be agreed upon; to co-ordinate the statistics of migration in accordance with the scheme; to take the census of population in close relation with vital statistics; and to pay the expenses of periodical conferences between Dominion and provincial representatives for the discussion of problems arising in the working out of the plan. The Decennial Mortuary Census will be abandoned, its insufficiency having long been recognized in the United States, France, and Germany, and experience in Canada pointing strongly in the same direction.\*

Since the conclusion of these negotiations, four of the provinces have introduced the necessary legislation. In two others, new legislation will not be called for, whilst in the rest action will probably be taken in 1920. An Order in Council ratifying the engagements of the Bureau of Statistics has been passed, (P.C. 693, dated April 22, 1919), and it is thought that actual work upon the plan will be begun in 1920 and completed within the twelve months following. Thus, within measurable distance of time, the problem of vital statistics bids fair to be solved. Always important, the war has rendered the intelligent study of our vital stock increasingly so, not only for the repairing of losses but for the building up of a people equal to the development of our natural resources, on which the economic future so largely depends. The reforms now contemplated, it may be pointed out, coincide with the establishment of a Dominion Department of Health, which, without the measurements afforded by vital statistics, would be seriously handicapped. The general statistical work of the new department will be carried out in the Bureau.

### *Migration Statistics.*

The place which migration statistics occupy in the scheme of population statistics has been already indicated. As vital statistics show the natural increase or decrease, Migration Statistics show the increase or decrease by movements to or from other countries. A record of immigrant arrivals has been maintained by the Immigration Branch since the beginning of the century. It is the intention to have this record include in future all items necessary for co-ordination with the decennial census and vital statistics, a punched-card of each entry to be filed in the Bureau, where it can be made part of the general population record.

With regard to emigration, no statistics are at present available, but it is hoped to institute a record coincidentally with the beginning of the work on vital statistics. The treatment of emigration from Canada falls into two divisions, namely, (1) that by seaports, which offers no special difficulty, and (2) that by land to the United States. The latter movement is very heavy, and involves the added difficulty of distinguishing bona fide emigration from the transient interchanges that take place daily on so considerable a scale between the two countries. It is thought that by co-operation with the Immigration Department of the United States, which records and classifies all passengers from Canada into the United States (as emigrants, returning citizens, visitors, etc.) in the same way that emigrants from the United States to Canada are recorded by the Canadian Department, the problem

\* A report of the proceedings of the conference was issued as a special document and may be had on application to the Bureau.

## SESSIONAL PAPER No. 10f

may be solved, and an accurate measurement set up of this important movement. The necessity for such measurement will be appreciated when it is said that according to the last decennial census nearly half of the huge volume of immigration of the preceding ten years had passed out of the country, only a little over fifty per cent remaining domiciled in Canada when the census was taken.

*National Registration, 1918.*

A special feature of the work during the past year was the compilation of the returns of the national registration taken in June, 1918. A temporary staff of over 400 clerks was employed in the various operations of coding, punching, verifying, and typing the cards, the necessary office space being obtained in the Victoria Museum. The cards were then transferred to the Bureau to be sorted and tabulated on the Bureau's machines. The signing of the armistice on November 11, 1918, having rendered the continuance of further national war effort unnecessary, the greater part of the work projected was not pushed to completion, but the following information was taken off, for the use of the Board of Registration:—

*For Males:—*

- (1) Classification of the male population, 16 years of age and over, according to citizenship; by provinces.
- (2) Classification of the population of foreign origin, as enemy, allied or neutral;
- (3) Classification of unmarried males, free from physical disabilities, by single years of age, between 16 and 45.

There was also in course of preparation the following:—

- (1) Classification of the male population by families, and the number of children under 16 years in each family;
- (2) Number of males deflected from their regular occupations to emergency work;
- (3) Number of males supporting families, by industrial groups;
- (4) Classification of male immigrant population by occupations; their segregation in urban and rural centres.

*For Females.*—The tabulation of the data concerning the mobilizable women of Canada, being demanded for various purposes by women's organizations, were carried further than in the case of males, the following tables being compiled:—

(1) Number of females able to give full time paid work, classified (a) as being able to leave home, (b) as not requiring remuneration for work.

(2) Number of females whose home ties permitted them to give full time paid work, classified by provinces, according to their industrial or professional training.

(3) Number of females able to give full time paid work, classified according to the branch of farming in which they possess experience.

(4) Number of females employed in each specified industry, classified according to language spoken: (a) English only; (b) English and French; (c) French only; (d) Foreign tongue only.

(5a to 5j) Ten tables, classifying mobilizable women reported in "Domestic and Personal Services," for Canada and the provinces, by occupational or trade callings.

(6a to 6j) Ten tables, classifying mobilizable women reported in "Professional Services," distributed for Canada and the provinces, by occupational or trade callings.

(7a to 7j) Ten tables, classifying mobilizable women in each industrial group for Canada and the provinces.

10 GEORGE V, A. 1920

The cards were also employed to furnish lists of farmers for use in collecting the annual and monthly statistics of agriculture, the work on which will be described in the next following section.

### Division III—Agriculture.

The census of agriculture for Canada is taken, as previously stated, in Division II. Comprehensive and definitive as it is, the census can obviously form only part of a complete system of agricultural statistics. The immediately practical part is a month to month service of reliable information on conditions affecting current farm production, and more particularly a statement of the volume of production annually at the earliest date consistent with accuracy. So important is the latter service, not only to agriculturists but to the business community at large—agriculture bulking so preponderatingly in the Canadian scheme—that it has been assigned a distinct division in the Bureau.

The manner in which the work of crop reporting was carried out for many years in the past offered a leading example of statistical malpractice. Originally the statistics of the census were the only data having official imprimatur, and these, as just remarked, can be regarded as foundational only. The first annual statistics were undertaken by certain of the provinces. Others gradually followed, but their methods differed, and some were content with estimates of only meagre character. The Dominion Government accordingly, faced with the need of nation-wide statistics, began in 1905 through the Census and Statistics Office the issue of a monthly bulletin on agricultural conditions (originally the "Census and Statistics Monthly," in 1917 changed to the "Monthly Bulletin of Agricultural Statistics"), including annual statements of agricultural yields and the numbers of farm live stock. Reliance was had for the estimates contained in the Bulletin upon a large body of voluntary crop correspondents, scattered throughout the country, who reported monthly according to a fixed routine. In 1910, the Office became the medium through which data were prepared for the International Institute of Agriculture, to which Canada was one of the original adherents. Thus for a considerable portion of Canada a dual series of agricultural reports and estimates, Dominion and provincial, came into existence (and not infrequently into conflict),—a source of embarrassment to the many who required trustworthy agricultural figures, and the cause of constant friction among officials. Even for the census years, when the element of estimate was eliminated, the figures of the provinces were in some cases left at variance with those of the Dominion.

The situation has now been cleared up, and there exists to-day a **unified and co-ordinated** scheme of agricultural information and statistics, monthly and annual, for the whole of Canada. The negotiations which achieved this result were begun in 1913. On March 26, 1914, a further step was taken at an informal conference held at Ottawa between representatives of the Dominion and Provincial Governments, at which the question of improving the methods of agricultural statistics was generally considered, the principle of co-operation endorsed, and adjournment made on a resolution which relegated to the Census and Statistics Office the drafting of a detailed plan. After minute and comprehensive study of the situation the Office in due course completed the task assigned, with the result that in 1917, after a further exchange of views, a co-operative arrangement between the Dominion and four of the provinces (Quebec, Alberta, Saskatchewan, and British Columbia) was successfully applied; in 1918 this was extended to all the nine provinces of the Dominion.

In the scheme as devised—which, as already explained, aims primarily to keep the country in constant touch with agricultural conditions and prospects—the pivotal figures, in the case of field crops, are those of the acreages sown in the spring: apply-

## SESSIONAL PAPER No. 10f

ing the average yields per acre at harvest, the total crop is estimated. In the case of live stock, the numbers of each kind on the farm in the month of June are similarly important. The method previously in use for securing these spring data, namely, by means of estimates from correspondents as to the percentage increase or decrease in each district compared with the preceding year, was frankly admitted to be faulty, notwithstanding that it has had the adherence of the United States Department of Agriculture for sixty years. It provides no solid foundation, and errors tend to become cumulative. What is required instead is a series of actual returns from as large a number as possible of individual farms, so that the estimate, if estimate there must be, may rest on fact. Ontario early recognized the superiority of this method and adopted the plan of circularizing individual farmers.

The difficulty, of course, lies in reaching so large a number of individuals: there are over 640,000 holdings in Canada of five acres and upwards. After a thorough canvass of ways and means, it appeared that the best avenue of approach to the farmer for statistics purposes lay through the rural school teacher. The school is ubiquitous, and the work of distributing and collecting a census card annually through the school teacher fits in well with educational work. Briefly, the method worked out by the Bureau and the provinces is in general as follows: A card previously agreed upon is printed by the Bureau: it carries some twenty-five rubrics relating to areas of field crops and numbers of farm live stock. The number of cards corresponding to the estimated number of farms in the province is then shipped to each Provincial Department of Agriculture. The latter, by arrangement with its sister Department of Education, forwards the cards in bundles of thirty or forty to the rural school teachers, who have been previously advised and coached in the work by joint circular of the departments concerned. The teacher distributes the cards through the children, to whom a statement of the objects of the inquiry in simple language is read, making the whole a school exercise and a lesson in public service as well as in agricultural education. The plan has also a prospective value in that it is training the children to fill up the forms themselves when they shall have become farmers. The cards are in the first instance sent back by the teachers to the Provincial Department, which arranges them according to counties or crop districts. They are then shipped to the Dominion Bureau for compilation. When this work is completed, the results are forwarded by the Bureau to the province, and the element of estimate is decided by an exchange of views, on the wire or otherwise. Thus, during the fall in each year, the country is in possession of a trustworthy statement by provinces and districts of the acreages under the principal crops and of the number of the principal descriptions of farm live stock.

The average yield per acre is similarly arrived at by co-operative methods. It has been already noted that the Bureau maintains a large staff of correspondents, who report monthly on agricultural conditions, according to a fixed scheme. Several of the provincial departments have similar staffs, though in most cases only quarterly or less frequent reports are received from them. In all, however, an estimate of average yields per acre is made at harvest time. The Bureau, it may be added, for this special service, also obtains a return from the rural postmasters. Thus, the final figures represent the experience of many thousand competent observers scattered throughout the country, most of whom are either practical farmers or are in close touch with the farming community, the figures being settled by agreement between the Dominion and Provincial experts after careful consultation with each other.

At present the scheme of annual agricultural statistics is limited in the case of field crops to those in general cultivation, but there are particular branches of agricultural or horticultural production that remain to be brought within the range of the Bureau's activity. These include fruits (especially apples), vegetables, sugar beets, tobacco, flax for fibre, and maple syrup. In fruits, the possibilities of obtaining satisfactory annual figures, and the ways and means of doing so, have been carefully

10 GEORGE V, A. 1920

studied by the Bureau, in conjunction with the Fruit Branch of the Department of Agriculture, and a joint plan for the collection of fruit statistics for the year 1919 is to be put into operation next fall. For vegetables, other than potatoes, already included as a field crop, it would appear wise to use the data to be collected by the next decennial census of 1921 as a starting point for annual statistics. For sugar beets, special data including the quantity of sugar made from Canadian-grown sugar beets are furnished annually by the Dominion Sugar Company of Chatham, Ont. For flax fibre—a coming industry—the Bureau publishes annually data obtained through the Flax Fibre Division of the Dominion Experimental Farms. For tobacco, the Tobacco Division reports annually to the Bureau as to results of the tobacco harvest in Quebec and Ontario, including area, yield, quality, and value, and the report is published in the Monthly Bulletin of Agricultural Statistics, usually in November. For maple syrup and sugar no statistics other than those of the census have as yet been collected, except in Quebec, but the possibilities of collecting annual figures for Canada are under investigation.

The above, as previously stated, are the pivotal figures in the Bureau's scheme of annual agricultural statistics. They are released to the press in summary form immediately they are available, and the full details appear in the next following issues of the Bureau's "Monthly Bulletin of Agricultural Statistics." The other matter of the Monthly Bulletin may be regarded as grouped about the above. Each number contains a statistical summary of the current reports of the Bureau's correspondents on agricultural conditions by provinces; summaries of similar reports from provincial sources; reports from Dominion Experimental Farms and Stations; crop reports from other countries; the latest statistics of the International Institute of Agriculture on world crops and live stock; a report on the weather of the previous month; and from three to five tables giving weekly and monthly average prices of the principal agricultural products in the Canadian and British markets. The general scheme of the Bureau's annual agricultural crop reporting service may be seen from the following statement:—

*January.*—Farm values, including values of farm land, wages of farm help and values of farm live stock.

*March.*—Farm products on hand and percentage of merchantable quality. Condition of live stock.

*April.*—Areas winter killed of fall wheat, hay and clover. Condition of the growing crops of fall wheat and of hay and clover. Progress of seeding operations (spring wheat, oats and barley). Dates of sowing and appearance of wheat above ground.

*May.*—Preliminary estimate of areas sown to spring wheat, oats, barley, rye, peas, mixed grains, hay and clover, alfalfa and pastures. Condition of these crops and also of fall wheat. Dates of sowing and of appearance of wheat above ground.

*June.*—Revised estimate of areas sown to spring wheat, oats, barley, rye, peas, mixed grains, hay and clover, alfalfa and pastures. Condition of these crops and of fall wheat. Areas of late-sown cereals and hoed crops, including buckwheat, flax, corn for husking, beans, potatoes, turnips, sugar beets, man-golds, carrots, etc., and corn for fodder. Dates of sowing and of appearance above ground of wheat. Dates of heading, flowering and milk-stage of wheat.

*July.*—Preliminary estimate of the yield per acre of fall wheat, hay and clover and alfalfa. Condition of spring wheat, oats, barley, rye, peas, beans, buckwheat, mixed grains, flaxseed, corn for husking, potatoes, turnips, man-golds, carrots, etc., hay and clover, alfalfa, corn for fodder, sugar beets and pasture. Dates of heading, flowering, milk-stage and cutting of wheat.

## SESSIONAL PAPER No. 10f

*August.*—Estimate of the yield per acre of spring wheat, rye, oats, barley and flax. Estimate of areas sown to these cereals that from any cause will not produce a crop. Condition of spring wheat, oats, barley, rye, beans, buckwheat, mixed grains, flaxseed, corn for husking, potatoes, turnips, mangold, carrots, etc., hay and clover, alfalfa, corn for fodder, sugar beets and pasture. Dates of heading, flowering, milk-stage and cutting of wheat. Stocks of wheat, oats and barley in hand on August 31.

*September.*—Estimate of the yield per acre of fall wheat, spring wheat, oats, barley, rye, peas, beans, buckwheat, mixed grains, flaxseed and corn for husking. Quality of these crops when harvested. Condition of potatoes, turnips, mangolds, carrots, etc., sugar beets, corn for fodder and alfalfa. Date of cutting of wheat.

*October.*—Yield per acre, quality and average price of potatoes, sugar beets, turnips, corn for husking, other roots (mangolds, carrots, etc.) hay and clover, fodder corn and alfalfa. Acreage sown to fall wheat. Condition of fall wheat. Percentage of fall ploughing completed. Acreage summer-fallowed in percentage of previous year.

*December.*—Final estimates of yields per acre based upon reports of threshing results. Average market prices and weight per measured bushel of cereals.

In addition to the statistics and estimates founded on the above and on the co-operative work with the provinces, a more or less regular sequence of special articles is issued in the Bulletin, including during 1918 the following:—

Outbreak of Wheat Rust in 1917, by W. P. Fraser, M.A., Officer in charge of Grain Diseases Investigations, Division of Botany, Central Experimental Farm, Ottawa. (Expert statistical and botanical study of schedules collected by the Dominion Bureau of Statistics from its correspondents). Influence of the Weather upon Farm crops. (Article explaining new arrangements for co-operation with the new section of agricultural meteorology of the Dominion Meteorological Service at Toronto). Agricultural Meteorology. (Scientific article on the relation of the weather to the yield of wheat in Manitoba, by A. J. Connor, M.A., Dominion Meteorological Office, Toronto). Canada's Opportunity for Exports of Foods. (Special illustrated article by Dr. R. J. McFall, Chief of Internal Trade Division, Dominion Bureau of Statistics). Milling and Baking Tests of Canadian Wheat, 1918. (Report by Dr. F. J. Birchard, Chemist in charge of the Dominion Grain Research Laboratory of the Department of Trade and Commerce at Winnipeg). International movement of artificial fertilizers, from reports issued by the International Institute of Agriculture, including table showing the production and trade in natural phosphates, basic slag, sulphate of ammonia and sulphur, 1913 and 1916, and imports and exports of potash salts and nitrate of soda, 1913 and 1916. Special article by the Editor on the World's Production of Grain and Potatoes, including tables showing by countries the area and production of cereals and potatoes in the Northern Hemisphere for 1918 as compared with 1917, and with the annual averages of the five years, 1912-16. The same, by tables for the Southern Hemisphere and for the southern and northern hemispheres combined. Field Roots Seed for sale. (Statement showing quantities of mangolds, turnips and carrot seed for sale, as furnished by the Experimental Farms Branch of the Dominion Department of Agriculture).

It may be added that the Provincial Governments now assist the Bureau in the appointment of the staffs of correspondents who furnish the above information, in

some cases the personnel of the Dominion and Provincial staffs of correspondents being the same. The Bureau distributes all data supplied by the correspondents to the provinces immediately upon completion of the compilation each month, and the provinces reciprocate with any similar information that accrues to them.

It has been agreed between Dominion and provinces that the returns of the decennial and quinquennial agricultural censuses shall be accepted as final and as the basis upon which all estimates shall fundamentally proceed, the Bureau undertaking to appoint enumerators by the merit system, and generally to employ approved methods. On the latter point a reform inaugurated in the Western Census of 1916 may be mentioned. In previous censuses the agricultural statistics have been obtained by a series of questions intimately associated with the population rubrics. In 1916, use was for the first time made of a separate agricultural schedule for each farm, covering such features as ownership, areas, values, expenditures, tenure, live stock, animal products, field crops, fruits and vegetables, and forest products on farms; altogether 380 items are comprised under 32 headings. This, though a somewhat more expensive method, gives more accurate and complete results, and will be adhered to in future censuses.

The above plans, while doubtless capable of improvement, represent, it is believed, a suitable beginning in the building up of a valuable scheme of statistics relating to the premier industry of Canada. For 1918, the first year in which the plan was uniformly applied throughout Canada, the returns received represented about 240,000 farms, and these, it is considered will be increased as the work becomes better known and appreciated. Conflicting results in connection with the annual agricultural statistics of Canada are now eliminated, and the work is arranged on a basis that is theoretically sound and that unites all available technic throughout the Dominion in a common effort towards a common goal.

In addition to the agricultural volumes of the decennial and quinquennial censuses and the "Monthly Bulletin of Agricultural Statistics" which have been described in the foregoing, it is in contemplation to bring out an Agricultural Year Book, under the joint direction of the Agricultural and Internal Trade Divisions of the Bureau. The latter Division, as will be explained in detail further on, compiles the statistics of the marketing of grain, live stock, meats and other agricultural products, within the country. The annual statistics of dairy factories, covered by the Industrial Census (Division IV of the Bureau) will also be included, and a summary of agricultural imports and exports and the more important world statistics relating to agricultural production, trade, prices, etc., added.

#### Division IV.—The Industrial Census.

There is no need to emphasize the importance of a well-rounded system of production statistics, especially in Canada where production is the larger part if not the sole source of the national income. Agricultural production has been already dealt with (Division III). For the large and variegated field that remains—including such sharply differentiated operations as the raising of minerals, the catching of fish, the hewing of timber, as well as the multifarious processes that go on in shops, mills, and factories in converting raw materials into the forms in which they enter human consumption, the "Industrial Census" has been organized.

Historically, the first statistics of industrial production were those of certain Dominion and Provincial departments. The Mines Departments of the provinces, for example, automatically secured statistics whilst collecting royalties upon or otherwise supervising the mining output. Similarly, Departments of Fisheries and Forestry came, in certain cases, to publish the statistics thrown off by their administrative

## SESSIONAL PAPER No. 10f

activities. But while much valuable information was secured in this way, the statistics as a whole were not satisfactory. Executive departments very properly adapt their records to executive needs; the latter are limited and often differ between departments, whilst statistical methods may vary at will. It has been impossible, therefore, in the past to compare with safety a statistic of, say, a Provincial Mines Department with the corresponding statistic of another province—still less to collate the statistics of, say, a Mines and a Fisheries or Forestry Department. Much overlapping ensued; at the same time, wide areas of the field were left uncovered. Again, for numerous phases common to all industrial processes, but falling beyond the purview of such departments as have been mentioned (notably the problems surrounding capital and labour), still another series of departments have partially surveyed the field from time to time; and still other bodies like the Conservation Commission have been at work from their own distinctive standpoint. It is true that once every ten years a comprehensive survey of industry was made by the decennial census. But decennial statistics of production are only a little better than no statistics at all. Moreover, as explained in a previous section, the organization demanded for an industrial census is of a character almost diametrically opposite to that of a population census. The latter must reach several millions of individuals for a comparatively simple inquiry; the former, outside of fishing and farming, requires access to less than 50,000 entities—but for information which is often complex and technical to a degree. To attempt to collect the data of mines and manufacturers through the medium of the population enumerators is, in point of fact, to invite discomfiture; the census inquiries of the past may have illustrated the broader tendencies of industry, but they did not illuminate details, and details are more and more essential.

In framing the Statistics Act, therefore, it was decided to create entirely separate machinery for the treatment of industrial statistics, including under that heading the statistics of fisheries, mines, forestry, and general manufactures.\* The decennial census of the future will compile lists of industries, and otherwise exercise a check, but the industrial census proper will be taken on an annual basis and by a distinct organization. (Statistics Act, 1918, sections 20 and 21.) This organization will proceed in the first instance by collaborating with the departments, Dominion and provincial, having executive functions in specific sections of the field (there are over thirty of these), and will erect independent machinery only in sections outside the range of such administrative supervision. The desideratum in such collaboration is, of course, to place the industrial technic of the administrative departments at the service of the census, and the general statistical point of view of the census at the service of the departments. Many of the latter have considerable field staffs in close touch with the industries under investigation and of expert training. These form the ideal substitute for the untrained enumerators of the population census, and it will be found on other grounds that the departments are the better qualified to collect and visé the statistics in the field, to the Bureau falling the duty of bringing the departments into council, planning the inquiry as a whole, creating the nexus of association between its parts, and generally defining methods. The Bureau also has the larger experience in, and greater facilities for, the work of compilation. The major portion of the field, of course, lies beyond the possibilities of co-operation as above, less than twenty per cent of industrial production falling under departmental observation. Here the Bureau must act alone, proceeding for the most part by correspondence, but employing field agents in the final stages.

---

\* Agriculture, as before stated, is treated in a separate division in view of its importance. The broad classification of production into (1) primary or extractive, and (2) secondary, is carried out in the fisheries, mines, and forestry sections of the Industrial Census, which thus dovetail with the section on manufactures. Divisions III and IV of the Bureau are to be considered together as affording a complete view of production with the several sections in due correlation.

With this by way of general statement, it may be of interest to note just how the field breaks up under the scheme, and how far organization has been effected to the present. The co-operative sections of the Industrial Census include the statistics of dairy factories, fisheries, forestry, mines and central power establishments, and on these in turn a word may be given:—

*Dairy Factories.*—Dairy factories may be regarded as an appendage to farming. The Provincial Dairy Commissioners are in close touch with the field; most of them have instructors or inspectors who visit every factory once or oftener a season. To secure the statistics of these establishments adequately and without friction and duplication, the following plan has been adopted: First, a common form has been agreed upon. The Bureau prints this and supplies a sufficient number to each Provincial Dairy Branch. The latter, largely through its field staff, collects a return from each establishment. These after viséing, are forwarded to Ottawa for compilation. Immediately the latter is effected for a province, the results are sent back for use in any way deemed expedient. The Bureau publishes an annual report for the whole of Canada, with the editorial assistance of the Dominion Dairy Branch, and there is thus obtained a single coherent return as comprehensive and accurate as official machinery can make it. Quebec, which has long done excellent work in dairy statistics through the Central Bureau of Statistics for the province, prints her own schedules, which, however, conform to the general requirements. For Ontario, the Bureau mails the forms to the factory operators direct, the provincial officers supplying the lists and co-operating in the work of securing the tardy ones and revising results as a whole. Farm dairying is covered as a section of agricultural statistics proper.

*Fisheries.*—The sea fisheries have always been regarded as the domain of the nation at large (the right dates from Magna Charta), only inland waters falling under provincial jurisdiction. As the lake and stream fisheries of the Maritime Provinces are unimportant commercially, and those of the west still remain under the Dominion, it follows that Ontario and Quebec alone, in addition to the Dominion Fisheries Branch, are concerned in the statistical problem. British Columbia has a Fisheries Branch, but it does not collect statistics.

Statistics of fisheries cover (1) the catch, and (2) the product marketed, the latter divided into (a) fresh, (b) domestically prepared, and (c) factory-made. The men, boats, gear, etc., should, of course, be recorded under (1), as well as the capital, labour, and other details of smoke-houses, freezers, canneries and the like under (2). For the collecting of the data exceptionally effective machinery exists in the departmental field inspectors and overseers who, between the Dominion and Provincial Governments, bring every fishing section under direct supervision; the Dominion officers, in fact, cover their sections monthly. With regard to (1) the catch, two forms are used, one for the sea fisheries and the other for the inland fisheries. The local fisheries officers collect the data, which are forwarded to the Bureau and compiled, after thorough check and revision. The same procedure is followed for the records of (2) fish marketed (a) fresh and (b) domestically prepared. For (c) manufactured fish products, lists of the canneries, salteries, smoke-houses, etc., are furnished by the fisheries officers; the owners are then circularized by the Bureau and the returns viséed by the Dominion Fisheries Branch prior to compilation. The Bureau issues the statistics of fisheries for the Dominion in a report which is edited by the Dominion Fisheries Branch.

*Forestry.*—The Forestry section includes (1) operations in the woods, (2) saw-mills, (3) cooperage shops, (4) sash and door factories, planing mills, etc., (5) pulp and paper mills, and (6) wood distilleries—from which the subject shelves into specialized wood manufactures.

For operations in the woods, Quebec and British Columbia have excellent statistics, but the other provinces record merely the cut on Crown Lands (on which stump-

## SESSIONAL PAPER No. 10f

age dues are collected), the increasing areas of forest held in fee simple not being covered. (In Nova Scotia practically all timber lands have passed from under the Crown.) The Bureau proposes to obtain statistics direct of such operations and also of the contingent operations of river-driving, the cut of logs, the numbers and wages of the men, the cost of supplies, etc.

The operations of saw-mills and cooerage shops reflect and check the work in the woods, their product being the logs in another form (except, of course, in the case of products like telegraph poles, cross ties, fence posts, etc.). In the saw-milling subdivision, the Bureau collaborates with New Brunswick, Quebec, and British Columbia in preparing lists and collecting the data, but works alone in the other provinces. Similarly the field staffs of the provinces assist in collecting the returns from pulp and paper mills, and the Pulp and Paper Manufacturers' Association also renders valuable assistance in this connection. For sash and door factories, wood distillation, etc., the Bureau acts alone, circenarizing the various establishments as sections of general manufactures. Throughout the section on forestry and related subjects, however, the Bureau works in close co-operation with the Dominion Forestry Branch, which previously issued for several years a series of statistical reports on forest products. The latter are continued by the Bureau but in enlarged form and under arrangements as to joint revision, similar to those which obtain between the Bureau and the Fisheries Branch.

*Mines.*—Mining statistics are perhaps the most difficult of all to arrange for, by reason of their exceptionally varied and technical character. At least five provincial departments, as well as the Dominion Department of Mines, have been issuing statistics for many years. These statistics are of good quality, but the methods followed are often at variance, and they are limited to the mining point of view. As to the principles which co-operation might follow, a general agreement has been arrived at between the Bureau and the provinces. As between the Bureau and the Dominion Mines Branch, an arrangement has been made whereby the forms and machinery of the latter will be used to cover mining production, whilst the Bureau will independently secure the other data of the inquiry. The arrangement is not final, but it at least prevents the same Government asking the same concerns twice for the same information. For future years a plan of complete co-operation is aimed at.

*Hydraulic and Other Central Power Plants.*—Another important section under dual control statistically consists of plants for the manufacture of electric current for sale. There are two kinds of these, namely, hydraulic power plants, whose product is merely the transformed "white coal" of waterfalls, and those which manufacture power from fuel. The first alone are matters of direct administrative concern, but the second are so closely allied that the subject must be treated as one. The Dominion Water Power Branch, the Ontario Hydro-Electric Power Commission, the Quebec Streams Commission, and the Water Power Association of Nova Scotia divide the administrative field. In collaboration with the Bureau, these bodies have agreed upon two forms (the Conservation Commission being also consulted), which it is thought will illustrate the main features of power production, and which can be varied from year to year over the entire range of the subject. They have united also in the preparation of lists of plants. The forms are sent out by the Bureau (except that the Hydro-Electric Commission of Ontario collects from the 250 plants under its control). The compilation is made by the Bureau, after revise of the schedules by the Dominion Water Power Branch, the Assistant Director of which has been sworn in as an officer of the Census. The report is issued in two parts, Part I comprising a comprehensive statistical survey with accompanying explanatory matter, whilst Part II consists of a directory of the commercial and publicly-owned power stations in operation throughout Canada, showing the principal features of each, locations where

blocks of electrical energy are for sale, the prices at which power is obtainable, transportation facilities available in the vicinity, etc. Part I is issued under the imprimatur of the Bureau of Statistics, and Part II by the Dominion Water Power Branch. The material brought together as above is thoroughly exhaustive, and it is thought will prove particularly valuable during the period of reconstruction upon which the Dominion is now entering. Part I will be repeated from year to year, whilst the Directory will be brought up to date as necessary. An additional feature of this section is the maintenance of a record of water-wheel and other power installations in general industry, on which data are collected by the Bureau from every establishment in Canada.

*General Manufactures.*—There remains the large and complex field of general manufactures, in which little or no statistical work has been done in the past save by the decennial census or by intervening postal censuses like those of 1905 and 1915. These statistics will now be collected annually. The problem consists first in securing the names of going concerns. Every known source is exploited for these—directories, gazetteers, commercial agencies, boards of trade, and manufacturers' associations. Among governmental departments, the Factories' Inspection Branches and Workmen's Compensation Boards assist materially in this connection. Each concern is then circularized under the Statistics Act (section 21). Some field work is necessary; this is provided by a small staff of local agents. About ninety different forms are used—one for each distinct group of industries; previous censuses of manufactures were taken on a single form, a procedure which made it impossible to call for specific data on such points as equipment, raw materials and products. It is now hoped to get complete statistics for about four thousand named products.

The office organization required for so extensive and intricate an inquiry has been given careful consideration. Each concern has been assigned its place in a classification scheme that includes some 400 divisions. Each is card-catalogued and given an office number—by which alone it is known to the clerical staff, thus ensuring the secrecy of individual returns. There are about 40,000 names in the catalogue.

The above is an outline of the basic organization of the Industrial Census. It by no means represents the entire plan (which is still under the hand) or the several points of view from which the data are capable of analysis and publication. For example, a Census of Chemical Industries, including in the term not only the manufactures of chemicals but all concerns in which any of the processes used are essentially dependent upon the agencies of chemical change, is a feature introduced during the past year on the representations of the Honorary Advisory Council for Scientific and Industrial Research. An inquiry of this kind is necessarily of the nature of a cross-section of the work proper. The statistics bearing on labour conditions are also a special feature. Here delimitation with the Department of Labour is being arrived at, the latter dealing with trade disputes, unemployment, and rates of wages (as administrator of Government Labour Exchanges and the legislation relating to fair wages and trade disputes), whereas the Bureau provides the general background of employment statistics (number and classification of employees, days worked, etc.) and the statistics of working class earnings (analysed), wage standards, hours worked by industrial establishments, etc.

The scheme of publication has been partly indicated in the foregoing. An object of the Bureau has been to separate the statistics of the primary or extractive industries from those of secondary production wherever possible. Thus there will be reports on the fisheries, on forestry and on mines, as constituting, with agriculture, the primary industries aforesaid. In some cases the statistics of immediately related manufactures will be printed within the same cover for convenience of reference, but the differentiation will be marked as clearly as possible. For example, the fisheries report will include the canneries, salteries, and other fish-preparing establishments, as well as the catch. In a similar way the mines report will cover contingent metallurgical operations.

## SESSIONAL PAPER No. 10f

Surveying the entire field of manufactures or secondary production will be a general or summary report. There will of necessity be some repetitions of matter, but they will be few, and a broad review of production from end to end, with the several divisions in sharp relief will be for the first time possible. The number of special reports that might grow out of such general organization from year to year will depend on circumstances. The report on dairy factories already mentioned is essentially part of the subject of agriculture; other reports on flour and grist mills and on slaughtering and meat-packing establishments might be suggested as closely though not directly connected with the same basic industry. Closely associated with forestry operations are the series of reports on lumber, lath and shingle manufactures, cooperage plants, pulp and paper mills, wood distilleries, and sash and door and planing mills already mentioned. Other special reports in preparation for 1917 covered agricultural implements, automobiles, musical instruments, textiles and leather, respectively. The report on central power plants and on the chemical industry previously described may also be included in this category. In point of fact the list is capable of indefinite enlargement according to demand.

In each of the reports that have been mentioned a more or less uniform plan of presentation is followed; first the statistics in detail of goods produced and of raw materials consumed, are given; the agencies of production are then taken up, namely, (1) capital and (2) employees, including under the former the land and buildings, machinery, materials on hand, and "working capital," and, under the latter, details as to numbers, salaries, wages, working time, etc. The statistics of power employed, of fuel consumption are also given, together with those of certain miscellaneous expenses, such as taxes, insurance, advertising, rent, royalties, etc.

As remarked at the outset, the role of Canada for the next half century at least must be *par excellence* that of a producer. With a scheme of production statistics along the lines that have been indicated, improving with time, it should be possible to keep in close touch with this governing factor in Canadian development.

*The Classification Problem.*

A problem met at the outset of organizing the Industrial Census was that of classification. It is a problem of many ramifications, re-appearing in several sections of the Bureau, but the general principles applied to it may be stated here.

In the first instance, the industries have been brought together in a series of some four hundred groups, according to the chief article of production and prevalent trade custom. Thus, the "alluvial gold" and "nickel-copper" groups of mines; thus, the "lobster-canning" and "carriage and wagon" industries, which include every concern carrying on the operation specified or manufacturing the articles mentioned as their leading activity.

This, however, goes but a short distance. A large number of establishments manufacture more than one commodity. If, therefore, it is found that certain concerns listed in, say, the "agricultural implement" group, manufacture also carriages and wagons as a second product, it is clear that the statistics of the "carriage and wagon" group proper are incomplete. By securing separate returns from as many sections of industry as can be segregated, even when united under the same management, the amount of error in such statements is reduced to a minimum. For the products themselves a careful drafting of forms by insuring comprehensive returns provides substantial accuracy by means of cross-compilation. The forms of the Industrial Census include about 3,600 articles.

The main classification problem, however, arises in the grouping of the commodities. Here the purpose is two-fold: first, to ensure the maximum of accuracy for any group-heading employed; and, second, to enable statistics of production to be readily collated and compared with the statistics of trade, prices, transportation, occupations, etc.

In the past, the groupings employed have not met these requirements. This has been due largely to the fact that there has been no general appreciation of the principles which a system of grouping must follow in any section of the field if it is to avoid inconsistencies. To take an example—if a grouping system contains such headings as "leather" and "clothing" within the same category, accuracy becomes impossible, as an article like boots and shoes cannot be placed in the one without rendering the other defective. Concurrently, it becomes impossible to compare, say, the production of "leather goods" or of "articles of clothing" with imports, prices, wages, etc., under the same headings, as the headings in question, if left to determination by different branches, are almost certain to have different significations.

For the general discussion of the problem, the Bureau of Statistics organized in May, 1918, a committee consisting of Prof. W. C. Clark of Queen's University, chairman; Mr. Bryce M. Stewart, Department of Labour, and Mr. T. Norman Dean, Statistician of the Ontario Workmen's Compensation Board, Toronto. Beginning with the problem of grouping the products of the Industrial Census, the committee in the course of its work got into touch with the several Dominion and Provincial Departments interested, and also with a similar committee appointed in the United States in 1917, consisting of representatives of the Census, the Labour Department, the Interstate Commerce Commission, and the Workmen's Compensation Bureaus of New York and Massachusetts, who were engaged in a similar attempt to establish general principles of classification for the United States.

The broad conclusion reached by the Committee was that any grouping scheme for statistical purposes should adhere throughout to one of the three following principles, viz., the principle of grouping according to "chief component material"; according to "purpose"; or according to "source or origin" (the farm, the forest, the mine, etc.). These principles should not be intermingled in any one scheme; for the presentation of details one of the principles (preferably the "chief component material" principle) should be adopted and adhered to as far as possible, the remaining two classifications being used for the presentation of analyses and broad totals. By such a method "boots and shoes" would be shown in the detailed presentation under "leather", but would also be included in the general analytical totals of "clothing", and among manufactured products ultimately derived from "the farm." Whilst the method cannot be applied with 100 per cent success, especially for comparative purposes (owing to the intermingling of manufacturing processes, the arbitrary combinations which occur in certain tariff items necessarily included in the trade classification, as well as inherent distinctions in the different points of view from which the problem must be approached), it is felt that it can effect a considerable increase in accuracy over previous practices, and that by adopting it as a standard still further improvements can be worked out in time. A more detailed description of its application will be found in the next following division, where the foreign trade classification has been made over in accordance with the new method during the past year. (See pages 38-40.)

#### Division V.—Foreign Trade.—Imports and Exports.

For many years an anomalous situation had existed in connection with the statistics of imports and exports. The statistics originate in Customs administration, and from the earliest times the Customs Department had published an annual report dealing with the "Trade and Navigation" of Canada. This, however, did not fully satisfy a rapidly expanding commerce, and in 1892 the newly organized Department of Trade and Commerce began a further series of reports, based on the Customs reports but furnishing additional analyses and elucidations from a trade point of view. The new matter consisted largely of comparative data on recent trade trends, various re-groupings of the trade statistical items, and an assembling of the statistics of Canadian

## SESSIONAL PAPER No. 10f

trade by countries. In 1895 the department also inaugurated a quarterly trade report, which became a monthly in 1899. Meanwhile, the Customs Department had likewise put out a monthly, whilst in 1905, on the organization of the Census and Statistics Office, foreign trade statistics were included in the re-modelled Canada Year Book on a scale that constituted a third original treatment.\* Thus, as it developed, three distinct departmental organizations were engaged in the analysis and presentation of trade statistics: inquiries for trade information might be addressed to three official sources in Canada and receive an independent reply from each.

In no other country has a similar method been adopted. Its disadvantages will be patent. Not only was a considerable duplication in compilation work and printing involved (there was perhaps 40 per cent pure repetition as between the Customs and Trade and Commerce reports), but the final result was to give the statistics considered as a whole an illogical and confusing as well as very prolix arrangement, and to prevent, by the dispersion of responsibility, the alert and constructive direction which the subject requires. The remedy lay, of course, in the unification of the work, allowing the adoption of a single series of reports and a simple and intelligible plan of presentation. Attempts to secure this from time to time failed through lack of opportunity for investigation and discussion in the detail necessary.

The first definite step towards a solution was taken in 1916, when under Order in Council of December 6, the Statistical Branch of the Department of Trade and Commerce was transferred to the Census and Statistics Office. This permitted co-ordination in so far as the more important analytical work connected with trade statistics was concerned. Towards the clearing up of the remaining duplication between the reorganized office and the Customs Department, a comprehensive memorandum on trade statistical reform and consolidation was first drawn up. This included a detailed scheme for the amalgamation of the two series of reports and the rearrangement of their matter, as well as a policy on such questions as trade classification, methods of collection and compilation, import and export valuations, etc. Out of the discussion which this received during the ensuing year were evolved the trade clauses in the Statistics Act, 1918, which embody the solution finally arrived at.

The clauses of the Statistics Act, 1918, bearing on foreign trade provide in effect for a delimitation of function between the Customs Department and the Bureau of Statistics. The precedent followed is that of countries where central statistical offices exist, as in Australia and Germany, and to a lesser degree that of countries where, as in the United States, the Customs and Commerce Departments work in close co-operation. In brief, the Customs Department will carry out the collection and primary compilation of the data, whilst their analysis, interpretation and publication is left to the Bureau of Statistics, the Act providing for the transfer of the necessary materials. Trade statistics are thus recognized as being more than "by-products" of Customs administration, but are placed where they not only receive the maximum of direction from the practical trade point of view but are linked with the general body of economic statistics, more particularly the statistics of production and internal trade—the Bureau of Statistics by periodical consultation meeting the requirements, both of the Department of Trade and Commerce (Commercial Intelligence Branch) as the department charged with trade promotion, the Department of Finance as the department responsible for fiscal policy, and the Department of Customs as interested in the analysis of revenue returns—and correlating trade statistics with those of economic phenomena in general.

Since the passing of the Act, the monthly Customs report has been discontinued, the monthly report of the Bureau on the Trade of Canada now being alone in the field. The annual report of the Customs Department under the Customs Act will be primarily

\* Trade statistics occupied approximately one-half of the Canada Year Book of 1905. The chief new analysis was a classification of import items according to the Customs classification of exports.

an administrative statement of revenues collected, all purely trade statistical analyses being relegated to the report on that subject by the Bureau of Statistics. Arrangements satisfactory to the two branches whereby the primary data are transferred monthly from the Customs Department to the Bureau, with a revise at the end of the year, have been concluded for confirmation, when finally tested, by Order in Council.

Though the new organization is still in the formative stage, several improvements have already been placed in train. The format of the new series of reports, monthly and annual has been worked over. In future the annual (and definitive) report on trade statistics will be in three parts. The first will present the general statement for the year. The main tables in this section will show the returns for each item of export and import by countries, both for the year and for the four years immediately preceding, the object being to illustrate the current trend as well as the present volume of trade. To these will be added two series of illustrative tables, the first broadly historical, showing the year in its general setting back to Confederation, and the second consisting of tables analytical of current trade items from various points of view. There will be ten of the historical tables and fifteen of the current analyses in the report of the current year, but this of course will vary as new data permit and new needs are uncovered. To the whole will be added a statement of imports and exports at values of a standard year by way of laying bare the real elements in trade fluctuations. (An index number of import and export valuations will be maintained in the Prices Section of the Internal Trade Division of the Bureau, as described on page 44.) In Part II the Trade of Canada with each country in turn will be re-assembled, whilst in Part III a résumé of the trade statistics of other countries will be made for the use largely of Canadian producers and exporters—especially necessary in the altered conditions that will follow the war. (Parts II and III will be issued in a series of pamphlets on the several countries, for convenience and economy in distribution.) The monthly reports will follow Part I above, but on a restricted scale. The Year Book treatment will be that of an "abstract" of Part I.

Greater promptness in the issue of reports is being provided. The data from the Customs Department are received on the 18th of the month following that to which they relate. This enables a stenail summary of the more important items to be issued on the 23rd to leading newspapers and trading concerns, whilst the final report goes to the printer on the 25th. The issue of the final annual statistics by the calendar year is under consideration.

*Trade Classification.*—Coincidentally with the above, a reform of considerable importance in connection with trade classification—the basic feature in any system of trade statistics—has been carried into effect. The general principles on which the classification of commodities is made in the Bureau for purposes of statistical analysis, has been briefly discussed in connection with the Industrial Census (see preceding section). The problem of trade statistical classification falls into two parts: (1) the items, and (2) the grouping of the items. With regard to the items, the starting point is, of course, the customs tariff, which designates over seven hundred articles. These, by subdivision from time to time, had been increased to some 1,690 items. Simultaneously exports items to the number of 430 had been originated. The whole, however, had been without systematic revision for many years and the first duty was the preparation of a memorandum of suggested changes and additions, based on the experience of the Bureau in answering trade inquiries, on the results of the Industrial Census and on the classifications of other countries: the views of the larger trading and producing concerns were also obtained. This memorandum was submitted to the Customs Department for discussion, and after conferences in which the views of the Department of Finance were also obtained the number of import items was extended to 1763 and that of exports to 521. Much benefit was derived in this connection from an exchange of views with the United States Bureau of Commerce which likewise had the subject of trade classification under revision during the year.

## SESSIONAL PAPER No. 10f

In the matter of grouping, not only was the previous system without consistent principle which would enable it to be collated with other statistics, but differences existed as between free and dutiable imports and as between imports as a whole and exports. In revising the scheme accordingly, the plan already described in connection with the Industrial Census was applied whereby three separate classifications are made, namely, according to "chief component material," according to "purpose," and according to "source or origin." In the main tables of presentation, in which alone all items are included, the latter are grouped on the "chief component material" principle, except that minor purpose groupings are introduced where they do not conflict. At the same time complete schemes of purpose and source classification are worked out, but are published only for the broader headings and for such others as have been found to be in frequent requisition. The main headings of the two chief grouping schemes are as follows:—

*Classification by Chief Component Material—*

1. Vegetable products (except wood, fibres and chemicals).  
(65 sub-groups.)
2. Animals and their products (except fibres and chemicals).  
(30 sub-groups.)
3. Fibres, Textiles and Textile products.  
(45 sub-groups.)
4. Wood, wood products and paper.  
(31 sub-groups.)
5. Iron and its products.  
(41 sub-groups.)
6. Non-ferrous metals and their products.  
(14 sub-groups.)
7. Non-metallic minerals and their products.  
(34 sub-groups.)
8. Chemical and allied products.  
(47 sub-groups.)
9. All other commodities.  
(15 sub-groups.)

*Classification according to Purpose—*

1. Abrasives.
2. Adhesives.
3. Arms, Military Equipment and Explosives.  
(5 sub-groups.)
4. Beverages and Infusions.  
(11 sub-groups.)
5. Books, Stationery and Educational Supplies  
(8 sub-groups.)
6. Clothing.  
(13 sub-groups.)
7. Containers, Wrapping and Packing Materials  
(5 sub-groups.)
8. Drugs, Medical and Dental Equipment and Supplies.  
(6 sub-groups.)
9. Foods.  
(18 sub-groups.)
10. Household Equipment.  
(12 sub-groups.)
11. Industrial Equipment.  
(25 sub-groups.)
12. Jewellery and Timepieces.
13. Light, Heat and Power; Equipment and Supplies.  
(6 sub-groups.)
14. Producers' Materials.  
(41 sub-groups.)
15. Recreation Equipment and Supplies  
(6 sub-groups.)
16. Soaps, Perfumery and Cosmetics.  
(2 sub-groups.)
17. Telegraph and Telephone.
18. Tobacco.
19. Vehicles.  
(5 sub-groups.)

As already remarked, it is impossible, because of inconsistencies in the items, to apply literally and absolutely a system like the above. It represents, however, the maximum of accuracy obtainable, and by the degree to which it facilitates analysis and comparisons with other statistical fields is thought to repay the additional labour which it involves. Arrangements will be made to review the scheme thoroughly each year in conference with the Department of Customs, the Department of Trade and Commerce (Commercial Intelligence Branch), and the Department of Finance.

### Division VI.—Transportation and Communications.

Geography has made transportation one of the greatest of Canadian national problems. The canal and railway systems were already extensive in the fifties, and it is significant that it was a railway that set the seal to Confederation. With the opening of the West, the relative importance of the railway has been multiplied. To-day the largest single employer of labour in Canada is a railway corporation, and Canada leads the world in the proportion of railway mileage to population.

As early as 1875 provision was made for the collection of railway statistics, by the "Railway Statistics Act" of that year. The Act was originally administered by the Department of Public Works, but was later on incorporated in the Railway Act, and with the establishment of the Department of Railways and Canals (1879), passed under the latter's jurisdiction. In course of time, statistics of express, telegraph, and telephone companies were added. For water transportation, however, no similar provision was made. The Customs Department maintains a yearly record of the total tonnages arriving at and clearing from Canadian ports, whilst the Department of Marine issues an annual list of the vessels of Canadian registry, but no statistics corresponding to those of transportation by land have been available.

On the consolidation of statistical legislation in the Statistics Act, 1918, the clauses of the Railway Act representing the original Railway Statistics Act were, by consent of the Department of Railways and Canals, incorporated in the new measure, with certain additions and improvements, the most important of which brought water carriers into the scheme on the same basis as carriers by land. It has been subsequently arranged that the similar inquisitorial powers vested, under the Railway Act, in the Board of Railway Commissioners (as the body charged with railway regulation in Canada) should be administered in so far as general statistical materials are concerned through the Dominion Statistician, thus permitting the complete consolidation of the statistical work connected with transportation.

The first step taken by the Bureau under the transportation sections of the Statistics Act in 1918 was the inauguration of a system of water transportation statistics, which, as previously remarked, had never hitherto been comprehensively organized. The plan adopted for the first year's operations, which are regarded as tentative, was briefly as follows: (1) Using the lists of the Department of Marine as a basis, a report for each vessel of Canadian registry will first be obtained, covering such details as construction, size, value, rig, route, freight and passengers carried, etc.; (2) Complementary to this, a report from every Canadian ship owner or company will be obtained on such points as, vessels operated and their registry, assets and liabilities, revenue and operating expenses, profit and loss account, etc. The results of these two inquiries, carefully co-ordinated, will furnish the statistics of Canadian registered shipping, whether operated in Canadian waters or elsewhere, and of all shipping interests located in Canada. (3) There remains to record the extent to which vessels of foreign registry and not of Canadian ownership are engaged in Canadian traffic, and the leading details thereof. Under the Statistics Act (sections 22 and 23), the Customs Department supplies annually to the Bureau of Statistics a record showing the number of vessels touching at Canadian ports, their registry, rig, tonnage, etc.,

## SESSIONAL PAPER No. 10f

classified as sea-going and coasting. This return gives cumulative totals only, counting each boat every time it enters or clears any port, and is of value chiefly for broad measurements. For the purpose just outlined, and as a check against (1) and (2) above, a further report will be obtained annually from the Customs collector of each port listing once only the name, registry, rig, etc., of each vessel that enters or clears, such list to be made the basis of further inquiry as indicated. Should the shipping situation at any time become abnormal the extension of this report to a monthly basis would at once provide information essential to the determination of policy. (4) Canal statistics will be enlarged, placed on the same basis as the other sections, and worked into the general treatment. (5) Water-borne traffic will be covered as a part of the arrangement described under the heading of Internal Trade (Division VII).

The second step in the reorganization of transportation statistics under the Statistics Act was the transfer of the work of the Railway Statistics Branch of the Department of Railways and Canals to the Bureau, and its incorporation in the latter's Transportation Division. This was still pending at the close of the year, but an outline of its significance may be given. The objects of the transfer were two-fold. In the first place, duplication and overlapping, as well as variations in statistical method, had arisen between the work of the branch in railway, telegraph and telephone statistics and that of the Industrial Census. The latter covers the manufacturing operations of transportation companies (locomotive and car building and repairing, electric power installation and production, ship-building, etc.) as well as the construction and maintenance operations of railway, telegraph and telephone companies, but the figures cannot at present be co-ordinated with those of the Railway Branch. There was overlapping also in the traffic statistics of the Bureau and the branch; and the organization of the Bureau's work on municipal statistics opened up prospects of still further conflict. No totals of land and water transportation were feasible. The statistics of transportation, in point of fact, should be an integral part of the general scheme of economic statistics and should follow common methods in treating such subjects as capital, labour, raw materials, etc. In the second place, the statistics of the branch had not been organized on a sufficiently detailed scale to serve certain needs of the Board of Railway Commissioners; especially were additional data required on the subject of cost units, so essential to the work of rate-regulation, and covering also the engineering (equipment) and traffic aspects by which railway building policy is so largely directed. Summing up, there was need of correcting the isolation of the existing records from the general body of statistics, and at the same time of increasing if possible the closeness of their relation to practical transportation problems. With these objects in view, a comprehensive reorganization was undertaken at the end of the year, simultaneously with the transfer of the branch, by the Board of Railway Commissioners and the Bureau in collaboration. It is the intention by means of this reorganization to set in motion with the year 1920 a scheme of transportation statistics more definitely adapted to the needs of the Board and at the same time in unison with the general statistical organization on which the Bureau is working. The Division will keep in touch with provincial departments having jurisdiction in transportation, etc., such as the Ontario Municipal and Railway Board, the Manitoba and Saskatchewan Telephone Departments, etc.

#### Division VII.—Internal Trade.

In a country so extensive and diversified as Canada, internal trade calls urgently for study. It is an exceedingly complex subject. Broadly, internal trade includes every purchase and sale within the country. Ordinarily, however, the term is limited to the movements of the commoner consumption-goods between section and section,

or to and from the large distributing centres, *i.e.*, wholesale as distinguished from retail marketing. Even thus narrowed, the field remains an immense one, and perhaps a still less inclusive interpretation is necessary before statistical treatment becomes possible. Economically, the Dominion falls into four main areas: (1) the Maritime Provinces, (2) the manufacturing and agricultural regions of the St. Lawrence basin, (3) the grain lands of the prairies, and (4) the Pacific slope. The inter-relations of these constitute a problem with which the future of Canada is largely concerned, and much will be accomplished if they can be measured by statistics. If, in addition, interprovincial movements can be recorded, it will be all to the better.

The Statistical Commission of 1912 gave the subject of Internal Trade Statistics considerable attention, and various expedients for measuring it were discussed and dismissed. In the end, the commission advocated, by way of beginning, "selecting a list of the more important articles and obtaining statistics as to their movement from producers, transportation companies and such other authorities as might be able to furnish them." The commission agreed that the broad statistics of trade between the economic areas of Canada above defined were desirable, but it offered no definite suggestion towards obtaining them.

More exhaustive consideration than was possible by the commission was devoted to this problem by the Bureau during 1916 and 1917. The establishment of comprehensive annual statistics of production through the Industrial Census and the reform of the foreign trade classification assisted in pointing the way. As soon as a definite plan of action was outlined, a Chief of the Division was appointed, in 1917, and the work has since taken form as rapidly as war conditions would allow. Certain channels available in peace were closed when the energies of business concerns were absorbed by the war; at the same time others were opened, and by co-operating with the war commissions, it was found possible at once to perform war-time service and lay the foundations for permanent work. While this program may not have built up as comprehensive results as might have been attained in normal times, it has given an opportunity for more intensive studies in certain directions than would otherwise have been practicable.

In general, it has been decided by the Bureau to work in two main directions, first, in a general way through traffic returns from transportation companies, under the transportation sections of the Statistics Act, and second, in the way recommended by the commission, but in co-operation with executive branches of the Government (Dominion and Provincial) that already follow the marketing of specific commodities rather closely, rounding out and supplementing these data from the traffic returns aforesaid and otherwise. Attached to these market statistics will be a subdivision of the Bureau on Prices. More detailed explanation of the scope of the work in its different phases is as follows:—

(1) *Traffic Returns*.—For the broad measurement of trade between different areas in Canada, it is proposed to secure a summarized monthly return from transportation companies of goods delivered and received for shipment within each of the nine provinces, a supplementary statement showing the receipts and shipments at each of the fifteen largest centres, and occasional reports, as market conditions demand, of shipments of specific articles out of the smaller producing areas (as of fruit from the Niagara peninsula). Thus it will be possible to show not only the amount of goods originating in each province, but also, by taking the difference between receipts and forwardings, the net amount of such goods contributed or consumed by each province and larger city. Were it feasible to require as detailed a classification of commodities as that employed for Customs entries, data for the provinces and cities comparable to the statistics of exports and imports would be available. Practical difficulties necessitate a much simpler classification, but at least the more important commodities may be covered.

## SESSIONAL PAPER No. 10f

(2) The marketing branches with which the Bureau is already collaborating as above outlined in the second division of the work—which is an intensive and complementary aspect of the first—are as below:—

(a) *Grain Commission.*—The operations of the Board of Grain Commissioners, especially in the western inspection division, reveal the main currents in the movement of grain within Canada. The statistics of the Commission will be amplified from other sources so as to include the entire grain "pool" both East and West and the flow both in and out. This, checked against production and exports and imports, will complete the annual statistical account of Canada's most important product. In addition to this record, weekly data are collected and published showing the visible supply of all grains at all the large elevators and the weekly movements in and out of the terminals and other grain markets.

(b) *Live Stock and Veterinary Director General's Branches.*—The Live Stock Branch of the Department of Agriculture already maintains a record of live stock arrivals at leading markets. Data collected by the Veterinary Director General incidental to the administration of the Meat and Canned Foods Inspection Act, and extracted by the Bureau from official reports thereunder form a valuable supplement. Linked with the production figures of the agricultural and industrial census divisions, these will bring the live stock industry under comprehensive statistical review.

(c) *Fruit, Fish and Dairy Branches.*—The marketing reports of the Fruit Division, Department of Agriculture, enlarged through the general traffic returns of the Bureau, will effect a similar treatment for the fruit industry, whilst Fish can be similarly handled in co-operation with the Fisheries Branch now engaged in a campaign for increasing the consumption of Canadian fresh fish. The visible supplies of produce in cold storage plants is recorded in co-operation with the Dairy Branch.

(d) *Food and Fuel Control.*—The statistical work for the Canada Food Board and for the Fuel Controller was carried out in the Bureau of Statistics. The first permitted the publication of some interesting monthly data on the movements of general produce. Under direction of the Fuel Controller, the movements of coal were still more closely followed, and the first exhaustive report on the Canadian coal trade was issued in April, 1919. This work will be continued though in less detail than was necessary whilst the food and fuel situation was acute.

(3) *Prices Statistics.*—Intimately associated with internal trade is the subject of prices—market records almost invariably including prices. The Bureau will handle the latter in considerable detail, its general activities placing it in a position of exceptional advantage to do so and a section within the Internal Trade Division being wholly devoted to the task. The range covered by this subdivision is as follows:—

(a) *Producers' Prices.*—The annual Census of Production collects a large mass of producers' prices. Through the staff of agricultural correspondents (6,000 in number), the prices at which the farmers dispose of their grain throughout Canada is ascertained; similarly for the various fishing districts (about 400 in number), the prices at which fishermen dispose of their catch and of domestically prepared fish are recorded. Each dairy factory records the price received for butter and cheese. For a number of manufactured articles also the Census yields a record of selling values. The Prices Section will bring all under review and will provide by independent inquiry what additional matter may be necessary.

(b) *Wholesale and Jobbers' Prices.*—A considerable mass of the prices ruling in the more important wholesale centres are collected incidentally to the arrangements with the Grain Commission, Live Stock Branch, etc., described above. For instance, in grains the daily high and low of the various grades marketed in Fort William and elsewhere are compiled; data for animals, meats, canned foods and fruit are similarly obtainable. For several years past, an excellent series of Wholesale Price Statistics has been issued by the Department of Labour; the statistics, however, are of limited scope, having been framed originally for the purpose of throwing light on variations in the cost of living rather than on trade movements. Even in this less comprehensive form, however, it has been recognized that the record takes the Department out of the sphere of its primary administrative interest.\* With the completion of the Bureau's organization accordingly, the Wholesale Prices records of the Labour Department will be merged therein.

(c) *Import and Export Valuations.*—An index number of the valuations at which the leading imports and exports of Canada are entered by the Customs Department will be maintained as a check and side-light on producers' and wholesale prices.

(d) *Farmers' Markets.*—A weekly record of prices ruling on farmers' markets throughout Canada will be maintained.

(e) *Prices of "Services."*—Freight and telephone rates will be recorded and analyzed through the Transportation Division, whilst water rates, gas and electric light rates, etc., will be obtained in collaboration with the annual industrial census. A barometer of property tax rates will eventually be afforded through the municipal statistics division. An index number of wages here regarded as the price of labour will be worked out in collaboration with the Department of Labour.

(f) *Prices of Securities.*—The fluctuations of stocks and bonds are being recorded weekly for the light thrown on conditions of credit, which apart from its intrinsic interest is frequently an influence profoundly affecting commodity prices. Fluctuations in rates of interest, which are closely associated with security prices, will also be measured. The first report of the Bureau in this connection, covering the past five years, will be issued in 1919.

(g) *Retail Prices.*—The Bureau trenches on Retail Prices in its record of farmers' markets above. The main work on retail prices, however, has been done by the Department of Labour in the connection above explained, a monthly record of the retail prices of some thirty staple commodities being obtained from the correspondents of the Department stationed in the leading centres of population. In addition, records of retail prices are also being collected by the Bureau from the retail trade direct for purposes of check, thus bringing the Labour Department record within the purview of the general scheme of statistics covering the entire range of prices. In the Population Census, the aspect of rentals will be covered along somewhat the same lines as in Australia. In addition, the Department of Labour will make intensive studies from time to time in particular localities where important issues are involved or where the general scheme of statistics is inapplicable.

As already remarked, internal trade offers an almost unlimited field for statistical investigation. It is thought that the work mapped out as above will yield some useful general measurements as well as intensive studies of the more important com-

\* See "Wholesale Prices, 1914," Report by the Department of Labour, foot-note, page 2.

SESSIONAL PAPER No. 10<sup>1</sup>

modities—the whole capable of expansion as experience may dictate. Among further suggestions that have been urged upon the Bureau is one for a periodical census of wholesale and retail trading concerns.

## Division VIII.—Finance.

A division is under organization for the co-ordination and enlargement of the statistics of finance. The subject falls into (a) public, and (b) private finance.

The Bureau will work along the following lines:—

*Dominion and Provincial Finance.*—The public accounts of the Dominion and of the provinces are the outstanding documents of Canadian public finance. As issued, they follow forms and arrangements dictated primarily by the requirements of the several Governments and varying considerably from each other. Even where terminology is the same, connotation is frequently different.\* The Dominion accounts are necessarily to a large degree *sui generis*. It is very important, however, in the case of the provincial accounts to be able to make clear and accurate totals for the Dominion, as well as clear and accurate comparisons between the provinces, of the leading items of revenue and expenditure. For example, the revenues derived from succession duties, taxation of corporations, sales of public lands, royalties on forest, mineral and fisheries products, etc., should be correlated, as well as the expenditures on such items as agriculture, education, public works, etc. The Bureau will institute such correlation by applying a uniform schedule to the several series of accounts. A preliminary analysis of the kind covering the past three years has been already completed.

*Municipal Statistics.*—Statistics of municipal administration are required to complete the scheme of public finance; in many public activities (as for example education) the municipality plays the major part. The problem is the same in kind as above, only larger and more complicated. Six provinces publish municipal statistics, and five have Departments of Municipal Affairs. There is, however, little or no uniformity in statistical method, not only as between provinces, but often as between municipalities in the same province. The Union of Canadian Municipalities has devoted special attention to this question and to the underlying problem of uniform municipal accounting. In response to representations from the union and from the Municipal Improvement League of Canada, the Bureau has submitted a scheme of statistical co-operation to the several Provincial Municipal Departments. The main suggestion put forward was the adoption of uniform statistical administration by the provinces, the Bureau to act as clearing house for the resulting data. Such a plan, however, calls for a vast amount of preliminary discussion and organization. Pending its adoption, it was suggested that the Bureau might independently collect statistics for a fixed group of municipalities, say, those of 10,000 population and over, according to schedules and methods of compilation approved by the provinces, and capable of being made the basis in time of the broader scheme.

*Currency and Banking.*—Passing to the subject of private finance, banking occupies the most important subdivision. It is so intimately connected with currency that the two are best treated in conjunction. The monthly bank statement issued by the Department of Finance, on a form prescribed by Parliament, keeps record of the operations of the chartered banks. The statistics of Dominion note issues and of the

\* For instance, certain provinces charge their entire expenditures on agricultural colleges to "Agriculture"; others include only administration expenses under that heading, charging buildings, maintenance of grounds, etc., to "Public Works." Expenditures on hospitals, charitable institutions and correction schools are in one province dealt with under the item "Public Works," in another under the item "Provincial Secretary" and in another under the item "Attorney General," whilst a fourth divides them between all three.

10 GEORGE V, A. 1920

reserves held against them, as well as of gold, silver, and bronze coinages are published annually by the same department. The relations, however, of the currency and banking systems of Canada *inter se* and with the corresponding systems of the United States are somewhat unique, and though the above treatment furnishes the basic statistics, there is opportunity for analysis and interpretation for the use of those less familiar with the details of financial mechanism. This is supplied in an annual review of the currency and banking statistics of Canada which is published in the Canada Year Book, in which the figures above mentioned are re-vamped, chiefly in the form of monthly averages, (except where this would deprive them of significance) and the necessary descriptive and historical matter added.

*Loan and Trust Companies.*—Next to the banks, the most important financial institutions are the loan and trust companies, whose business is largely conducted on the security of real estate. The Department of Finance issues licenses to such companies, as well as to building societies, and publishes an annual report of their proceedings. In addition, however, a number of companies operate under provincial charters. It is proposed to issue a summary statement by provinces in the Canada Year Book which will include both Dominion and provincial licensed companies. This will involve, as a preliminary step, the adoption of uniformity in the data collected by the different licensing departments.

*Insurance.*—Insurance is a very important subdivision of private finance. The Dominion Department of Insurance issues statistics of insurance in two volumes (volume I on fire insurance companies, etc.; volume II on life insurance companies) an abstract being published in anticipation of the final returns. Most of the insurance business of Canada is conducted by companies licensed by the Dominion Government. Jurisdiction, however, is also exercised by the Provincial Governments (five of the provinces having insurance departments), and companies operating under Dominion license must comply with provincial laws where such exist. As each department, Dominion and Provincial, reports only concerning its own licensees, and as the statistics are prepared from different schedules and do not always cover the same details, it follows that the insurance statistics of Canada are incomplete and are incapable under existing conditions of being more than approximately estimated. The procedure contemplated for remedying these conditions is the same as in the case of loan companies above. The same remarks apply to the statistics of Friendly Societies.

*Wealth, Income, Debt, and Taxation.*—We now pass into a much wider and less clearly defined domain. A project of the Bureau which involves a comprehensive viewpoint and trenches on both public and private finance, is the co-ordination of the statistics bearing on wealth and income on the one hand, and on debt and taxation on the other. Models exist in the excellent work of the census offices of Australia and the United States. On the wealth and income of Canada, various divisions of the Bureau can already be made to yield considerable information by the so-called "inventory" method.\* The recent institution of a direct tax on business and other incomes opens the way, with proper organization for co-ordination in such matters as schedules, classification and compilation, to extensive supplementary and corroborative data. Statistics of ordinary taxation will form a part of the scheme for improved statistics of public finance above proposed. So likewise will the statistics of public debt. Private indebtedness is a large subject, partly provided for in the preceding (banking, loan and trust companies, etc.). On general mortgage indebtedness light could be thrown

\* Several methods are employed in estimating the national wealth of a country. The two most common are the so-called "inventory" method, which consists of totalling the amounts known through the Census and other inquiries to be invested in agriculture, manufactures, dwellings, etc.; and the method of working back through income tax returns to the capital from which the income is derived. A third method is the estimation of wealth from probate returns. Still another, termed the "Census" method, is based on a canvass of the individual.

## SESSIONAL PAPER No. 10f

only by a considerable initial investigation in registry offices and the instituting of changes in the method of reporting by registrars.

In conclusion, it may be pointed out that for many aspects of finance, the statistics must of necessity accrue indirectly. There is for example the problem of throwing light on the state of credit and its expansion and contraction. The statistics of security prices and of interest and exchange rates (collected in the prices section of the Internal Trade Division as already described), together with the accompanying records of stock exchange transactions, reflect the condition of the money market and of the prevailing state of credit rather closely. Similarly, the statistics of commercial failures, apart from their immediate purpose, are of value as reflecting business confidence—an important factor in credit. Under the Bankruptcy Act, passed at the 1919 session of Parliament, a report covering the more important details of each commercial failure must be made to the Dominion Statistician. Another feature which in a “new” country like Canada is frequently of far-reaching influence on the general financial situation is the scale of capital importations. Certain Canadian bond houses and other private investigators have maintained valuable records in this connection, but there has been no official attempt up to the present to measure Canadian borrowings abroad. A means to the same end, it may be pointed out, is the interpretation of the trade balance, i.e., the investigation of the “invisible” items contained in the import and export statistics.\* This at present involves an overwhelming amount of estimate, and doubtless must always remain obscure; nevertheless the need should be kept in mind and every effort made to increase the helpfulness of official statistics.

### Division IX.—Administration of Justice.

The collection and publication of Criminal Statistics was authorized by special Act as early as 1876 (“An Act to make provision for the collection and registration of the Criminal Statistics of Canada,” 39 Vic., c. 13). Originally administered by the Department of Agriculture, the Act is now incorporated in the Statistics Act. Under it, a direct return is received annually by the Bureau from every court or tribunal administering criminal justice; these returns were originally supplemented in the case of the remoter districts of the West by reports from the Royal N.W. Mounted Police. The statistics as published show for each judicial district (148 in number): (1) the

\* Among these items are:

#### *Exports.*

- (1) Payments of interest and sinking fund sent abroad.
- (2) Payments of dividends on Canadian securities held abroad.
- (3) Remittances of immigrant residents.
- (4) Expenditures of Canadians abroad (including in recent years expenditures on the Canadian expeditionary forces).
- (5) The export of capital which accompanies emigration.
- (6) Payments to foreign insurance companies.
- (7) Payments to foreign ships and railroads engaged in the handling of goods for Canada.
- (8) Canadian capital sent abroad for investment.

#### *Imports.*

- (1) Capital brought into the country by immigrants, including Chinese head tax.
- (2) Earnings on Canadian capital invested in other countries (including call loans in New York).
- (3) Expenditures in Canada of travellers from other countries.
- (4) Remittances to Canada by friends of residents.
- (5) Insurance payments to Canada.
- (6) Earnings of Canadian ships engaged in foreign commerce.
- (7) Canadian borrowings abroad.

indictable and (2) the non-indictable offences that have been committed, analysed to indicate the nature of the offence, the age, sex, occupation, civil condition, birthplace, etc., of the convicted and the sentences imposed. The Act also provides for the collection of the statistics of penitentiaries, prisons, reformatories, and jails as complementary to the above. Statistics of pardons are obtained through the Department of the Secretary of State, and the record is thus rendered comprehensive.

It is the intention to organize the statistics of civil justice so as to show at least the broader tendencies of litigation. The Canada Year Book will provide a vehicle for their publication.

### Division X.—Education.

This division was under organization at the end of the year, and only an outline may be given of its purpose. The need of the fullest possible information on a problem of such national importance is obvious and has been emphasized by the war.\* The well-known Federal Bureau of Education of the United States, it may be recalled, devoted its first activities to the systematizing of the statistics of State education, its annual reports appearing in two series of which the first is purely statistical. In Canada, there is urgent need for similar foundational investigation. The Provincial educational systems, which control elementary education, have developed independently of each other, and considerable differences in structure and method have been the result. For example there are differences between Province and Province in the school year; the distinction between elementary and secondary schools is not sharply drawn in all the provinces; and on a multitude of points both in elementary and in normal and model schools, such as the recording of the age, sex, etc., of pupils and teachers, the grading of pupils, the description of school accommodation, marked differences in method exist. Moreover, private schools and higher education lie beyond provincial departmental statistics. The decennial census in the past, in addition to the usual questions regarding literacy and language, devoted rubrics to school attendance, the cost of higher education, the value of school buildings, etc., with the object of affording a general and uniform view of these phenomena. But for certain of these inquiries the machinery of the Census is not well adapted, and there has been a distinct lack of relation between Dominion and Provincial statistics. In the year 1916, the Bureau assembled, for publication in the Canada Year Book and for reprint as a separate brochure, as complete statistics of Canadian education in comparative and summary form as the available materials permitted, but the results tended primarily to emphasize the blanks and discrepancies that must prevail under existing conditions.

\*An interesting side light on the economic importance of education in view of problems created by the war has been thrown by Professor Cudmore of Toronto University. Using United States statistics as basis, Professor Cudmore notes that 88 per cent of the national income is represented by economic rent, 16.8 per cent by interest, 46.9 per cent by wages, and 27.5 per cent by profits. In other words, rent and interest (which may be designated as "property income") make up 25 per cent of the total, whereas wages and the return to organizing ability known as profits (which may be designated as "service income") make up the remainder, or no less than 75 per cent. If the rapid and effective increase of the national income be desired, the field which offers the largest scope is therefore "service income," or the return made to personal efficiency. And personal efficiency can be most effectively increased by education—that is, by giving to every child in the country, first of all, a reasonably good general education, and supplementing this by a specialized training in the vocation for which the child is best fitted. Professor Cudmore adds: "Property income" cannot be increased with anything like the same speed as "service income." It in the main originates in surplus income converted into capital, but what that surplus income is or whether there is a surplus at all depends mainly upon the personal efficiency of those who receive it. "Property income," in other words, is derivative, arising chiefly out of the "service income" of the past. If we desire, as we must, to increase the real income of the people (as distinguished from mere money income) the very best way is, therefore, to increase their personal efficiency through a better and more universally enforced educational system, which will maintain its hold of all its pupils until they are intellectually awake or have shown themselves impossible to awaken."

## SESSIONAL PAPER No. 10f

At the time of preparing the matter just referred to a memorandum was drawn up in which an analysis of the points of difficulty encountered was made and a scheme of statistical reform sketched involving the modification of certain provincial practices, the delimitation of Dominion and provincial inquiries, and co-operation between the Bureau of Statistics and the Provincial Education Departments in a nation-wide scheme of educational statistics. The memorandum was submitted to the Provincial Departments and was later personally discussed with them, the result being that the feasibility of a scheme of statistics covering the main points of educational progress in Canada was established, standardization rather than uniformity to be the goal. The matter was also discussed with representatives of the Dominion Education Association, which, by resolution in 1918, endorsed the plan of action contemplated by the Bureau. An appointment to enable the Bureau to proceed with the work was pending at the end of the year.

**Division XI.—General—The Canada Year Book. Etc.**

An important function of a central statistical office is the issuing of abstracts of general statistics. Not only do such publications render available in conveniently accessible and summary form the chief comparative statistics of the Dominion, but they afford an opportunity for indicating the general trend of social and economic progress and the correlation of various activities that are often regarded as independent. The Canada Year Book is the chief organ of the Bureau devoted to this object, and its preparation and editorial supervision constitutes a distinct phase of the work. The need for a publication of the kind was felt immediately after Confederation (see footnote, page . . .), but it was not until 1886 that the work came under official direction, when the Department of Agriculture began publication of the "Statistical Year Book of Canada." As originally projected, the Year Book consisted of two parts, a "Record" and a "Statistical Abstract," the latter embracing all the principal official statistics of Canada whether published by Dominion or provincial authority. The work was continued annually upon the same lines until 1905, when it was remodelled and issued under the title "The Canada Year Book, Second Series," its contents being restricted to tabular abstracts of the statistics of the Dominion Government, preceded by a general review of the "Events of the Year." This series lasted until 1912, when the volume was again re-arranged, provincial government statistics were readmitted, the tables were accompanied by explanatory letterpress, and several other new features were introduced, including the use for the first time of maps and statistical diagrams. Further progress along the same lines was made with the edition of 1913, when a specially designed cover improved the outside appearance of the book, and when the policy was adopted of including special monographs on different subjects suitably illustrated. The latter feature has added considerably to the popularity of the work. In succeeding editions, articles by competent authorities have appeared on Canadian History, Constitution and Government, Local Government, Education, Geology, Fauna and Flora, and Natural Resources. The series as planned will include in future issues articles on the administration of justice and public health and on the growth and development of Canadian industry in its various phases. Permanency is given to the series by the republication of selections from articles which are not repeated *in extenso* from previous issues, and a cumulative index renders the whole readily accessible. The 1918 edition of the Year Book constitutes a jubilee volume and includes articles on the Story of Confederation, on Fifty Years of Canadian Progress and on the Climate of Canada. Meanwhile, increased attention has been given to the arrangement of the tabular matter of the various sections, and to their accompanying letterpress. On many points, the Year Book represents the only information pub-

lished by the Bureau. It will be readily understood that extreme care is necessary to ensure that such digests include all essential and significant features, in their proper setting of comparative and retrospective data, and that the descriptive matter is thoroughly expert and reliable. Hence the policy has been to have the different divisions of the Bureau supervise the matter of the Year Book pertaining to the subjects with which they deal. It will have been noted in the foregoing that for certain features of the work of the divisions, the Year Book is the only vehicle of publication. The Year Book thus enters in the most intimate way into the work of the Bureau in all its phases, and in fact affords the means by which the latter rounds out its treatment of statistics. It is in charge of an editor and has an independent staff of compilers. The same staff administers the library of the Bureau and handles inquiries for foreign and general statistics not originating in the Bureau.

As previously remarked, the Year Book, especially in its introductory summary, affords a general and related view of progress. There is need, however, for a more frequent summing up of at least the main movements of production, trade, finance, immigration and the like, providing the basis for an analysis of the interdependence of such activities and the throwing of dominant tendencies into relief. The success of several private statistical agencies in catering to this demand is an indication of its urgency and of the usefulness which a compendium of scientifically chosen and up-to-date statistics has for those requiring data of a barometrical character. Plans have been drawn up for a quarterly or monthly journal which would meet such requirements and which would provide a medium for informing the public promptly of the activities of the Bureau in matters of current moment.

### Conclusion.

As will be evident at many points, the organization of the Bureau is still in process, though the outline has been traced and certain sections filled in. Especially will it have been remarked that the Bureau has been concerned thus far rather with the scope of the statistics to be secured and the means of securing them, than with the methods of presentation and publication. Prominently in mind also has been the point of view so strongly emphasized during the war that statistics are not merely a record of what has been but are for use in planning what shall be—that is the duty of a statistical organization to assist directly in the day-to-day problems of administration, as well as to provide their theoretic background. Work of this kind can never achieve finality, for the field is too enormous and the need of adjustment to changing conditions is constant. It is believed, however, that the Bureau now embraces the fundamental subjects of what might be termed a national system of statistics, organized to meet the ordinary requirements of the Government and at the same time permitting—as a matter of logical expansion and with the minimum of derangement—the superimposing of such new approaches or new directions of development as occasion may dictate. This preliminary and foundational organization, it is hoped, will be completed during the year 1919-20, so that the census of 1921 may proceed from a sound basis.

Perhaps the culminating advantage in a centralized statistical system lies in the related view it permits and encourages of economic and social phenomena. The social and economic body is one, not several—often conditions in a particular field can be illumined best through another field altogether—and its observation should be on that basis. The Government is more than a congeries of departments vested with a series of administrative functions; it is a single agency for the direction of national policy, to fulfil which duty a broad and analytical outlook upon current trends is indispensable. Such outlook a central statistical bureau from the amplification of experience which it promotes is especially adapted to provide. The organization of the "General

## SESSIONAL PAPER No. 10f

Economic Department" of the United Kingdom Board of Trade and the activities of certain universities in endowing economic research are suggestive here. There is need for a national "laboratory" for the observation and interpretation of economic and social phenomena on behalf of the Government and the production of monographs on features thrown from time to time into prominence. It is noteworthy that recent tendencies in scientific thought are away from purely deductive reasoning and strongly in the direction of the testing of such reasoning by inductive verifactory data. On no foundation could such a service be better built than on that which is now provided by the Bureau of Statistics.

*PRINTED BY ORDER OF PARLIAMENT*

OTTAWA  
J. DE LABROQUERIE TACHÉ  
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY

1919

*To His Excellency the Duke of Devonshire, K.G., P.C., G.C.M.G., G.C.V.O., etc., etc., etc., Governor General and Commander in Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:—

The undersigned has the honour to present to Your Excellency the Annual Report of the Department of Customs and Inland Revenue, containing Tables and Statements relative to the Imports, Exports, Customs and Inland Revenue of the Dominion of Canada, for the Fiscal Year ended March 31, 1919, as compiled from official returns.

All of which is respectfully submitted.

J. D. REID,

*Acting Minister of Customs and Inland Revenue*

OTTAWA, October 18, 1919.

## PREFACE.

The Customs Act contains the following provisions respecting the Annual Report of the Department of Customs:—

“ 305. The Minister shall annually make to the Governor General, to be laid before Parliament within fifteen days after the meeting thereof, a report and statement of the transactions and affairs of the Department during the year then next preceding.”

The Inland Revenue Act also contains provisions respecting the Annual Report of the Inland Revenue Service as follows:—

“ 14. The Minister shall annually make to the Governor General a report and statement of the transactions and affairs of the Department during the year then next preceding, which shall be laid before Parliament within fifteen days after the next meeting thereof.”

The unrevised monthly statements of imports and exports, prepared and published under the direction of the Department of Customs from July 1, 1900, ceased to be published by this department since March, 1918.

Detailed statements, however, showing the quantity, value, and origin of imports, and the quantity, value, and destination of exports, continue to be prepared and furnished monthly by the Department of Customs from April 1, 1918, for publication by the Dominion Bureau of Statistics.

Trade Statistics classified by countries, with other details compiled from Customs returns, are now published by the Dominion Bureau of Statistics.

Part I of this annual report contains tables and statements relative to the Customs.

Part II of the report contains tables and statements relative to the Inland Revenue.

## EXPLANATORY NOTES RELATING TO CUSTOMS STATEMENTS

IN GENERAL STATEMENT No. 15 (Pt. I) of GOODS ENTERED FOR HOME CONSUMPTION, the term "Entered for Home Consumption" is the technical term in use at the custom-house, and does not imply that the goods have been actually consumed in Canada, but that they have passed into the possession of the importer and that duty has been paid on that portion liable for duty.

The value of goods imported is governed by section 40 of the Customs Act, which provides that the value of imported goods subject to ad valorem duty "shall be the fair market value thereof, when sold for home consumption, in the principal markets of the country whence and at the time when the same were exported directly to Canada."

IN GENERAL STATEMENT No. 17 (Pt. I) OF EXPORTS, the term "The Produce of Canada" includes all imported articles which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined in Canada from imported raw sugar, flour ground from imported wheat, and articles constructed or manufactured from imported materials. "Goods not the produce of Canada" shows the exports of foreign goods which had been previously imported.

Under the regulations commencing July 1, 1900, all *Export* entries are delivered at the "*frontier port of exit*," and the totals thereof are credited to the respective ports where the goods pass outwards from Canada. In view of the more complete returns obtained under this system the additions heretofore made to the exports statistics (prior to July 1, 1900) under the head of "short returns" are now omitted.

In this report, the tables of imports and exports at the several ports of entry indicate that merchandise of the value stated was *entered inwards* or *passed outwards* at the ports mentioned, but do not imply that the imports were all for consumption at such ports or that the exports originated there.

The value of "Goods the Produce of Canada" is their value at the time of exportation at the ports of Canada whence shipped.

The value of "Goods not the Produce of Canada" is the actual cost of such goods.

The initials n.e.s. mean "not elsewhere specified."

The initials n.o.p. mean "not otherwise provided for."

The expression "ton" means two thousand pounds, and "cwt." one hundred pounds.

The figures shown in all statements for the Fiscal Year ended March 31, 1919, are exclusive of Coin and Bullion.

# REPORT

OF THE

## DEPUTY MINISTER OF INLAND REVENUE

To the Hon. J. D. REID, M.D.,

Acting Minister of Customs and Inland Revenue.

SIR,—Herewith I have the honour to submit statements of the Inland Revenues collected by this department during the fiscal year ended March 31, 1919, with the usual information as to the cost of collections, and statistics respecting the sources whence these revenues were derived.

The following summary comparison shows the accrued revenues for the fiscal years ended March 31, 1915, 1916, 1917, 1918, and 1919.

	1915.	1916.	1917.	1918	1919
	\$	\$	\$	\$	\$
Excise .....	21,627,958	22,540,406	24,525,361	27,011,282	30,209,017
War Tax .....		1,550,488	2,072,441	2,253,422	11,964,753
Methylated Spirits .....	96,747	111,846	183,708	308,968	322,583
Law Stamps .....	9,758	11,520	9,910	8,902	8,623
Other Revenues .....	103,932	8,490	9,885	12,206	1,021
Totals .....	21,838,425	24,222,750	26,801,305	29,684,780	42,565,983

10 GEORGE V, A. 1920

Details of Excise Revenue accrued during the undermentioned fiscal years:—

	1915.	1916.	1917.	1918.	1919.
	\$	\$	\$	\$	\$
Spirits	8,706,481	8,701,075	9,880,567	11,486,527	6,964,413
Malt liquor	142,903	97,779	109,215	80,486	19,852
Malt	2,616,288	2,689,300	2,367,902	1,791,482	1,477,792
Tobacco	9,352,881	10,222,784	11,197,103	12,616,879	20,248,335
Cigars	655,905	635,158	730,215	776,086	1,261,915
Alc. acid	7,255	8,250	8,049	7,330	6,795
Manufactures in bond	94,904	105,812	110,409	123,183	118,856
Salaries	4,141	10,349	8,353	6,933	42,021
Other receipts	77,200	42,538	113,548	122,376	69,806
Total	21,657,958	22,513,045	24,525,361	27,011,282	30,209,017

The quantity of Spirits produced during the fiscal year was 4,187,109 proof gallons, as compared with 3,566,955 proof gallons produced in the previous fiscal year. The raw materials taken for use, in the production of Spirits, during the fiscal year were as follows:—

	Lb.
Malt	996,093
Indian corn	15,310,212
Rye	1,775,935
Oats	41,900
Molasses	58,598,950
Wheat	1,237,140

The transactions of the several distilleries will be found stated in detail in (Statement No. 1A), pages 46 and 47.

	Proof galls.
There was, on April 1, 1918, in process of manufacture	419,684
Manufactured during the fiscal year	4,187,109
Returned to distilleries for redistillation—In bond	478,709
Received into distilleries from other sources—Duty paid	279
Received into distilleries from other sources—In bond	—
Total	5,085,781

This was disposed of as follows:—

	Proof galls.
Placed in warehouse	4,409,160
Fusel oil written off	7,693
Deficiency arising from rectification	1,860
Remaining in process of manufacture, March 31, 1919, by actual stock taking	667,068
Total	5,085,781

## SESSIONAL PAPER No. 11

*Spirits.*—The following statement shows the warehousing transactions in Spirits during the fiscal year ended March 31, 1919, and the four preceding fiscal years:—

Fiscal Years	In Warehouse at beginning of year, including transits.	Warehoused during the year, Ex-distillery.	Otherwise warehoused	Taken for consumption.	Exported.	Used in bonded factories.	Otherwise accounted for.	For redistillation.	In Warehouse at end of year, including transits.
	Pf. galls.	Pf. galls.	Pf. galls.	Pf. galls.	Pf. galls.	Pf. galls.	Pf. galls.	Pf. galls.	Pf. galls.
1914-1915	21,561,976	6,490,682	45,918	4,021,090	275,911	474,033	459,038	369,168	22,499,984

The foreign demand for Canadian distillery products is less than the average the last four years, the quantities exported being as follows:—

	Proof galls.
1914-1915	275,911
1915-1916	808,135
1916-1917	1,289,117
1917-1918	587,409
1918-1919	432,034

The following statement shows the entire quantities of Spirits upon which duties were collected during the several fiscal years recited therein. To accord with the figures shown in Financial Statement No. 1, pages 44 and 45:—

Fiscal Years.	Canadian Spirits.		Imported Spirits used in Bonded Factories.	Total quantities upon which duty was collected.	Revenue accruing, including License Fees.
	Paid duty Ex-distillery.	Paid duty Ex-warehouse			
	Pf. gallons	Pf. gallons	Pf. gallons	Pf. gallons	\$

1918-1919. . . . .	16,137,145	218,497,375	496,935	221,087,110	109,635	1,397,245	11,537,465	1,261,915

The revenues derived from goods manufactured in bond during the fiscal year ended March 31, 1919, and the four preceding fiscal years, were as follows:—

1914-1915. . . . .	\$ 94,504
1915-1916. . . . .	105,812
1916-1917. . . . .	110,409
1917-1918. . . . .	123,183
1918-1919. . . . .	118,856

*Acetic Acid.*—The revenues derived from Acetic Acid during the fiscal year ended March 31, 1919, and the four preceding fiscal years, were as follows:—

1914-1915. . . . .	\$ 7,255
1915-1916. . . . .	8,250
1916-1917. . . . .	8,049
1917-1918. . . . .	7,330
1918-1919. . . . .	6,795

*Inspection of Petroleum.*—The quantity of Petroleum and Naphtha inspected during the fiscal year was as follows:—

Petroleum. . . . .	Galls.
Naphtha. . . . .	57,434,637
	81,228,268
Total. . . . .	138,662,905

*Methylated Spirits.*—The quantity of Methylated Spirits manufactured during the fiscal year was 319,880·40 proof gallons, and the sales 325,250·00 proof gallons. A statement of details appears on pages 36 and 37.

The price of this denatured alcohol is practically the actual cost of manufacture, and has been following varying prices on account of the constantly increasing cost of alcohol and naphtha:—

10 GEORGE V, A. 1920

On and after the 13th November, 1917, the prices of methylated spirits have been as follows:—

Grade No. 1 "Standard" and grade No. 1 "Benzine" when consigned to points East of Winnipeg, or West of, and including Quebec, \$1.50 per Imperial gallon; when consigned to points beyond Quebec and Winnipeg, the latter inclusive, \$1.48 per Imperial gallon.

Grade No. 2 "Standard" \$1.50 per Imperial gallon.

On and after the 18th February, 1919, the prices of methylated spirits have been as follows:—

Grade No. 1 "Standard" and grade No. 1 "Benzine" when consigned to points East of Winnipeg, or West of, and including Quebec, \$1.35 per Imperial gallon; when consigned to points beyond Quebec and Winnipeg, the latter inclusive, \$1.33 per Imperial gallon.

Grade No. 2 "Standard" \$1.35 per Imperial gallon.

APPENDIX A shows the consumption of, and revenues derived annually, from spirits, tobacco, and other goods subject to Excise, and of similar goods, subject to duties of Customs, per head of the population of the Dominion.

APPENDIX B contains, as usual, the details concerning illicit stills seized during the year.

APPENDIX C shows the amount of Excise Revenues collected at each out office, and under various headings, separately.

I have the honour to be, sir,  
Your obedient servant,

R. R. FARROW,  
*Deputy Minister.*

INLAND REVENUE DEPARTMENT,  
OTTAWA, October 28, 1919.

---

# 13ème ÉLECTION GÉNÉRALE, 1917

---

Rapport du Directeur Général des Élections

OFFICE OF THE CHIEF ELECTORAL OFFICER,

OTTAWA, November 15, 1920.

The Honourable the Speaker,  
House of Commons,  
Ottawa.

SIR.—I have the honour to transmit herewith a report on the 13th General Election held on the 19th of November and 17th of December, 1917. The printing of this report was well forward when I assumed my present duties on July 1st last, its preparation having been undertaken pursuant to a practice followed after the General Elections of 1900, 1904, 1908 and 1911, carrying on, without any express direction, the series of reports which, from Confederation until and including the general election of 1896, had been prepared pursuant to successive Orders of the House of Commons passed at the first session of each new Parliament. Section 72 (6) of the Dominion Elections Act requires a similar report to be made in future.

The proclamations dissolving the 12th Parliament and ordering the issue of the writs for the 13th Parliament were dated on the 6th of October, 1917. The writs were dated on the 31st of October, 1917, and were returnable on the 27th of February, 1918, later changed by Order-in-Council to the 16th of March, 1918. Nomination generally was fixed for November 19th, 1917, and the poll for civilian voters was on the 17th of December, 1917, except in the electoral districts of Nelson and the Yukon, the nomination and polling in these constituencies being respectively on the 4th of March and 1st of April 1918, and on the 31st of December, 1917, and the 28th of January, 1918. The military vote was separately taken under the provisions of the statute in that behalf.

With the exception of returns by acclamation or after a recount or inquiry, the declaration of the election by the General Returning Officer was made on March 16, 1918.

I have included with the report of the General Election reports of the by-elections held between the beginning of 1916, when the annual printing of election reports was suspended on account of the war, and the end of 1919. These will carry on the series of such reports from 1908, when they began to be regularly made, until the first statutory report which I shall make for 1920 under Section 72 (6) of the Dominion Elections Act.

I have the honour to be, sir,  
Your obedient servant,

O. M. BIGGAR,  
*Chief Electoral Officer.*

BUREAU DU DIRECTEUR GÉNÉRAL DES ÉLECTIONS.

OTTAWA, le 15 novembre 1920.

A l'honorable Orateur de la  
Chambre des Communes,  
Ottawa.

Monsieur,—J'ai l'honneur de vous transmettre avec la présente un rapport de la treizième élection générale qui eut lieu le 19 novembre et le 17 décembre 1917. L'impression de ce rapport était déjà assez avancée lorsque j'entrai en fonctions, en ma présente qualité, le premier juillet dernier; la préparation en avait été entreprise conformément à une pratique suivie à la suite des élections générales de 1900, 1904, 1908 et 1911, continuant, sans l'application d'aucune règle précise, la série des rapports qui, depuis la Confédération jusqu'à l'élection générale de 1896 inclusivement, avaient été préparés en conformité d'ordonnances successives de la Chambre des Communes décrétées à la première session de chaque nouveau parlement. L'article 72 (6) de la Loi des élections fédérales prescrit qu'un semblable rapport doit être fait à l'avenir.

Les proclamations décrétant la dissolution du 12<sup>ème</sup> parlement et ordonnant l'émission des brefs pour le 13<sup>ème</sup> parlement, portaient la date du 6 octobre 1917. Les brefs étaient datés le 31 octobre 1917, et rapportables le 27 février 1918, cette date fut changée par Arrêté en Conseil au 16 mars 1918. La présentation généralement fut fixée pour le 19 novembre 1917, et le scrutin pour les votants civils eut lieu le 17 décembre 1917, sauf dans les districts électoraux de Nelson et du Yukon, la présentation et le scrutin dans ces districts électoraux ayant eu lieu respectivement le 4 mars et le 1<sup>er</sup> avril 1918, et le 31 décembre 1917 et le 28 janvier 1918. Le vote militaire eut lieu séparément sous le régime des dispositions de la loi qui le régit.

A l'exception des membres qui furent élus par acclamation, ou après décompte ou enquête, la déclaration de l'élection par l'officier-rapporteur général fut faite le 16 mars 1918.

J'ai ajouté au rapport de l'élection générale des rapports des élections partielles depuis le commencement de 1916, alors que l'impression annuelle des rapports d'élection fut suspendue à cause de la guerre, jusqu'à la fin de 1919. Ils font suite à la série des rapports depuis 1908, alors qu'ils commencèrent à être faits régulièrement, jusqu'au premier rapport statutaire que je ferai pour 1920 sous le régime de l'article 72 (6) de la Loi des élections fédérales.

J'ai l'honneur d'être, monsieur,  
Votre obéissant serviteur,

O. M. BIGGAR,  
*Directeur général des élections.*
